

# Monthly Report

August 2005

John Buechler

## TABLE OF CONTENTS

1.	Market Operation's Report
2.	Daily Loads
3.	Budget Summary
4.	Project Status Report
5.	Regulatory Filings

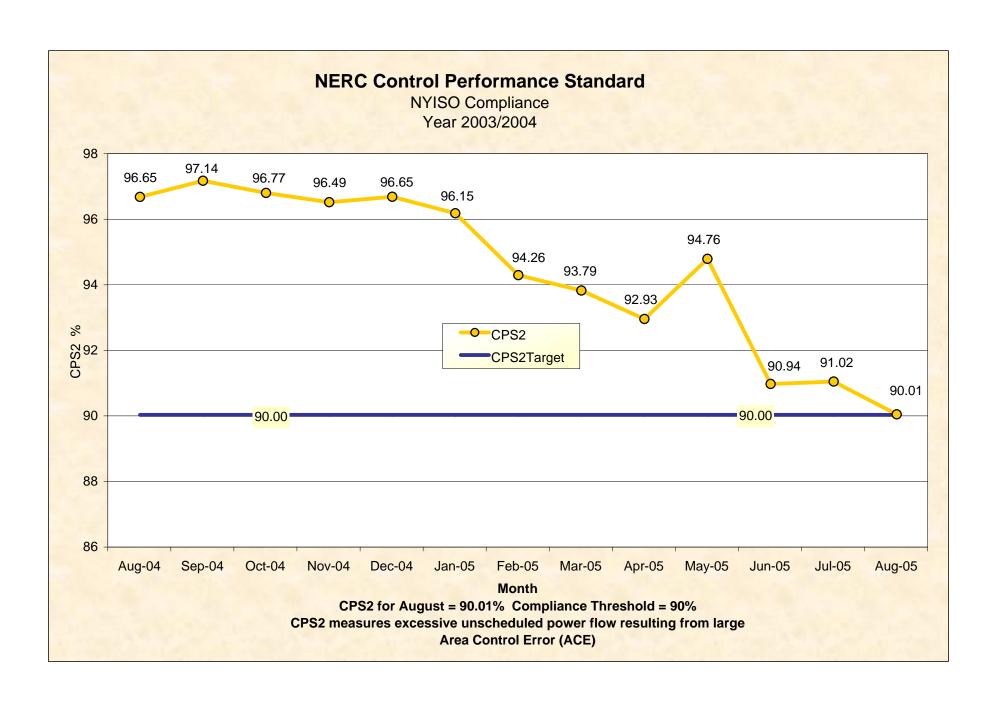

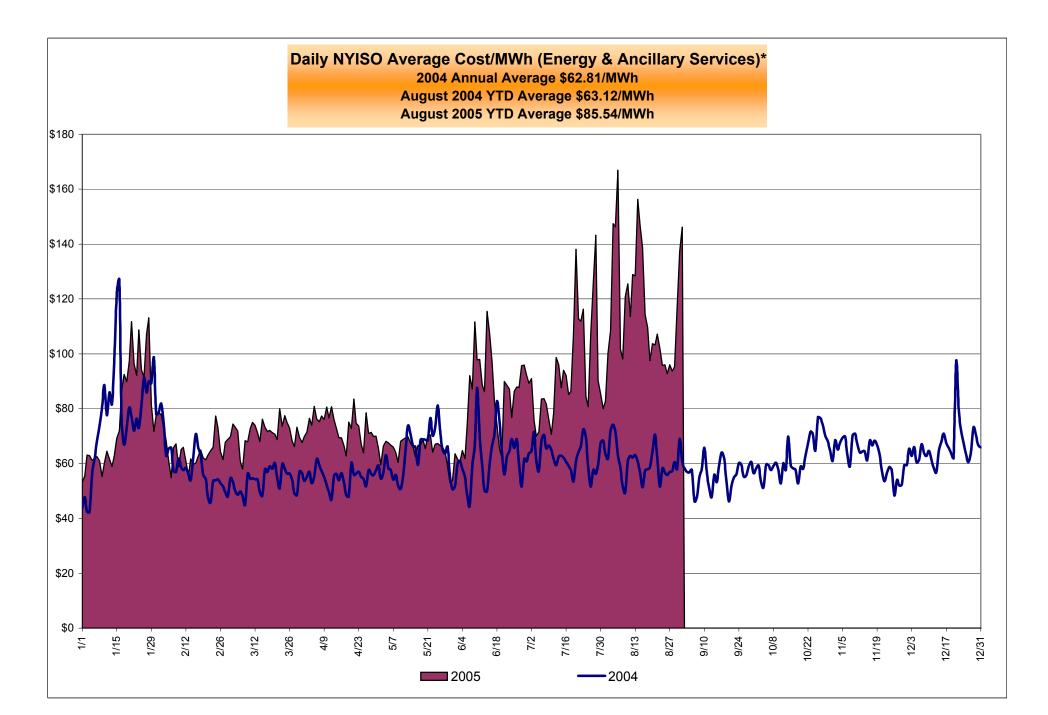

# Market Performance Highlights for August 2005

- NYISO LBMP, Uplift and Average Cost have increased this month relative to July
  - LBMP for August is \$115.20/MWh, up from \$92.41/MWh in July
  - Average cost is \$119.56/MWh, up from \$96.21/MWh in July
- Fuel prices have continued to increase this month
  - Kerosene is \$14.17/mmBTU, up from \$12.56/mmBTU in July
  - No. 2 Fuel Oil is \$12.82/mmBTU, up from \$11.68/mmBTU in July
  - Natural Gas is \$10.32/mmBTU, up from \$8.24/mmBTU in July
  - No. 6 Fuel Oil is \$9.07/mmBTU, up from \$7.88/mmBTU in July
- Uplift has increased this month
  - Uplift (not including NYISO cost of operations) is \$2.86/MWh, up \$0.43 compared with August 2004's \$2.43/MWh and up \$0.94 compared to July's \$1.92/MWh

# Market Performance Highlights for August 2005 (continued)

- We continue to see high volatility in Real Time prices (RTD)
  - The standard deviation of real time prices is \$130.69 compared to \$72.95 for July 2005

<sup>\*</sup> Excludes ICAP payments

Market Monitoring Prepared: 9/9/2005 14:45

Market Monitoring Prepared: 9/9/2005 14:45

<sup>\*</sup> Excludes ICAP payments

DAM Contract Balancing amounts are for payments made to generating units to make them whole for being dispatched below their Day-Ahead schedule, as a result of out-of-merit dispatches.

DAM Bid Production Cost Guarantees for Virtual Transactions are included in the chart and are shown from the inception of Virtual Transactions. These values are small and cannot be identified on the chart.

