- 5. Regulatory Filings

Market Performance Highlights for May 2008

- LBMP for May is \$87.18/MWh, down from \$90.91/MWh in April 2008.
 - Average monthly cost is \$98.03/MWh, up from \$97.34/MWh in April 2008.
 - Day Ahead LBMPs have decreased from April 2008, while Real Time LBMPs have increased.
- Average daily sendout is 403GWh/day in May, down from 406GWh/day in April 2008 and lower than the May 2007 amount of 423GWh/day.
- Natural Gas prices as well as other fuels are up this month.
 - Kerosene is \$28.00/mmBTU, up from \$26.15/mmBTU in April.
 - No. 2 Fuel Oil is \$25.79/mmBTU, up from \$22.97/mmBTU in April.
 - No. 6 Fuel Oil is \$15.78/mmBTU, up from \$14.56/mmBTU in April.
 - Natural Gas is \$11.98/mmBTU, up from \$10.98/mmBTU in April.
- Uplift is higher compared to April 2008.
 - Uplift (not including NYISO cost of operations) is \$8.52/MWh, up from \$3.80/MWh in April 2008.

* Excludes ICAP payments.

Market Monitoring Prepared: 6/6/2008 9:00

* Excludes ICAP payments.

These numbers reflect the rebilling of prior periods.

DAM Contract Balancing amounts are for payments made to generating units to make them whole for being dispatched below their Day-Ahead schedule, as a result of out-of-merit dispatches. DAM Bid Production Cost Guarantees for Virtual Transactions are included in the chart and are shown from the inception of Virtual Transactions. These values are small and cannot be identified on the chart.

DAM residuals consist of both energy and loss revenue collections and payments. By design, there is a net over collection of revenues due to the difference between the marginal losses paid to generation and the average losses charged to loads.

+ Balancing Energy: Load(MW) purchased at Real Time LBMP.

* The signs for the detail section intuitively reflect the direction of power flow eliminating the use of double negatives when Balancing Energy is negative.

Notes: Percent totals may not equal 100% due to rounding. Virtual Transactions are not reflected in this chart.

Definitions

Alert State Declarations:

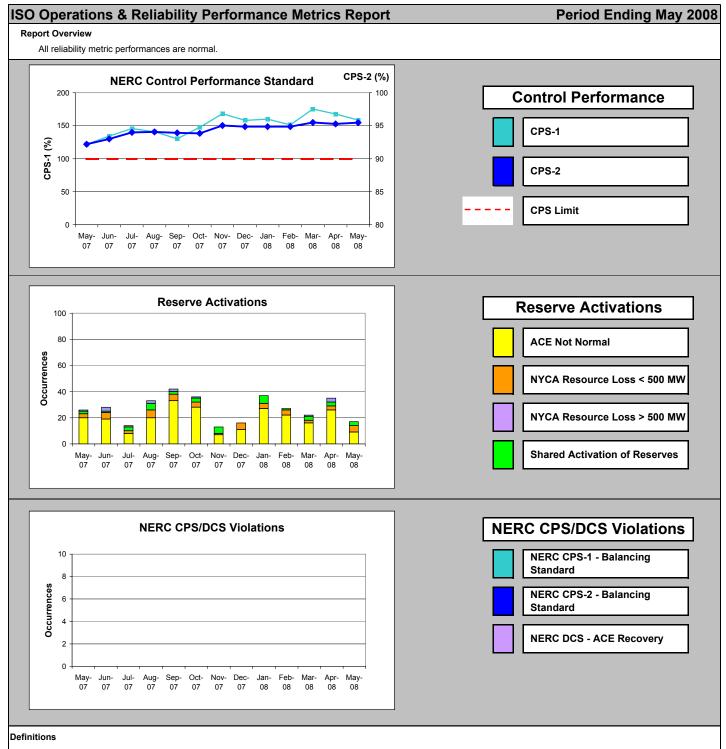

The number and causes of Alert State declarations reflect system operating conditions beyond thresholds associated with Normal and Warning States. Declaration of the Alert State allows the NYISO to take corrective actions not available in the Normal and Warning States.

Major Emergency State Declarations:

The number and causes of Major Emergency State declarations reflect system operating conditions beyond thresholds associated with the Alert State. Declaration of the Major Emergency State allows the NYISO to take agressive corrective actions not available in the Alert State.

