

Business Issues Committee
November 9, 2021
Agenda #5

| Revised

Motion:

The Business Issues Committee (“BIC”) hereby recommends that the Management Committee (“MC”) approve changes to the Installed Capacity market buyer-side mitigation rules, Installed Capacity market capacity accreditation rules, and certain other Installed Capacity market procedures as more fully described in the presentation “Comprehensive Mitigation Review” made to the BIC on November 9, 2021. With respect to implementing changes to the Installed Capacity market capacity accreditation rules, a three-phase approach is described in the aforementioned presentation, and the BIC recommends that the MC direct the NYISO to pursue the additional phases related to the more detailed procedures for such changes in collaboration with stakeholders prior to implementation thereof.