DAM residuals are revenue charged or returned to customers due to the under or over collection of funds. On this chart, negative values represent funds returned to Transmission Customers (through Transmission Owners' Transmission Service Charges).

# Project Status Updates

**Prepared By:** 

NYISO Project Management September 2005

## Recent Project Releases – August 2005

#### RTD Pricing Enhancements / SMD 2.2

- Functionality: Modify RTD dispatch to allow 10 minute resources not committed to be scheduled, and minor enhancements.
- Deployed August 16, 2005

### Release Content – September 2005

#### > ICAP

- Functionality: An automated application to run the ICAP market. Application will allow market participants to enter bids and offers via the Web or upload templates
- Scheduled for deployment September 20, 2005 *schedule is under review*

# Release Content – September 2005

#### > 15 Minute Scheduling

- Functionality: Enhance SMD2 functionality to permit economic energy scheduling for units incapable of responding to five minute dispatch signals in the real-time market. This change will perform 15 minute economic dispatch for nominally offdispatch units during the Real Time Commitment execution and reflect those schedules into the Real-Time dispatch process.
- Deployment scheduled September 20, 2005 schedule is under review

#### > DSS

- Functionality: Custom Automated Data Delivery (CADD) -Provide users with the ability to get specific DSS data elements of interest and have the data delivered via a machine-tomachine process. Users can create custom-defined reports that can be refreshed and retrieved on a recurring basis via the ADD.
- Deployment scheduled September 20, 2005

### October 2005 Release Content

#### Rate Schedule 1

- Functionality: Implementation of Billing and Accounting System (BAS), software changes to facilitate the automatic calculation and allocation of LSE and Power supplier Rate Schedule #1 charges in BAS.
- Deployment scheduled for October 11, 2005.

