

STATEMENT REGARDING HYLAND LFGE ICAP INELIGIBLE FORCED OUTAGE
GENERATOR DEACTIVATION ASSESSMENT

Section 38.3.2 of the NYISO OATT states that, for Generators that enter an ICAP Ineligible Forced Outage (IIFO), the NYISO “shall determine whether it will (a) immediately commence a Generator Deactivation Assessment to review the deactivation of the Initiating Generator, or (b) if practicable, add the Initiating Generator to a STAR that is already in progress, or (c) to include the Initiating Generator in the next STAR it commences.”

The NYISO, in consultation with Rochester Electric & Gas, has determined that it should include the ICAP Ineligible Forced Outage of Hyland LFGE in the current/ongoing Short-Term Assessment of Reliability (STAR), which is the 2025 Quarter 3 Short-Term Assessment of Reliability (STAR). The 2025 Q3 STAR Start Date was July 15, 2025.
