Market Performance Highlights for March 2008

- LBMP for March is \$85.21/MWh, down from \$85.69/MWh in February 2008.
 - Average monthly cost is \$90.11/MWh, down slightly from \$90.75/MWh in February 2008.
 - Day Ahead LBMPs have increased from February 2008 while Real Time LBMPs have decreased.
- Average daily sendout is 432GWh/day in March, down from 455GWh/day in February 2008 and slightly lower than the March 2007 amount of 438GWh/day.
- Natural Gas prices are down and other fuels are up this month.
 - Kerosene is \$24.15/mmBTU, up from \$20.44/mmBTU in February.
 - No. 2 Fuel Oil is \$21.78/mmBTU, up from \$18.73/mmBTU in February.
 - No. 6 Fuel Oil is \$13.60/mmBTU, up from \$12.85/mmBTU in February.
 - Natural Gas is \$10.31/mmBTU, down from \$10.66/mmBTU in February.
- Uplift is down slightly compared to February 2008.
 - Uplift (not including NYISO cost of operations) is \$2.31/MWh versus \$2.57/MWh in February 2008.

* Excludes ICAP payments.

* Excludes ICAP payments.

These numbers reflect the rebilling of prior periods.

DAM Contract Balancing amounts are for payments made to generating units to make them whole for being dispatched below their Day-Ahead schedule, as a result of out-of-merit dispatches. DAM Bid Production Cost Guarantees for Virtual Transactions are included in the chart and are shown from the inception of Virtual Transactions. These values are small and cannot be identified on the chart. DAM residuals are revenue charged or returned to customers due to the under or over collection of funds.

Definitions

Alert State Declarations:

07 07 07 07 07

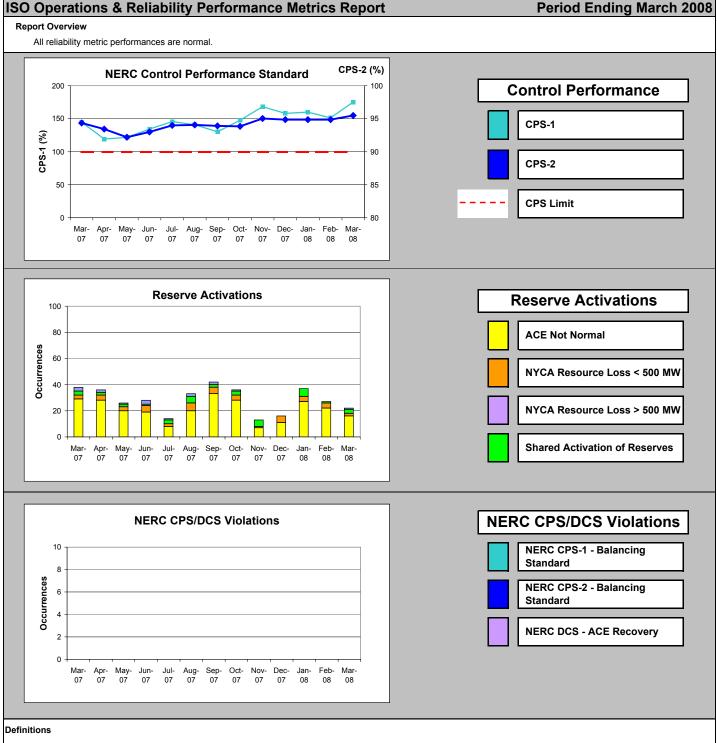

The number and causes of Alert State declarations reflect system operating conditions beyond thresholds associated with Normal and Warning States. Declaration of the Alert State allows the NYISO to take corrective actions not available in the Normal and Warning States.

Major Emergency State Declarations:

The number and causes of Major Emergency State declarations reflect system operating conditions beyond thresholds associated with the Alert State. Declaration of the Major Emergency State allows the NYISO to take agressive corrective actions not available in the Alert State.

NERC IROL/SOL Violations:

The number and causes of NERC IROL/SOL violations reflect system operating conditions beyond thresholds associated with applicable NERC reliability standards. The NERC IROL/SOL violation thresholds are higher than those defined for the Major Emergency State.