#### > NTAC / TSC

- Functionality: Automation of manual processes within settlements. Develop interface for MP's to enter TSC and NTAC Rates. Delivery includes a BAS – NTAC interface, consolidated invoice, allocation adjustment tool, Web interface and distribution factor process.
- Deployment scheduled for October 11, 2005.

## Release Content – October 2005

### Start Up / Shut Down

- Functionality: The creation of a manual NYISO process, which will allow generators to designate when they are in start up / shut-down mode. This would allow the unit from being subject to performance penalties and would be paid the real time LBMP for all energy produced during the start up / shut down period.
- New Process to be implemented October 2005

# Release Content - November 2005

#### > Intranet

- Functionality: Standardization of the NYISO intranet site. The Documentum application will be utilized to address publishing content management. This project will also eliminate legacy technology currently in place.
- Deployment scheduled for December 2005

# Release Planning Calendar

			NYIS	SO Project	Planning	Calendar	
Project	Sep	Oct	Nov	Dec	Jan	Feb	Project Phase / Comments

SMD Feature Extensions (SMD 2.2)		\$0.0	\$0.0	\$0.2	\$0.7	\$0.9	\$0.9
E-Tagging 2.0	<u>\$0.0</u>	<u>\$0.0</u>	<u>\$0.0</u>	<u>\$0.2</u>	<u>\$0.6</u>	<u>\$0.8</u>	<u>\$0.8</u>
Total – Projects (excluding New Building Acquisition)	\$6.6	\$8.0	\$14.6	\$5.8	\$8.9	\$14.7	\$0.1

P	roject Description	Status and Milestone Deliverables
	Billing System Corrections (Baseline)	Status: Billing system problem resolution continues on a regular basis by a dedicated team of development staff. Onc identified, billing issues are reviewed, solutions are designed, and fixes are applied at the first feasible deployment opportunity.  Deliverables: The NYISO has allocated a team of development and analyst staff to investigate all reported billing problems, design solutions to correct known issues, and implement fixes in order to provide the most accurate settlements possible.
A636	Billing Rate Schedule 1 Allocation 80/20	Status: Functional Requirement Specification completed on March 15 <sup>th</sup> . Design and Development have been completed, testing in progress. Deployment date has been moved to October 11, 2005.  Deliverables: Implementation of Billing and Accounting System (BAS), software changes to facilitate the automatic
A716	Billing: NTAC & TSC Rate Management	calculation and allocation of LSE and Power supplier Rate Schedule #1 charges in BAS.  Status: Functional Requirement Specification completed April 30, 2005. Design specification completed August 1 <sup>st</sup> . Th deployment schedule has been changed. Original schedule was for a September deployment; however, after assessing project schedule NYISO is moving deployment date to October 11, 2005.  Deliverables: Modification of BAS software to eliminate fees (TSC charges to TO's and NTAC charges by NYPA) between NYISO and ISO-NE, which are due to be billed beginning of December 2004. Develop interface for MP's to enter TSC and NTAC Rates. Automation of manual processes within settlements. Delivery includes a BAS – NTAC interface, consolidated invoice, allocation adjustment tool, Web interface and distribution factor process. Modify TSC calculator to use newly created summary and detail pages. Modifications for TSC MW reporting to transaction customers on hourly statement.
A799	Billing Simulator - BAS Replacement Strategy	Status: Vendors have been selected and development is in progress to deliver use case functionality. Multiphase deliverables are planned. Functionality is to be deployed to production June through December, 2005. June deployment is planned for June 30, 2005. This includes delivery of phase I use case functionality. First phase deliverables included 28 use cases. 27 out of 28 were delivered by June 30, 2005. Second phase planning includes implementation on an additional 34 use cases. Development has completed on Phase 2 use cases and QA testing is currently taking place with a target completion date of 9/5. Phase 3 use cases have been documented and reviewed, development to began on Phase 3 use cases, August 22nd.  Deliverables: Continuation of development and enhancements to the current system. Implementation of remaining
A795	DSS - Customer Settlement	settlement rules (SMD2 and legacy), and build foundation for potential BAS replacement. Design, develop and implement remaining use cases (approximately 100) into a production environment by December 31, 2005.  Status: 3 <sup>rd</sup> Quarter release is in development and is on-target for September 20, 2005.  Deliverables: DSS has multiple releases planned for this year.  March - Phase I FERC EQR (completed). Reporting to help MP's obtain NYISO data to include as part of their filing to FERC. In this release, the NYISO will provide the mechanism to download the report, existing data elements in the DSS