NERC IROL/SOL Violations:

The number and causes of NERC IROL/SOL violations reflect system operating conditions beyond thresholds associated with applicable NERC reliability standards. The NERC IROL/SOL violation thresholds are higher than those defined for the Major Emergency State.

Control Performance Standards:

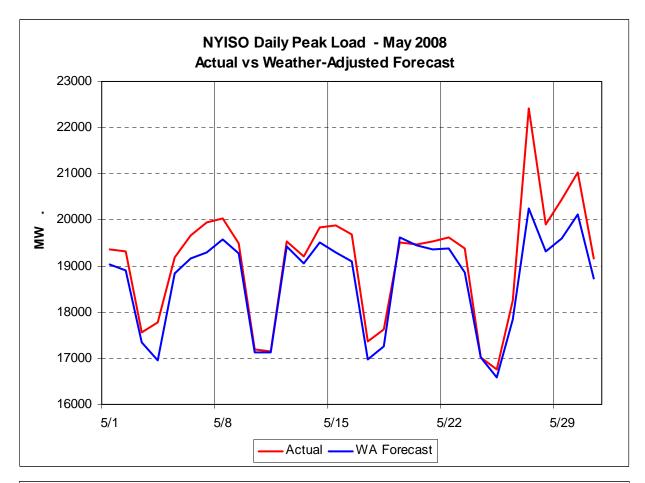

The values of NERC Control Performance Standards (CPS-1 and CPS-2) are indicators of the NYISO Area resource and demand balancing performance. Reserve Activations:

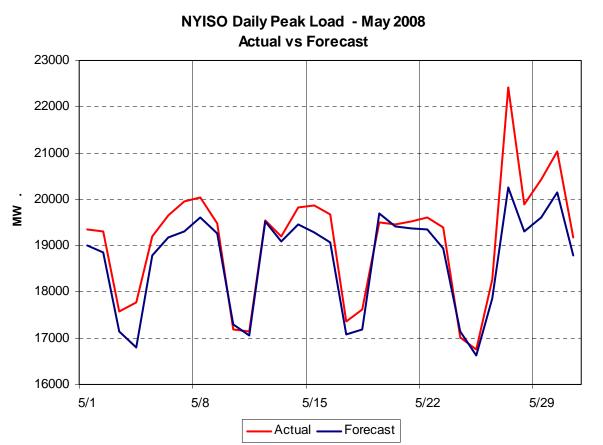

Reserve Activations

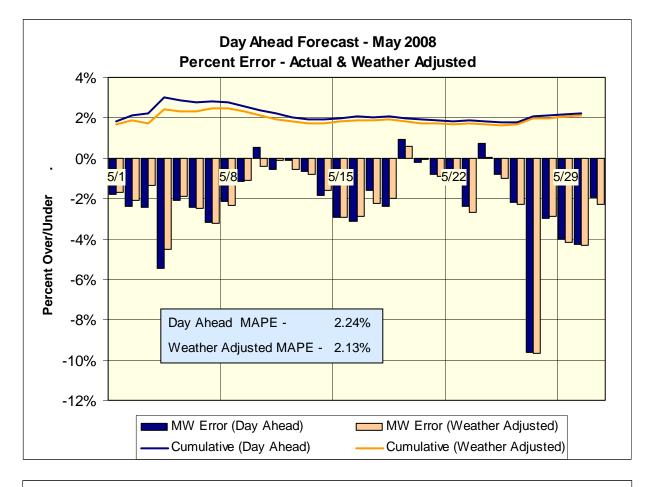

The number and causes of NYISO Reserve Activations are indicators of the need to respond to unexpected operational conditions within the NYISO Area or to assist a neighboring Area (Shared Activation of Reserves) by activating an immediate resource and demand balancing operation.