Control Performance Standards:

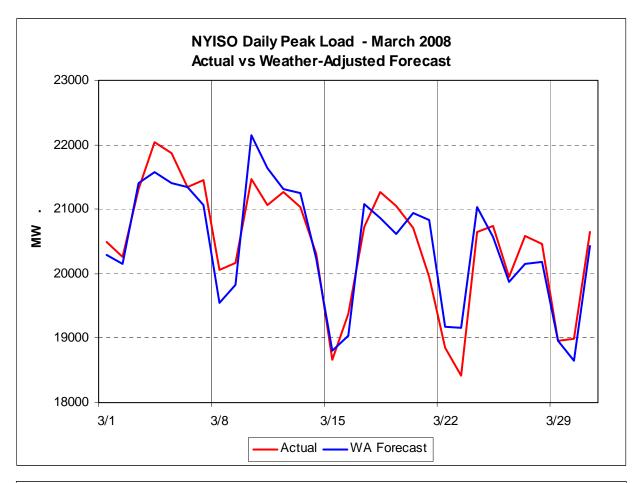

The values of NERC Control Performance Standards (CPS-1 and CPS-2) are indicators of the NYISO Area resource and demand balancing performance. Reserve Activations:

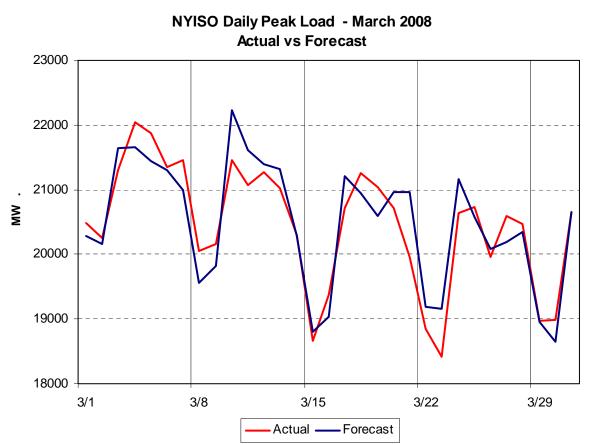

The number and causes of NYISO Reserve Activations are indicators of the need to respond to unexpected operational conditions within the NYISO Area or to

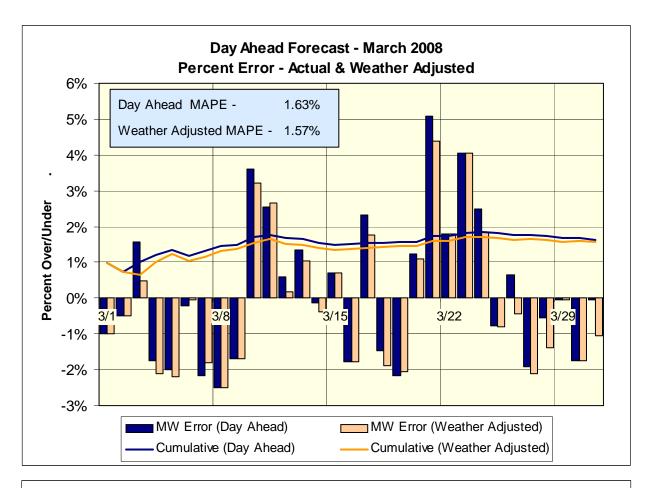

assist a neighboring Area (Shared Activation of Reserves) by activating an immediate resource and demand balancing operation.

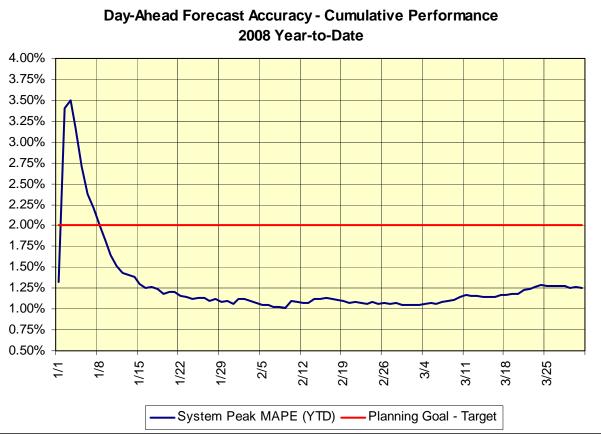

NERC Control Performance Standard/Disturbance Control Standard (CPS/DCS) Vilolations:

The number and causes of NERC CPS/DCS violations reflect system operating conditions beyond thresholds associated with applicable NERC reliability standards.