Pr	roject Description	Status and Milestone Deliverables
		Planned Business Objects upgrade will be deployed at a later date due to vendor bug issues discovered in testing and not yet resolved.  *April - Business Objects upgrade (completed).  *May - Provide enhanced reporting capability related to Controllable Tie Lines. (completed)  *June - Modify sign of data elements in the DSS to be consistent with NYISO sign convention. This will help MP's tie ou DSS reporting to invoices. FERC Reporting phase II to provide additional manual adjustment and data elements.  *Minor application enhancements, bug fixes, and internal process improvement (ETL Production Verification Automation will also be bundled into this release.  *August - Provided enhancements related to BIG issues.  *September* release - Custom Automated Data Delivery (CADD) - Provide users with the ability to get specific DSS data elements of interest and have the data delivered via a machine-to-machine process. Users can create custom defined reports that can be refreshed and retrieved on a recurring basis via ADD.
		**note some of the listed functionality is from baseline budget
A541	TCC Online Auction Automation	<b>Status:</b> The requirements generation for the TCC Auction Automation project was partially completed in 2004, following the review of the TCC auction processes performed by Bearing Point. The requirements process is being revisited in order to ensure that the recommendations that were presented can be fully incorporated in the delivered product. Requirement validation phase is underway following a planning kick-off held in early February. The kick off encompassed a short term (8 week) plan. An RFI/Vision document, straw man timelines, and executive summary with detail to determine the 'buy v. build' strategy was completed. Currently developing detailed requirements and planning deliverables. The Awards processing is the planned first phase deliverable. NYISO is finalizing the plan and time fram and is tentatively scheduling delivery for January 2006. The Discovery/Vision document has been delivered to the business owner(s) for their approval, approximately 35% of the use cases have completed Business Requirements and System Design has begun.
		The data validation tool effort continues (38 validation tools have been implemented.)  Deliverables: This project will take a phased approach to fully automate the TCC auction and data validation processes. Early phases will produce a set of data validation tools that will compliment the current processes. Final delivery will produce user interfaces that can support the online data entry, reporting of TCC auction information, and provide auction data to the auction analysis products. It is anticipated this project will continue into 2006.
A543	ICAP Market Automation	<b>Status:</b> Verification testing in progress by Auxiliary Market Operations. Deployment targeted for <i>September 2005</i> . Schedule was adjusted to address Market Participant sandbox testing, and two (2) market trials. Market Trials started June 9 and ended on August 12. Technical Conferences were held on March 21, 2005 and May18, 2005. A third Technical Conference is scheduled for September 15 2005 in preparation for Deployment. Some risk to project schedule to delay deploying code to staging environment for final phase of testing. July deployment delays, caused by pea operating conditions, for RTD pricing may affect September deployment date. Schedule in under review.

