

STATEMENT REGARDING DAHOWA HYDRO
ICAP INELIGIBLE FORCED OUTAGEGENERATOR DEACTIVATION ASSESSMENT

Section 38.3.2 of the NYISO OATT states that, for Generators that enter an ICAP Ineligible Forced Outage (IIFO), the NYISO “shall determine whether it will (a) immediately commence a Generator Deactivation Assessment to review the deactivation of the Initiating Generator, or (b) if practicable, add the Initiating Generator to a STAR that is already in progress, or (c) to include the Initiating Generator in the next STAR it commences.”

The NYISO, in consultation with National Grid, has determined that it should include the ICAP Ineligible Forced Outage of Dahowa Hydro in the next Short-Term Assessment of Reliability (STAR), which will be the 2025 Q4 STAR. The 2025 Q4 STAR Start Date is October 15, 2025.