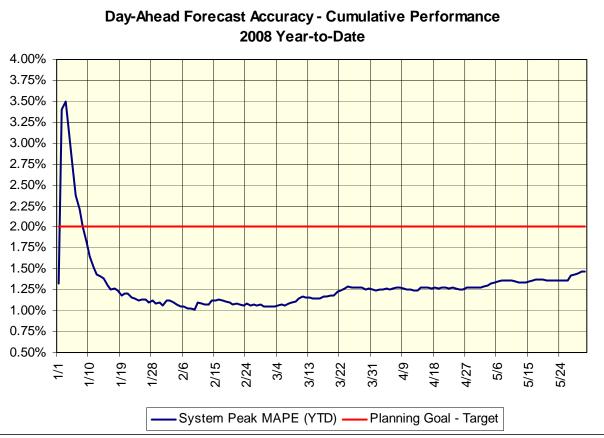

NERC Control Performance Standard/Disturbance Control Standard (CPS/DCS) Vilolations:

The number and causes of NERC CPS/DCS violations reflect system operating conditions beyond thresholds associated with applicable NERC reliability standards.

NEW YORK INDEPENDENT SYSTEM OPERATOR 2008 Major Product Enhancements

Description

Status and Milestone Deliverables

| | | Status: The first phase of this multi-phase project was successfully deployed into production in January 2007; the |
|------|---|--|
| A767 | MIS Enhancements: Comprehensive Bid Management System | second phase was deployed on schedule in October 2007. The features that were deployed include the replacement of the load bidding and virtual bidding forms and upload / download templates. The next phase targets migration of the generation bidding pages and templates onto the new architecture. Phase 3 will be deployed in two deployments durin 2008; the software for the first deployment was successfully deployed in early March, the second is scheduled for September. Three (3) market trials are scheduled to take place throughout the Summer. |
| | | allowing common components to support current application functionality and future application functional growth. On of the deliverables will be the implementation of a more flexible and reliable application infrastructure for the market applications. This project is part of a multi-year effort that is a necessary precursor for an eventual replacement of the Market Information System (MIS) and related bidding and scheduling applications. |
| Δ8/1 | Enhanced Price Validation | Status: The first phase of this multi-phase project was successfully deployed into production in March 2007; a portion of the second phase was deployed in December 2007. One of the tracks from the second phase requires additional testing and will be combined with the third (and final) phase to be deployed in June of 2008. Software implementation for most of the remaining rules associated with the final phase 2 track was successfully deployed in late March; a preliminary deployment of the Phase 3 software was executed in late April. Software requirements and design for phase 3 are complete; testing is nearing completion. |
| | | Deliverables: The NYISO has investigated all known causes of pricing errors, and has taken a systematic approach to determine features and functions that can significantly enhance the price validation process. Product enhancements ar proposed to implement proactive price monitoring, improved price reservations, and enhanced price corrections. The project will entail a multi-phase, multi-year implementation of tools to enhance the price monitoring, reservation, and correction processes for the NYISO markets. |
| A942 | Wind Forecasting System | Status: This project has completed the requirements, RFP, and contract award processes. AWS Truewind was selected as the supplier of this system from a pool of candidates. Software integration is underway; a June delivery is planned. Deliverables: Specification and implementation of a third-party system to enable output from wind generators to be |
| | | incorporated accurately in the NYISO market software. The addition of this capability will improve reliability and enhance the accuracy of market outcomes as influenced by wind resources. |
| A857 | Demand Response for Ancillary Services | Status: This project has completed the requirements and development phases; implementation is targeted for the 2 ⁿ quarter 2008. Technical design for the end-state solution had proven more difficult that expected, ultimately making meeting the commitment for a 4 th quarter 2007 delivery impossible. The current proposal will help mitigate the political risk of missing the commitment by delivering more functionality than originally offered. |
| | | Deliverables: As directed by the FERC, execution of software changes that will permit the integration of demand sid resources ("DSRs") into the NYISO real-time ancillary services and energy markets. |