NEW YORK INDEPENDENT SYSTEM OPERATOR 2008 Major Product Enhancements

Description

Status and Milestone Deliverables

	Energy Marketplace	Product Enhancements
A767	MIS Enhancements: Comprehensive Bid Management System	Status: The first phase of this multi-phase project was successfully deployed into production in January 2007; the second phase was deployed on schedule in October 2007. The features that were deployed include the replacement of the load bidding and virtual bidding forms and upload / download templates. The next phase targets migration of the generation bidding pages and templates onto the new architecture. Phase 3 will be deployed in two deployments during 2008; the software for the first deployment was successfully deployed in early March, the second is scheduled for September. Three (3) market trials are scheduled to take place throughout the Summer.
		Deliverables: This project will upgrade the web-based application structure to replace overlapping applications by allowing common components to support current application functionality and future application functional growth. One of the deliverables will be the implementation of a more flexible and reliable application infrastructure for the market applications. This project is part of a multi-year effort that is a necessary precursor for an eventual replacement of the Market Information System (MIS) and related bidding and scheduling applications.
A871	Enhanced Price Validation	Status: The first phase of this multi-phase project was successfully deployed into production in March 2007; a portion of the second phase was deployed in December 2007. One of the tracks from the second phase requires additional testing and will be combined with the third (and final) phase to be deployed in the 2 nd quarter of 2008. Software implementation for most of the remaining rules associated with the final phase 2 track was successfully deployed in late March. Software requirements and design for phase 3 are complete; testing is underway.
		determine features and functions that can significantly enhance the price validation process. Product enhancements are proposed to implement proactive price monitoring, improved price reservations, and enhanced price corrections. The project will entail a multi-phase, multi-year implementation of tools to enhance the price monitoring, reservation, and correction processes for the NYISO markets.
A942	Wind Forecasting System	Status: This project has completed the requirements, RFP, and contract award processes. AWS Truewind was selected as the supplier of this system from a pool of candidates. Software integration design is underway; a mid-2008 delivery date is planned.
		Deliverables: Specification and implementation of a third-party system to enable output from wind generators to be incorporated accurately in the NYISO market software. The addition of this capability will improve reliability and enhance the accuracy of market outcomes as influenced by wind resources.
A857	Demand Response for Ancillary Services	Status: This project has completed the requirements process and has started development; implementation is targeted for the 2 nd quarter 2008. Technical design for the end-state solution had proven more difficult that expected, ultimately making meeting the commitment for a 4 th quarter 2007 delivery impossible. The current proposal would help mitigate the political risk of missing the commitment by delivering more functionality than originally offered.
		Deliverables: As directed by the FERC, execution of software changes that will permit the integration of demand side resources ("DSRs") into the NYISO real-time ancillary services and energy markets.