P	roject Description	Status and Milestone Deliverables
		<b>Deliverable:</b> An automated application to run the ICAP market, also implementing a security model for single sign-on. Allow Market Participants to place bids and offers via the web or upload templates, execute the monthly and strip auctions, perform certification, run the spot auction and post the results and bills.
	64 15 Minute Scheduling	<b>Status:</b> Development completed and code was delivered by vendor on May 31, 2005. Release deployment was rescheduled from June to September to allow for an eight week testing cycle. Testing is in progress with no major issues to report. July deployment delays, caused by peak operating conditions, for RTD pricing may affect September deployment date. Schedule is under review.
A764		<b>Deliverable:</b> FERC mandated feature required to be implemented within 150 days of SMD go live date. This project will offer Market Participants more flexibility with their Real Time Bid Management, and enhance SMD2 functionality to address the loss of price chasing capability of units incapable of responding to five minute dispatch signals. The new software will perform 15-minute economic dispatch scheduling for nominally off-dispatch units during the Real-Time Commitment (RTC) execution and reflect those schedules into the Real-Time Dispatch (RTD) process.
A769	Scheduling of Combined Cycle Units	Status: This project is in the concept development phase.  Deliverables: Market Participants have historically expressed concern that NYISO does not model or schedule combined cycle generating units to their most efficient capabilities, thus impacting both real-time operations and market outcomes. This project will deliver a scheduling software solution and network modeling optimization for combined cycle generating units. Software will perform 15-minute economic dispatch scheduling for nominally off dispatch units during the real-time commitment execution and reflect those schedules into the real-time dispatch process.
	Consolidate NYISO Offices	<b>Status:</b> The NYISO closed on the Phoenix building on 7/8/05. AIA Contracts were signed with the AE and CM on 8/8/2005. Weekly project meetings are held with the AE, CM and NYISO project team to maintain a detailed Task List in support of the 4 <sup>th</sup> floor migration Project Plan. Installation of the gig ring and fiber channel telecommunications ring were ordered in May and are on schedule to be completed in mid October. A furniture vendor has been selected with unit prices for the furniture locked in for the duration of the project. A detailed layout of the furniture requirements for the 4 <sup>th</sup> floor has been completed, with the 4 <sup>th</sup> floor furniture scheduled to be ordered the week of 8/15/05. The migration onto the 4 <sup>th</sup> floor is expected to take place during the month of December.
A775		The development of a Data Center and Control Room migration plan has started and is expected to be completed by October 31, 2005.
		Milestones: July 8, 2005 Close on the building (completed); November, 2005 Completion of 4th floor renovations; December 31, 2005 Migration out of Washington Avenue and onto the 4th floor of the new HQ building.
		Deliverables: This project seeks to secure during 2005 ~150,000 square feet of office space to include administrative

Pı	roject Description	Status and Milestone Deliverables
		offices, alternate control center and back-up IT/disaster recovery functionality. During 2006, this facility would replace the current NYISO locations at Washington Avenue, Wolf Road, and Western Turnpike.
	Web Consolidation	<b>Status</b> : Functional Requirement completed July 19 <sup>th</sup> . Design specification is scheduled for completion August 29 <sup>th</sup> , a December deployment is planned.
$\Delta \times / \mathcal{A}$	(Intranet)	<b>Deliverables:</b> The next phase of the project addresses development of a standardized NYISO intranet site. The Documentum application will be utilized to address publishing standardized content management for both internal an external documents. This project will also eliminate legacy technology currently in place.
		Status: This project is being addressed in phases with the Web Consolidation projects.
A771	Documentum Expanded Implementation	<b>Deliverables</b> : NYISO has a growing number of critical business documents, which are information assets and need be managed as such. Documentum provides the tools to manage these critical documents. In addition, documentum can satisfy the demand for increased efficiency, quality and control in the document life cycle process through an enterprise-wide repository for all documents, automation of life cycle processes, document retention/archival, and SA 70 compliance requirements. Documentum will provide a number of key functionality including: version control, workflow, check-in/out, document level security, full text search, and e-mail integration and tracking.
		<b>Status:</b> The FRS is being finalized and sign-off is expected in the next couple of weeks. Project schedule is being finalized and currently risk, quality, and training impacts are being assessed.
A824	Start-Up/Shut-Down Tagging	<b>Deliverables:</b> The creation of a manual process, which would allow generators to designate when they are in start-up/shut-down mode. This would allow the unit from being subject to performance penalties and would be paid the r time LBMP for all energy produced during the start-up/shut down period.
		Completed
	RTD Pricing	<b>Status:</b> Project was successfully deployed into production on Tuesday, August 16, 2005 after several attempts wer cancelled due to system compromising weather conditions.
A821	1 Enhancements / SMD 2.2	<b>Deliverables:</b> Deliverables include remaining critical and high System Problem Reports (SPRs) as well as an enhancement to software for RTD pricing.
A658	Facilitated Transaction Check	<b>Status:</b> The deployment was rescheduled from June 29, 2005 to July 5, 2005 due to system conditions. Software v successfully deployed on July 5, 2005. Post deployment verification process is underway.
AUJU	Out	<b>Deliverables:</b> Further implementation of the Facilitated Transaction Check Out Web Service. This will allow NYISO Operations to view transaction data from other control areas during the check out process.
	SMD 2.1	Status: Deployed May 31, 2005.

