5.	Regulatory Filings

Market Performance Highlights for February 2006

- NYISO LBMP and Average Cost have decreased this month relative to January 2006.
 - LBMP for February is \$71.85/MWh, down from \$77.14/MWh in January.
 - Average cost is \$75.10/MWh, down from \$79.46/MWh in January.
 - Both Day Ahead and Real Time LBMPs have decreased this month.
- Fuel prices are all down this month.
 - Kerosene is \$13.02/mmBTU, down from \$13.78/mmBTU in January
 - No. 2 Fuel Oil is \$11.72/mmBTU, down from \$12.47/mmBTU in January
 - Natural Gas is \$8.63/mmBTU, down from \$9.43/mmBTU in January
 - No. 6 Fuel Oil is \$7.98/mmBTU, down from \$8.47/mmBTU in January
- Uplift has increased this month relative to January 2006.
 - Uplift (not including NYISO cost of operations) is \$0.37/MWh, up from \$(0.07)/MWh in January. This is primarily due to changes in residual costs.
- Regulation prices in all markets have increased this month relative to January.

^{*} Excludes ICAP payments.

Market Monitoring

Prepared: 3/8/2006 11:15 4-A

Market Monitoring Prepared: 3/8/2006 11:15

^{*} Excludes ICAP payments.

DAM Contract Balancing amounts are for payments made to generating units to make them whole for being dispatched below their Day-Ahead schedule, as a result of out-of-merit dispatches.

DAM Bid Production Cost Guarantees for Virtual Transactions are included in the chart and are shown from the inception of Virtual Transactions. These values are small and cannot be identified on the chart.

DAM residuals are revenue charged or returned to customers due to the under or over collection of funds. On this chart, negative values represent funds returned to Transmission Customers (through Transmission Owners' Transmission Service Charges).

^{*} Effective November 2005 codes 81305 and 81312 have been re-categorized from BPCG Balancing to Residuals Balancing so as to better reflect their uplift type (see 4-AF). All months have been adjusted accordingly.

⁺ Balancing Energy: Load(MW) purchased at Real Time LBMP.

Notes: Percent totals may not equal 100% due to rounding.

Virtual Transactions are not reflected in this chart.

^{*} The signs for the detail section intuitively reflect the direction of power flow eliminating the use of double negatives when Balancing Energy is negative.

	Description	Status and Milestone Deliverables		
	Energy Marketplace	Product Enhancements Character This product is in the connected development who are and will be formable in the first half of 2007		
A767	MIS Enhancements: Comprehensive Bid Management System	Deliverables: This project is in the concept development phase and will be formally initiated in the first half of 2006. Deliverables: This project will upgrade the web-based application structure to replace overlapping applications by allowing common components to support current application functionality and future application functional growth. One of the deliverables will be the implementation of a more flexible and reliable application infrastructure for the market applications. This project is part of a multi-year effort that will lead to a replacement of the Market Information System (MIS) and related bidding and scheduling applications.		
	Enhanced Price Validation	Status: This project is in the concept development and requirements phase. Concept and design work will continue through the first quarter of 2006; development progress will be dictated by various factors including regulatory process, technical feasibility, and resource constraints. A detailed project scoping exercise has been completed, with cost estimates broken down by phase and feature.		
TBD		Deliverables: The NYISO has investigated all known causes of pricing errors, and has taken a systematic approach to determine features and functions that can significantly enhance the price validation process. Product enhancements are proposed to implement proactive price monitoring, improved price reservations, and enhanced price corrections. The project will entail a multi-phase, multi-year implementation of tools to enhance the price monitoring, reservation, and correction processes for the NYISO markets.		
	Enhanced Scheduling of Combined Cycle Units	Status: This project is in the concept development phase. Concept and design work will continue in 2006; development progress will be dictated by various factors including, regulatory process, technical feasibility, and resource constraints.		
A769		Deliverables: Market Participants have historically expressed concern that NYISO does not model or schedule combined cycle generating units to their most efficient capabilities, thus impacting both real-time operations and market outcomes. This project will deliver a scheduling software solution and network modeling optimization for combined cycle generating units. Software may perform 15-minute economic dispatch scheduling for nominally off dispatch units during the real-time commitment execution and reflect those schedules into the real-time dispatch process.		
A70/	Intra-Hour Transaction Scheduling (ITS)	Status: This project is in the concept development phase. Concept and design work will continue in 2006; development progress will be dictated by various factors including, regulatory process, technical feasibility, and resource constraints.		
A706		Deliverables: In 2005, the NYISO conducted a pilot project to assess the ability to evaluate and schedule intra-hour transactions and to identify any operational issues with scheduling. Additional work in 2006 will be based on the outcome of the pilot program, however, it is not assured that any significant software development will be completed in 2006.		