	Description	Status and Milestone Deliverables
	•	
B107	Scheduling and Pricing Improvements	Status: This first phase of the project has dealt with assessments of each of the penalties assessed to generators to determine the effectiveness and fairness of each. A number of changes have been proposed, including the eliminatic of certain performance penalties for generators and grouped units during Start-up and Shut-down periods. Additional analysis is being performed to determine opportunities to improve dragging.
		Deliverables: Implementation of a series of market efficiency enhancements that have been requested by Market Participants. Each of the requested enhancements requires detailed analysis and study to determine the potential for market impact.
	Auxiliary Market Pro	
		Status: This project has achieved an early delivery date of March 2008; ahead of the 2 nd quarter 2008 commitment and ahead of the schedule for the Spring capacity auctions.
A990 ICAP Auction Redesign		Deliverables: In order to accommodate changes approved for the ICAP Demand Curve, and still maintain auction results compliant with applicable tariffs, changes were required to the ICAP auction engine, including an upgrade to t vendor software utilized in the design. This project implements the necessary changes, along with certain enhanced features that are available with the new version of the software.
A910	ICAP In-City Mitigation	Status: This project is in the software development phase; implementation is anticipated in time for the Spring capacity auctions scheduled for the 2 nd quarter of 2008. The timing of the approval of the applicable market rules by FERC puts this project schedule in some risk, but staff resource allocation options exist to launch a feasible plan for timely implementation. The first phase of software necessary to meet the FERC timetable was deployed successfully late March. Development and testing for the second deliverable is on target for implementation in late April.
		Deliverables: As directed by FERC, changes to the ICAP In-City mitigation rules have been required. The software changes necessary to support these new rules are being developed and tested in conjunction with the ICAP auction redesign software; provisionary accommodations will be made in the event of a delayed FERC ruling on the new rules
A907	Forward Capacity Market Design	Status: This project is in the requirements and design phase. Preliminary straw proposals have been reviewed with stakeholders and are being evaluated through the governance process. A 4 th quarter commitment was communicated stakeholders for the finalization of a design, but efforts are being accelerated to provide and earlier solution.
		Deliverables: Design of a forward capacity market to supplement existing capacity market instruments. Following agreement on a design, and implementation plan and schedule will be developed and executed.

		SYSTEM OPERATOR 2008 Major Product Enhancements
l	Description	Status and Milestone Deliverables
	TCC Marketplace Pro	oduct Enhancement
A925	TCC Auction Automation – Phase 2	Status: This project is in the software development phase. The software to implement the second phase of the TCC Auction Automation is planned to be ready by early in the third quarter of 2008, with a planned implementation in tim for the Fall 2008 round of auctions.
		Deliverables: Following the implementation of the first phase of the TCC Auction Automation software project (Automation of the Awards Process), following phases will deliver the Database / Inventory Automation (Phase 2) and Bidding (Phase 3) functionality required to fully automate the TCC markets.
A993 TCC Auction Automation – Phase	TCC Auction	Status: This project is in the initial requirements phase. The software to implement the third phase of the TCC Auct Automation is planned to be ready by the end of 2008, with a planned implementation in the 4 th quarter of 2008, or early in 2009.
	Automation – Phase 3	Deliverables: Following the implementation of the first phase of the TCC Auction Automation software project (Automation of the Awards Process), following phases will deliver the Database / Inventory Automation (Phase 2) and Bidding (Phase 3) functionality required to fully automate the TCC markets.
	Operations and Relia	ibility Product Enhancements
		Status: This project is in the development and testing phases. Certain items are being developed on the internal NYISO systems, while other components are being provided by Potomac Economics. An integrated test plan is being produced to test the integrated components. The first milestone deliverable was implemented on time in late March.
B101	MMP Compliance Issues	Deliverables: A compliance review performed by Potomac Economics in 2007 identified certain issues with MMP systems and processes. A two-phase project has been identified to implement corrections to the known issues. The first phase (high-priority items) is scheduled for deployment in the 2 nd quarter. A follow-up phase is scheduled for the 4 th quarter of 2008.
A858	Integration of OOM and SRE Applications	Status: This project is in the software design phase; detailed requirements specification has been completed on schedule to meet the 2 nd quarter 2007 commitment; software design to has started with two planned implementation in 2008. The first phase is scheduled for the 3 rd quarter and the second phase is scheduled for the 4 th quarter.
		Deliverables: Replacement of the Out of Merit (OOM) and Supplemental Resource Evaluation (SRE) applications us by the control room floor. These applications are currently built upon an unsupported platform (Oracle Forms) and currently be design to be more efficient and error prone if they are consolidated into a single suite of application functions.