| [| Description | Status and Milestone Deliverables |
|------|--|--|
| B107 | Scheduling and Pricing Improvements | Status: This first phase of the project has dealt with assessments of each of the penalties assessed to generators to determine the effectiveness and fairness of each. A number of changes have been proposed, including the eliminate of certain performance penalties for generators and grouped units during Start-up and Shut-down periods. Additional analysis is being performed to determine opportunities to improve dragging. Deliverables: Implementation of a series of market efficiency enhancements that have been requested by Market Participants. Each of the requested enhancements requires detailed analysis and study to determine the potential for market impact. |
| | Auxiliary Market Pro | oduct Enhancements |
| A990 | ICAP Auction Redesign | Status: This project has achieved an early delivery date of March 2008; ahead of the 2nd quarter 2008 commitment and ahead of the schedule for the Spring capacity auctions. Deliverables: In order to accommodate changes approved for the ICAP Demand Curve, and still maintain auction results compliant with applicable tariffs, changes were required to the ICAP auction engine, including an upgrade to the vendor software utilized in the design. This project implements the necessary changes, along with certain enhanced features that are available with the new version of the software. |
| A910 | ICAP In-City Mitigation | Status: This project completed a multi-step software deployment in time for the Spring capacity auctions, and in lir with an aggressive deployment schedule following a delayed FERC ruling on the NYISO proposal. Software deploym were successfully performed in March and April, ahead of a 2nd quarter corporate commitment. Production software continues to be monitored for accuracy and performance. Deliverables: As directed by FERC, changes to the ICAP In-City mitigation rules have been required. The software changes necessary to support these new rules are being developed and tested in conjunction with the ICAP auction redesign software; provisionary accommodations will be made in the event of a delayed FERC ruling on the new rule |
| A907 | Forward Capacity Market Design | Status: This project is in the requirements and design phase. Preliminary straw proposals have been reviewed with stakeholders and are being evaluated through the governance process. A 4th quarter commitment was communicate stakeholders for the finalization of a design, but efforts are being accelerated to provide and earlier solution. Deliverables: Design of a forward capacity market to supplement existing capacity market instruments. Following agreement on a design, and implementation plan and schedule will be developed and executed. |

|------|--|---|
| - | Description | Status and Milestone Deliverables |
| | TCC Marketplace Pro | oduct Enhancement |
| A925 | TCC Auction | Status: This project is in the software development and testing phase. The software to implement the second phase of the TCC Auction Automation is planned to be ready by early in the third quarter of 2008, with a planned implementation in time for the Fall 2008 round of auctions. |
| R723 | Automation – Phase 2 | Deliverables: Following the implementation of the first phase of the TCC Auction Automation software project (Automation of the Awards Process), following phases will deliver the Database / Inventory Automation (Phase 2) and Bidding (Phase 3) functionality required to fully automate the TCC markets. |
| A993 | TCC Auction Automation – Phase 3 | Status: This project is in the requirements phase. The software to implement the third phase of the TCC Auction Automation is planned to be ready by the end of 2008, with a planned implementation in the 4th quarter of 2008, or early in 2009. Deliverables: Following the implementation of the first phase of the TCC Auction Automation software project (Automation of the Awards Process), following phases will deliver the Database / Inventory Automation (Phase 2) and Bidding (Phase 3) functionality required to fully automate the TCC markets. |
| | Operations and Relia | ability Product Enhancements |
| B101 | MMP Compliance Issues | Status: This project is in the development and testing phases. Certain items are being developed on the internal NYISO systems, while other components are being provided by Potomac Economics. An integrated test plan is being produced to test the integrated components. The first milestone deliverable was implemented on time in late March. Deliverables: A compliance review performed by Potomac Economics in 2007 identified certain issues with MMP systems and processes. A two-phase project has been identified to implement corrections to the known issues. The first phase (high-priority items) is scheduled for deployment in the 2nd quarter. A follow-up phase is scheduled for the 4th quarter of 2008. |
| A858 | Integration of OOM and SRE Applications | Status: This project is in the software design phase; detailed requirements specification has been completed on schedule to meet the 2nd quarter 2007 commitment; software design to has started with two planned implementations in 2008. The first phase is scheduled for the 3rd quarter and the second phase is scheduled for the 4th quarter. Deliverables: Replacement of the Out of Merit (OOM) and Supplemental Resource Evaluation (SRE) applications used by the control room floor. These applications are currently built upon an unsupported platform (Oracle Forms) and can be design to be more efficient and error prone if they are consolidated into a single suite of application functions. |