Description		Status and Milestone Deliverables
TBD	Wind Forecasting	Status: This project is in the concept development phase. Concept and design work will continue in 2006; development progress will be dictated by various factors including, regulatory process, technical feasibility, and resource constraints. Deliverables: Design and implementation of the required forecasting systems that would be necessary to efficiently and reliably manage the introduction of significant amounts of intermittent energy sources in New York.
	ICAP Marketplace P	roduct Enhancements
A543	ICAP Market Automation – Phase I	Status: Verification testing by Auxiliary market operations and market trials by Market Participants were completed in 2005. Parallel testing of all the features has been ongoing since the 4 th quarter of 2005. Full deployment and activation of the project is on schedule for March 2006.
7.6 16		Deliverable: An automated application to run the ICAP market, also implementing a security model for single sign-on. Allow Market Participants to place bids and offers via the web or upload templates, execute the monthly and strip auctions, perform certification, run the spot auction and post the results and bills.
TBD	ICAP Auction Automation – Phase II	Status: This project is in a preliminary planning phase and will be formally initiated in 2006, following the successful deployment of phase 1 and subsequent post-deployment review of ICAP market operations. Deliverables: Following the implementation of the first phase of the ICAP Auction Automation software project, a certain subset of enhancements are planned to complete the full suite of planned features.
	TCC Marketplace Pro	oduct Enhancements
	•	Status: The testing process for the first phase of the TCC Auction Automation project is well underway. The Awards processing is the planned first phase deliverable. Following phases will address the database and Bidding functions required to fully automate the auction processes. Testing is proceeding well; deployment is scheduled for the 2 nd quarter of 2006.
A541	TCC Auction Automation – Phase I	Deliverables: This project will take a phased approach to fully automate the TCC auction and data validation processes. Preliminary phases produced a set of data validation tools that compliment the current (manual) processes. Final delivery will produce user interfaces that can support the online data entry, reporting of TCC auction information, and provide auction data to the auction analysis products. It is anticipated this project will continue into 2007.

Description		Status and Milestone Deliverables
TBD	TCC Auction Automation – Phase II & III	Status: This project is in a preliminary planning phase and will be formally initiated in 2006. Detailed requirements development has been ongoing; facilitation is being performed by software vendor (Nexant). Deliverables: Following the implementation of the first phase of the TCC Auction Automation software project, following phases will deliver the Database and Bidding functionality required to fully automate the TCC markets.
	Operations and Relia	ability Product Enhancements
	•	Status: This project is in a preliminary planning phase and is planned to be formally initiated in 2006.
A770	Outage Schedule Reporting	Deliverables: As part of the SMD2 project, the Outage Scheduling software was moved entirely to the Ranger system for both Scheduling and Operations to provide consistency. However, he processes of creating the Outage Schedule reports remains on a secondary database. The creation of the required reports will be ported to the RANGER system.
		Status: This project is in a preliminary planning phase and is planned to be formally initiated in 2006.
A843	Integration of OOM and SRE Applications	Deliverables: Replacement of the Out of Merit (OOM) and Supplemental Resource Evaluation (SRE) applications used by the control room floor. These applications are currently built upon an unsupported platform (Oracle Forms) and can be design to be more efficient and error prone if they are consolidated into a single suite of application functions.
	Financial Service Pro	
A845	BAS Replacement / Billing Engine	Status: This project is in the detailed requirements phase; some components have progressed into development and unit testing. An iterative development approach is being employed where groups of the billing rules are being ported to the new engine in phases. The project is on schedule, with deployment readiness planned in the 4 th quarter of 2006. Deliverables: Implementation of a rules-based design as a replacement to the settlements engine in the Billing and Accounting System (BAS). Project will leverage technology investment made as part of the Billing Simulator and will lead to a higher performing calculation engine for billing, as well as a more flexible architecture for managing future changes to the settlements processes. This project is part of a multi-year effort to replace the entire billing system including, the invoicing components, web-based reconciliation, and integration of certain credit functions.
		Status: This project is in the development phase; deployment is planned for mid-2006.
A836	Automation of Voltage Support Service (VSS) Payments	Deliverables: Automation of a manual settlements' process. This effort is part of a larger effort to reduce and / or eliminate the need to perform manual billing adjustments on customer invoices. Opportunities will be explored through the year to determine additional automation features that can be implemented, and those projects will be individually presented as they are launched.

	Description	Status and Milestone Deliverables
	Business Intelligence	e Product Enhancements
		Status: This project is in the final activities within the detailed requirements phase. Phased deliveries are scheduled to provide functionality in 2 nd and 3 rd quarters of 2006.
A849	DSS Pricing and Operational Data Mart	Deliverables: During recent years, the NYISO has made a significant investment in data warehousing technology through the implementation of the Decision Support System (DSS) to support the NYISO settlements processes. This project will expand the DSS customer base by delivering pricing data that will support the price validation processes and provide greater transparency to the NYISO markets.
	Enhanced Portal Dashboards	Status: This project is in a preliminary planning phase and is planned to be formally initiated in 2006.
TBD		Deliverables: Enhancements made to the NYISO Portal platform to support the implementation of the new data elements available through the Decision Support System (DSS), as well as improved reporting functionality to augment a wide variety of data supplied through this mechanism. Initial focus will be applied to the pricing and operational data capabilities.
	Other NYISO Key Pro	ojects
	Consolidate NYISO Offices	Status: Personnel relocation activities have completed that enabled the NYISO to vacate the Washington Avenue facility and fully occupy the 4 th floor of the new Head Quarters facility. The Phoenix Company employees have vacated the remaining floors of the new building; planning phases are underway for NYISO construction of floors 1-3.
A775		Deliverables: This project seeks to secure ~150,000 square feet of office space to include administrative offices, alternate control center and back-up IT/disaster recovery functionality. During 2006, this facility would replace the current NYISO locations at Washington Avenue, Wolf Road, and Western Turnpike.