Р	roject Description	Status and Milestone Deliverables
		<b>Deliverables:</b> Following the implementation of SMD2 and its suite of applications, it is expected that a subset of planned functionality will fail to make the initial release. Included in this feature set is the original project Phase2b and Phase 3 features; these items are SMD2 post-live requirements as defined.
A780	e-Tagging 2.0	<b>Status:</b> The deployment was rescheduled from June 28, 2005 to July 5, 2005 due to system conditions. Software was successfully deployed on July 5, 2005. Post deployment verification process is complete.
		<b>Deliverables:</b> Provide more flexibility in approval / denial of E-Tag requests. Prevent MIS bids with "Phantom" TagID's from flowing if not created by T-20.
		Status: Deployed May 31, 2005.
A619	Controllable Tie Lines Scheduling & Pricing	<b>Deliverables:</b> This project will provide an external proxy bus representation for controllable tie lines (HVDC and/or PAR) which span two control areas. The project addresses both the external node pricing calculations as well as scheduling of primary and secondary party transactions. It also includes additional changes necessary for NY/NE coordination for the Cross Sound Cable project.
		<b>Status:</b> Technical components deployed on <i>April 26, 2005</i> . Site cut over completed May 24, 2005.
A699	Web Consolidation / Market Data Exchange (Portal)	<b>Deliverables:</b> Primary deliverable is to combine the existing two NYISO web sites. (MDEX.com and NYISO.com) Also enhancing Web publishing functionality and migrating to standardized security. Additional Portal release will be scheduled in 2005.
4570		Status: SMD2 was deployed on 02/01/2005
A573 A574 A577	SMD 2.0	<b>Delivery:</b> SMD2's EAI monitoring solution is supporting SMD parallel operations, allowing proactive management of EAI processes in the SMD2 production environments. The second phase of the monitoring solution (enhanced reporting for computer operators).
		Status: Completed. November 2004
A757	Billing: TCC Settlement	<b>Deliverables:</b> This project provides for changes to the BAS to allow for calculation and billing of settlements associated with TCC surcharges and tracking of working capital accounts as required in the TCC Settlement Agreement approved by FERC in July 2004.
		To be Scheduled
A767	MIS Enhancements: Comprehensive Bid Management System	Status: This project has not yet started.  Deliverables: This project will upgrade the web-based application structure to replace overlapping applications by
A770	Outage Schedule Reporting	allowing common components to support current application functionality and future application functional growth.  Status: This project has not yet started.

_ Pr	oject Description	Status and Milestone Deliverables
		<b>Deliverables:</b> The Outage Scheduling software was moved entirely to the Ranger system for both Scheduling and Operations to provide consistency. Due to the timeframe for the SMD2 project, the processes of creating the Outage Schedule reports on the primary database was left on a secondary database. The creation of the required reports needs to be ported to the RANGER system as intended.
A766	Self Supply of Reserves	Status: This project has not yet started.  Deliverables: FERC has ordered that the NYISO markets be expanded to provide a mechanism for Market Participants to self-supply for reserves. Project will need to be readdressed later in the year.
A706	Intra-Hour Transaction Scheduling (a.k.a. VRD)	Status: This project has not yet started.  Deliverables: In 2005, NYISO will conduct a pilot project to assess the ability to evaluate and schedule intra-hour transactions and to identify any operational issues with scheduling. Additional work in 2005 will be based on the outcome of the pilot program, however, it is not expected that any significant software development will be completed in 2005.