| C | escription | Status and Milestone Deliverables |
|------|---|---|
| A859 | Outage Scheduler Automation | Status: A number of commercial software vendors were reviewed and assessed as candidates to integrate into the NYISO architecture. A cross-functional team has selected the product from Sun-Net Solutions as the preferred packa contract negotiations are underway. A third quarter target for the first deliverable is planned. Additionally, the deta requirements are being developed. |
| | | Deliverables: The NYISO operations outage scheduling function is a largely manual process with opportunities for error and inefficiency. This multi-phase project will deliver an automated tool to allow Market Participants to reques outages electronically, as well as automated tools for the NYISO to evaluate, manage, and report outages. A later phase will improve integration between the outage scheduling functions and the NYISO market software. |
| | Financial Service Pro | oduct Enhancements |
| A949 | Credit Management System | Status: This project is in the discovery and detailed requirements phase. A Request for Proposal (RFP) had been issued to a number of companies that may have viable commercial off-the-shelf products that could be integrated w the NYISO market software platforms. The multi-phase project will provide credit automation capabilities for each o NYISO markets in a phased delivery fashion. Following review of the proposals, the cross-functional team selected t software product from the ROME Corporation as the platform on which to build the new system. Contract negotiatic were finalized in late March; the project team has launched the discovery / detailed planning activities. |
| | | Deliverables: Implementation of a rules-based system to integrate with the various NYISO market platforms for the purposes of providing a comprehensive Credit Management System for the NYISO enterprise. This multi-phase projection will provide the tools necessary for the Credit Department to manage MP credit and collateral limits, provide Market Participants with tools and reports to manage their own credit, and provide integration to all NYISO market functions such that customer credit obligations are met. A multi-phased approach will be employed to target integration for the TCC markets first, with other market components to follow. |
| A904 | Billing Process Automation (Ramapo PAR / Station 80 / Local Black Start) | Status: This project to automate the manual processes associated with these charges was deployed ahead of scherin late March. This project is completed. |
| | | Deliverables: The NYISO is continuing to dedicate resources to identify automated solutions to the most prevalent manual billing adjustments; this program has been identified as critical and valuable by settlements stakeholders. The project will provide automated data processing solutions for the Ramapo PAR, Station 80, and Local Black Start charters. |
| A996 | Billing Process Automation (Min Oil Burn) | Status: This project has initiated and is in the requirements phase. The documentation of the functional requirements is scheduled to be complete in the third quarter; a 4th quarter delivery of the software had been targeted. Deliverables: The NYISO is continuing to dedicate resources to identify automated solutions to the most prevalent. |

NEW YORK INDEPENDENT SYSTEM OPERATOR 2008 Major Product Enhancements

Description

Status and Milestone Deliverables

| | Business Intelligen | ce Product Enhancements |
|------|--|--|
| | | Status: A scoping analysis was performed in 2007 that identified approximately seven (7) functional areas that could be addressed through the implementation of a Market Monitoring Data Mart. A multi-phase project has been defined with the target to deliver the infrastructure and core data set in 2008. The first phase of this effort has completed the requirements and design phase. A 4 th quarter implementation of the first phase is planned; design and requirements f the second phase will start once the first phase enters development and test. |
| | MMP Data Mart | Deliverables: Process and system reviews performed for the Market Monitoring and Performance unit during 2007 highlighted deficiencies in the tool-set available to the MMP team for performing certain monitoring and analysis functions. This project is a multi-phase, multi-year effort to provide and integrated and robust set of tools to augment existing processes and manual tools in place. Additional analysis capabilities beyond compliance requirements will be identified and provided. |
| | Infrastructure Prod | luct Enhancements |
| A926 | Customer Issue Tracking System Replacement | Status: Software development, product configuration, testing, and UAT activities for this project has been completed. Deployment of the new application was completed on schedule in March 2008. This project is completed. Deliverables: The NYISO Customer Relations Group has been using an outdated toolset to manage MP issues and trouble tickets since the inception of the NYISO. In order to achieve required service levels, a more robust application required. This project will implement new functionality on top of the Service Desk architecture in place for managing internal tickets for the Information Technology group. |
| A928 | Oracle Forms Replacement | Status: The project has been defined to multiple phases according to the individual business owner / functional area impacted. The first phase was completed in 2007 and involved the usage analysis and elimination of unnecessary forms. The second phase is directed at the Operations department functions and is scheduled for completion in the 2 ^r quarter of 2008. Parallel tracks of work are already addressing the other functional areas of the platform. |
| | | Deliverables: A number of the internal use applications are developed on the Oracle Forms development platform. This technology is no longer supported by the vendor, and the replacement of this platform represents a gating factor for the upgrade of the Oracle database version. Oracle Forms applications are in use by almost every internal NYISO department for managing market data and supporting various NYISO business processes. |