[Description	Status and Milestone Deliverables
A859	Outage Scheduler	Status: A number of commercial software vendors were reviewed and assessed as candidates to integrate into the NYISO architecture. A cross-functional team has selected the product from Sun-Net Solutions as the preferred pack contract negotiations are underway. A third quarter target for the first deliverable is planned. Additionally, the deta requirements are being developed.
A034	Automation	Deliverables: The NYISO operations outage scheduling function is a largely manual process with opportunities for error and inefficiency. This multi-phase project will deliver an automated tool to allow Market Participants to reques outages electronically, as well as automated tools for the NYISO to evaluate, manage, and report outages. A later phase will improve integration between the outage scheduling functions and the NYISO market software.
	Financial Service Pro	oduct Enhancements
	Credit Management System	Status: This project is in the discovery and detailed requirements phase. A Request for Proposal (RFP) had been issued to a number of companies that may have viable commercial off-the-shelf products that could be integrated with NYISO market software platforms. The multi-phase project will provide credit automation capabilities for each of NYISO markets in a phased delivery fashion. Following review of the proposals, the cross-functional team selected software product from the ROME Corporation as the platform on which to build the new system. Contract negotiaties were finalized in late March; the project team will launch the discovery / detailed planning activities in mid-April.
A949		Deliverables: Implementation of a rules-based system to integrate with the various NYISO market platforms for the purposes of providing a comprehensive Credit Management System for the NYISO enterprise. This multi-phase provide the tools necessary for the Credit Department to manage MP credit and collateral limits, provide Market Participants with tools and reports to manage their own credit, and provide integration to all NYISO market function such that customer credit obligations are met. A multi-phased approach will be employed to target integration for the TCC markets first, with other market components to follow.
A904	Billing Process Automation (Ramapo PAR / Station 80 /	Status: This project to automate the manual processes associated with these charges was deployed ahead of scherin late March. This project is completed.Deliverables: The NYISO is continuing to dedicate resources to identify automated solutions to the most prevalent.
	Local Black Start)	manual billing adjustments; this program has been identified as critical and valuable by settlements stakeholders. T project will provide automated data processing solutions for the Ramapo PAR, Station 80, and Local Black Start cha Status: This project has not yet started. The documentation of the functional requirements will start in the second
A996	Billing Process Automation (Min Oil Burn)	 Status: This project has not yet started. The documentation of the functional requirements will start in the second quarter; 4th quarter delivery of the software had been targeted. Deliverables: The NYISO is continuing to dedicate resources to identify automated solutions to the most preval manual billing adjustments; this program has been identified as critical and valuable by settlements stakeholders.

NEW YORK INDEPENDENT SYSTEM OPERATOR 2008 Major Product Enhancements

Description

Status and Milestone Deliverables

	Business Intelligen	ce Product Enhancements
A938	MMP Data Mart	Status: A scoping analysis was performed in 2007 that identified approximately seven (7) functional areas that could be addressed through the implementation of a Market Monitoring Data Mart. A multi-phase project has been defined with the target to deliver the infrastructure and core data set in 2008. The first phase of this effort has completed the requirements and design phase. A 4 th quarter implementation of the first phase is planned; design and requirements f the second phase will start once the first phase enters development and test.
		Deliverables: Process and system reviews performed for the Market Monitoring and Performance unit during 2007 highlighted deficiencies in the tool-set available to the MMP team for performing certain monitoring and analysis functions. This project is a multi-phase, multi-year effort to provide and integrated and robust set of tools to augment existing processes and manual tools in place. Additional analysis capabilities beyond compliance requirements will be identified and provided.
	Infrastructure Prod	uct Enhancements
A926	Customer Issue Tracking System Replacement	 Status: Software development, product configuration, testing, and UAT activities for this project has been completed. Deployment of the new application was completed on schedule in March 2008. This project is completed. Deliverables: The NYISO Customer Relations Group has been using an outdated toolset to manage MP issues and trouble tickets since the inception of the NYISO. In order to achieve required service levels, a more robust application required. This project will implement new functionality on top of the Service Desk architecture in place for managing internal tickets for the Information Technology group.
		Status: The project has been defined to multiple phases according to the individual business owner / functional area impacted. The first phase was completed in 2007 and involved the usage analysis and elimination of unnecessary forms. The second phase is directed at the Operations department functions and is scheduled for completion in the 2 ^r quarter of 2008. Parallel tracks of work are already addressing the other functional areas of the platform.
A928	Oracle Forms Replacement	Deliverables: A number of the internal use applications are developed on the Oracle Forms development platform. This technology is no longer supported by the vendor, and the replacement of this platform represents a gating factor for the upgrade of the Oracle database version. Oracle Forms applications are in use by almost every internal NYISO department for managing market data and supporting various NYISO business processes.