#### **NYISO REGULATORY FILINGS – AUGUST 2005**

Aug. 1, 2005	NYISO filing of a report on the results of the stakeholder review process regarding whether a change in the ICAP Demand Curves is warranted by the capacity data in the 2005 Gold Book (ER05-428-000)
Aug. 1, 2005	NYISO filing for informational purposes of a notice of the effective date regarding the real time remedy (ER05-1123-001)
Aug. 1, 2005	NYISO compliance filing of its sixth biweekly informational report addressing price and software corrections (ER04-230-009)
Aug. 4, 2005	NYISO section 205 filing of revisions to its Services Tariff regarding exempting certain Generators from undergeneration penalties during start-up and shutdown periods (ER05-1291-000)
Aug. 4, 2005	NYISO section 205 filing of proposed revisions to its OATT tariff concerning transmission facilities related to interconnection projects (ER05-1290-000)
Aug. 5, 2005	NYISO and NYTO joint compliance filing regarding conforming revisions to OATT Attachment X to comply with Order No. 2003-C (RM02-1-006, ER05-1296-000)
Aug. 8, 2005	NYISO compliance filing of its fourth quarterly report on enhanced combined cycle modeling (ER03-230-012, ER01-3155-010, ER01-1385-019, EL01-45-018)
Aug. 11, 2005	Third party filing of a protest filing regarding NYISO's 7/21/05 report on settlement and customer credit policies (ER03-552-011, ER03-984-009)
Aug. 11, 2005	Third party filing of a motion to intervene and comments regarding NYISO's 7/27/05 filing on residual transmission congestion contract (EL05-137-000, EL04-110-003, EL04-113-003, EL04-115-005)
Aug. 11, 2005	NYISO informational notice filing regarding NYISO's Order No. 2006 concerning the standardization of small generator interconnection procedures (RM02-12-000)
Aug. 12, 2005	NYISO filing of a response to FERC's 7/13/05 deficiency letter concerning NYISO's 6/1/05 demand side resource filing (ER04-230-010)
Aug. 12, 2005	NYISO filing of a motion to intervene in the NYDPS proceeding regarding generation retirement (Case 05-E-0889)
Aug, 15, 2005	NYISO compliance filing of its seventh biweekly informational report addressing price and software corrections (ER04-230-009)
Aug. 15, 2005	NYISO filing of comments in response to FERC Notice of Inquiry regarding generator run status information (RM05-16-000)

Aug. 16, 2005	NYISO filing of an informational notice regarding implementation of software enhancements to reduce price volatility in the real time market (ER05-1123-001)
Aug. 16, 2005	NYISO filing of a request for expedited action for tariff waivers and for authorization to recalculate previously assessed persistent undergeneration charges (EL05-144-000)
Aug. 16, 2005	NYISO joint filing with ISO/RTO council of comments in response to FERC Notice of Inquiry regarding generator run status information (RM05-16-000)
Aug. 16, 2005	NYISO filing of a report regarding its use of the 97 <sup>th</sup> percentile virtual transactions credit requirements (ER05-941-001)
Aug. 18, 2005	NYISO compliance filing to add a new defined term "Minimum Generation Level" to its OATT and Services Tariff (ER05-1123-001)
Aug. 23, 2005	Multiple third party joint filing of comments supporting NYISO's conclusion that a change in the ICAP Demand Curves is not warranted by the capacity data in the 2005 Gold Book (ER05-428-000)
Aug. 25, 2005	Third party filing of comments in support of Strategic Energy's protest regarding settlement and customer policies (ER03-552-011)
Aug. 26, 2005	NYISO filing of an answer to Strategic Energy's protest of NYISO's filing regarding settlements and customer credit policies (ER03-552-011, ER03-984-009)
Aug. 26, 2005	NYISO joint filing with the ISO/RTO Council of comments regarding the accounting and financial reporting for public utilities FERC NOPR (RM04-12-005)
Aug. 29, 2005	NYISO compliance filing of its eighth biweekly informational report addressing price and software corrections (ER04-230-009)