NYISO REGULATORY FILINGS - May 2008

May 2, 2008 NYISO filing of request for leave to answer comments and protests to NYISO's 3/24/08 demand side resources compliance filing (ER04-230-034) May 6, 2008 NYISO filing of second tariff filing and request for waiver implementing NYC ICAP market mitigation measures (ER08-685-001) May 12, 2008 NYISO filing of motion to intervene in PJM and Con Edison's 4/22/08 transmission service proposal (ER08-858-000) May 13, 2008 NYISO joint ISO/RTO Council filing of comments to FERC notice of proposed on the reliability standard nuclear plant interface coordination (RM08-3-000) May 15, 2008 NYISO joint request for 60-day extension of time and request for expedited action to comply with FERC's 3/21/07 Guidance Order (ER04-449-007/008/016) May 16, 2008 NYISO compliance in response to the 4/16/08 order directing the NYISO to revise certain revised proposed tariff revisions that were originally submitted in its Order Nos. 681 and 681-A compliance filing concerning the institution on longtern firm transmission rights in NY (ER07-521-003) (ER07-521-004) May 16, 2008 NYISO filing explanatory statement in support of the stipulation and agreement settlement resolving all issues involving the NYISO v. Astoria Energy proceeding (EL07-18-000) May 19, 2008 NYISO Section 205 filing of small generator interconnection agreement among the NYISO, NIMO and Innovative Energy and request for waiver of 60-day notice period (ER08-985-000) May 23, 2008 NYISO filing of errata compliance to correct previous filing of revised proposed tariff revisions concerning the institution of long-term firm transmission rights in NY (ER07-521-004) May 28, 2008 ISO/RTO joint comments in response to the FERC notice of inquiry regarding annual charges assessments for public utilities (AD08-7-000) May 28, 2008 NYISO filing of comments in response to the revised wholesale electric quadrant business practice standards developed by the North American Energy Standards Board (RM05-5-005) NYISO filing of FERC Form 714 annual electric balancing authority area and May 29, 2008 planning area report for the year ending 2007

- May 29, 2008 NYISO filing of FERC Form 3Q quarterly financial report
- May 29, 2008 NYISO filing of request for leave submit limited answer to PSEG Companies Protest in response to the NYISO's 4/23/08 informational filing of an agreement between the NYISO and PJM (ER08-867-000)

This list is current as of 10:35 A.M. June 2, 2008.

FERC ORDERS – May 2008

- May 7, 2008 FERC order conditionally accepting NYISO's compliance filings regarding Order No. 890 pro forma OATT requirements (OA08-13-000 and 001)
- May 15, 2008 FERC letter order accepting an executed Large Generator Interconnection Agreement between NYISO, the Village of Arcade, and Noble Bliss Windpark, LLC (ER08-826-000)
- May 16, 2008 FERC letter order accepting a large generator interconnection agreement between NYISO, NYPA and Noble Ellenburg Windpark, LLC (ER08-699-000)
- May 19, 2008 FERC notice granting NYISO an extension of time until July 21, 2008 to file tariff revisions regarding compliance with FERC's Guidance Order on the conceptual proposal (ER04-449-007/008/016 and ER07-541-000)
- May 23, 2008 FERC order partially accepting and rejecting tariff demand side resource tariff revisions (ER04-230-034)
- May 27, 2008 FERC letter order accepting a large generator interconnection agreement between NYISO, NYPA and Noble Clinton Windpark I, LLC (ER08-861-000)
- May 27, 2008 FERC order accepting in part compliance reports regarding NYISO's demand side management programs, new generation projects in the NYCA and the effectiveness of the ICAP demand curves (ER01-3001-019, ER03-647-011)
- May 30, 2008 FERC letter order accepting proposed tariff revisions to extend special payment rules during start-up and shutdown periods to additional generators (ER08-818-000)
- May 30, 2008 FERC letter order accepting tariff revisions regarding the expedited dispute resolution process for unresolved customer settlement charges (ER08-842-000/001)

This list is current as of 10:00 A.M. June 2, 2008.