NYISO REGULATORY FILINGS – FEBRUARY 2006

Feb. 2, 2006	Multiple third party filings of motions to intervene and comment regarding NYISO's third annual compliance report on implementation of the ICAP Demand Curve and Withholding Behavior under the ICAP Demand Curve (ER03-647-008)
Feb. 2, 2006	NYISO filing on behalf of LIPA regarding revisions to LIPA's Transmission Service Charge rate shown in OATT Attachment H (ER06-605-000)
Feb. 2, 2006	NYISO filing of original signature page of affidavits for NYISO's 1/31/06 compliance report filing demonstrating the inadequacy of a one-day multiplier in the formula used to calculate collateral requirements for virtual transactions (ER05-941-006)
Feb. 6, 2006	NYISO filing of response to 1/6/06 request for data request regarding NYISO 11/8/05 regarding report of implementations on market mitigations measures (ER06-185-000)
Feb. 7, 2006	Multiple third party filings of motions to intervene and protest regarding NYISO's 1/23/06 request for tariff waiver and expedited action concerning NYISO's cost allocation process for interconnection projects (ER06-558-000)
Feb. 8, 2006	NYISO filing of its Sixth Quarterly Report regarding progress toward changes to software modeling requirements and market rules for improved utilization of combined cycle units (ER04-230-022, ER01-3155-015, ER01-1385-024, EL01-45-023)
Feb. 8, 2006	NYISO filing of a report regarding tariff implementation errors and a request for approval of a proposed compensation methodology (ER06-617-000)
Feb. 10, 2006	NYISO filing of a request for an extension of time to respond to FERC's 1/27/06 deficiency letter regarding NYISO's black start and system restoration services (ER06-310-001)
Feb. 21, 2006	Multiple third party filings of motion to intervene and protest regarding NYISO's 1/31/06 collateral for virtual transactions filing (ER05-941-000)
Feb. 21, 2006	NYISO filing of a response to FERC's 1/27/06 deficiency letter concerning NYISO's filing regarding black start and system restoration services (ER06-310-000)
Feb. 23, 2006	NYISO filing of an answer to a third party protest regarding NYISO's 1/23/06 request for tariff waiver and expedited action concerning NYISO's cost allocation process for interconnection projects (ER06-558-000)
Feb. 24, 2006	NYISO and NYTO joint filing of a response to multiple third party protests of their joint wind energy interconnection compliance filing (ER06-506-000)
Feb. 27, 2006	NYISO filing of a request for an extension of time to submit a compliance report regarding demand side resources (ER04-230-010/014/019)

Feb. 28, 2006 NYISO filing of a demand side resource compliance report (ER04-230-010/014/019)

This list is current as of 11:01 A.M. February 28, 2006.

FERC ORDERS – FEBRUARY 2006

FERC order dismissing NIMO's complaint v NYISO and the NYS Reliability Council Feb. 2, 2006 regarding current practices pertaining to mandatory minimum ICAP requirements for the purpose of preserving reliable electric service throughout the NYCA (EL06-1-000) Feb. 10, 2006 FERC letter order accepting NYISO's 1/17/06 compliance filing of tariff revisions regarding ICAP demand curve parameters (ER05-428-006) Feb. 14, 2006 FERC letter order accepting a coordination agreement between ISO New England and NYISO including a rate schedule for emergency pricing (ER06-421-000) Feb. 14, 2006 FERC letter order accepting NYISO's request for an extension of time to respond to FERC's deficiency letter regarding NYISO's filing of proposed compensation provisions concerning Black Start and System Restoration Services (ER06-310-000) Feb. 23, 2006 FERC order concerning NYISO's 7/21/05 netting bilaterals compliance report and directing NYISO to file a timetable for the implementation of the netting of bilaterals project and the submission of quarterly status reports on progress to resolve outstanding issues (ER03-552-011) Feb. 27, 2006 FERC tolling order granting rehearing for further consideration regarding NYISO's proposed new collateral requirements for the virtual transactions market (ER05-941-003) Feb. 27, 2006 FERC order granting NYISO a one time waiver of certain OATT Attachment S provisions concerning the cost allocation process for new interconnection projects (ER06-558-000) Feb. 28, 2006 FERC letter order accepting for informational purposes the NYISO's 10/31/05 report on its plan and schedule for shortening time periods for posting notices of price corrections and for correcting prices under NYISO's Temporary Extraordinary Procedures, as well as phasing out TEP altogether

(ER04-230-021)
This list is current as of 9:40 A.M. March 1, 2006.