NYISO REGULATORY FILINGS – March 2008

- March 3, 2008 NYISO status report regarding credit requirements for transmission congestion contract auctions (ER08-334-000)
- March, 7, 2008 NYISO answer to joint comments of Con Edison and Orange % Rockland Utilities on the NYISO's 1/31/08 compliance filing regarding Order No. 698 (ER08-560-000)
- March 10, 2008 NYISO request for limited tariff waiver and shortened comment to enable the NYISO to post the results of the April Monthly Auction (EL08-45-000)
- March 12, 2008 NYISO filing of proposed tariff revisions regarding transmission congestion contract auctions (ER08-334-000)
- March 12, 2008 NYISO status report regarding compliance with guideline three of the commission's rules on long-term transmission rights in organized markets (ER07-521-000)
- March 13, 2008 NYISO motion to intervene in New York Regional Interconnect's 3/7/07 petition for declaratory order (EL08-39-000)
- March 14, 2008 NYISO filing of motion to intervene in the proceeding concerning National Grid's petition to the commission for a declaratory order (EL08-40-000)
- March 17, 2008 NYISO filing of motion to intervene in National Grid's 2/11/08 rate filing (ER08-552-000)
- March 20, 2008 NYISO filing of answer to comments of Con Edison regarding NYISO's 2/29/08 filing of an unexecuted large merchant transmission facility interconnection agreement (ER08-618-000)
- March 20, 2008 NYISO filing of tariff compliance implementing NYC ICAP market mitigation measures (ER08-695-000)
- March 24, 2008 NYISO filing of executed standard large generator interconnection agreement among the NYISO, NY Power Authority and Noble Ellenburg (ER08-699-000)
- March 24, 2008 NYISO filing of tariff compliance to allow demand side resources to offer operating reserves and regulation service on terms comparable to generators (ER04-230-034)
- March 25, 2008 NYISO errata filing to NYISO 3/24/08 demand side resource compliance filing (ER04-230-034)

This list is current as of 2:29 P.M. March 28, 2008.

FERC ORDERS – March 2008

- Mar. 3, 2008 FERC letter order accepting SGIP and SGIA compliance and errata sheets (ER06-311-004 and 005)
- Mar. 7, 2008 FERC order conditionally approving a proposal to strengthen the mitigation of market power in the NYC ICAP market (EL07-39-000)
- Mar. 19, 2008 FERC letter order granting NYISO a tariff waiver regarding its request to post the results of the April auction (EL08-45-000)
- Mar. 20, 2008 FERC tolling order granting rehearing for further consideration regarding the NYISO v. Hudson Transmission Partners proceeding (EL07-70-002)
- Mar. 20, 2008 FERC letter order approving tariff revisions to change the calculation of charges assessed to transmission customers to recover costs related to various transmission facilities and black start and restoration services (ER08-498-000)
- Mar. 20, 2008 FERC letter order accepting unredacted pages filed in response to a 2/8/08 order (ER08-321-001)
- Mar. 21, 2008 FERC guidance order on the conceptual proposal to codify the deliverability plan (ER04-449-007/008/016, ER07-543-000)
- Mar. 21, 2008 FERC order denying the Black Oak Energy complaint v NYISO regarding alleged tariff violations concerning price corrections and an inappropriate penalty (EL07-95-000)
- Mar. 26, 2008 FERC order accepting and suspending tariff sheets subject to conditions and granting waivers regarding implementation of market power mitigation of ICAP suppliers in the NYC market (ER08-695-000)
- Mar. 28, 2008 FERC order accepting tariff sheet regarding establishing a NY gas-electric coordination protocol (ER08-560-000)
- Mar. 28, 2008 FERC letter order accepting errata tariff sheets regarding the ICAP demand curve tariff filing (ER08-283-001)
- Mar. 28, 2008 FERC letter announcing an audit of NYISO OASIS information postings to ensure compliance with Order No. 890 (PA08-14-000)

This list is current as of 8:24 A.M. March 31, 2008.
