Market Performance Highlights for April 2009

- LBMP for April is \$39.64/MWh, down from \$45.63/MWh in March 2009.
 - Average monthly cost is \$42.80/MWh, down from \$48.06/MWh in March 2009.
 - Day Ahead and Real Time LBMPs have decreased from March 2009.
- Average daily sendout is 400GWh/day in April, down from 422Wh/day in March 2009 and slightly lower than the April 2008 amount of 406GWh/day.
- Gas prices are down this month while other fuel prices are up compared to last month.
 - Kerosene is \$10.80/MMBtu, up from \$10.11/MMBtu in March.
 - No. 2 Fuel Oil is \$9.77/MMBtu, up from \$9.12/MMBtu in March.
 - No. 6 Fuel Oil is \$7.76/MMBtu, up from \$7.24MMBtu in March.
 - Natural Gas is \$4.10/MMBtu, down from \$5.00/MMBtu in March.
- Uplift is higher this month compared to March 2009.
 - Uplift (not including NYISO cost of operations) is \$0.68/MWh, up from \$0.21/MWh in March 2009.
 - Total uplift (Schedule 1 components including NYISO Cost of Operations) increased from \$11.4 million in March to \$17.2 million in April 2009.

^{*} Excludes ICAP payments.

Market Monitoring Prepared: 5/6/2009 11:20

Market Monitoring

Prepared: 5/6/2009 9:30

^{*} Excludes ICAP payments.

DAM Contract Balancing amounts are for payments made to generating units to make them whole for being dispatched below their Day-Ahead schedule, as a result of out-of-merit dispatches.

DAM Bid Production Cost Guarantees for Virtual Transactions are included in the chart and are shown from the inception of Virtual Transactions. These values are small and cannot be identified on the chart.

DAM residuals consist of both energy and loss revenue collections and payments. By design, there is a net over collection of revenues due to the difference between the marginal losses paid to generation and the average losses charged to loads.

⁺ Balancing Energy: Load(MW) purchased at Real Time LBMP.

Notes: Percent totals may not equal 100% due to rounding. Virtual Transactions are not reflected in this chart.

^{*} The signs for the detail section intuitively reflect the direction of power flow eliminating the use of double negatives when Balancing Energy is negative.

[Description	Status and Milestone Deliverables
	Energy Marketniace	Product Enhancements
A767	MIS Enhancements: Comprehensive Bid Management System	Status: The first phase of this multi-phase project was successfully deployed into production in January 2007; the second phase was deployed on schedule in October 2007. The features that were deployed include the replacement of the load bidding and virtual bidding forms and upload / download templates. Phase 3 was implemented in two deployments during 2008, resulting in the successful migration of the generation bidding pages and templates onto the new architecture. The project is scheduled to conclude in 2009 with two deployments planned to complete work on MIS Administrative functions (Phase 4) as well as data model improvements (Phase 5). Phase 4 was successfully deployed in March.
	wanagement system	Deliverables: This project will upgrade the web-based application structure to replace overlapping applications by allowing common components to support current application functionality and future application functional growth. One of the deliverables will be the implementation of a more flexible and reliable application infrastructure for the market applications. This project is part of a multi-year effort that is a necessary precursor for an eventual replacement of the Market Information System (MIS) and related bidding and scheduling applications.
A905	Trading Hubs (F.K.A. Netting of Bi-	Status: Using the NYISO bidding and scheduling system, a market participant will be able to establish transactions to purchase power from a portfolio of generators and deliver that power to a zonal trading hub. Using the same set of tools, the market participant can also establish separate transactions to sell that power, or portions thereof, from the trading hub to a portfolio of load serving entities.
	Laterals)	Deliverables: This project will establish zonal trading hubs in the NYISO market systems that provide more flexibility in scheduling of bilateral power transactions. Integration of the MIS with the Credit Management System (CMS) is required in order to successfully implement this market design and manage the credit risk associated with scheduling these transactions.
B115	New Technologies into Regulation Markets	Status: This project will address the need to evaluate and develop market rules that consider the unique characteristics of the emerging technologies. Potential modifications to the bidding, scheduling, monitoring and settlement processes may be required in order to realize the full potential of these new technologies. The objective of the analysis is to evaluate the new technologies, merge these features into the market comparable with existing product suppliers while maintaining the reliability and market efficiency objectives of the NYISO.
		Deliverables: This project will introduce the market design necessary for Limited Energy Storage Resources to provide regulation. Fly wheels and batteries are the targeted resources for this design.

ι	Description	Status and Milestone Deliverables
B116	Wind Resource Management Provisions	Status: As more generation from wind turbines is added to the system, it becomes increasingly important for NYISO to have the strong tools at our disposal to manage these resources in a reliable way. During 2008, the NYISO began achieving that goal by implementing an intelligent wind power forecasting program. Additionally, NYISO has embarked on a new study assessing the implications of large wind integration in New York, including the impacts on market rules, grid reliability, system cost, and ancillary services.
		Deliverables: This project will continue expanding our ability to effectively and reliably manage wind power integration into the NY Bulk Power Grid by addressing recommendations from the 2008 Wind Integration study work, including the ability to direct wind plants to reduce output in response to observed or anticipated reliability limitations.
B108	Scheduling and Pricing Improvements	Status: This first phase of the project has dealt with assessments of each of the penalties assessed to generators to determine the effectiveness and fairness of each. A number of changes have been completed, including the elimination of certain performance penalties for generators and grouped units during Start-up and Shut-down periods. The second phase of the project has dealt with establishing a market design that will capture the impact of units not following their schedules into the real-time pricing outcomes. Design of the necessary market rules, including new physical withholding provisions, has been completed and approved by the Market Participants. Implementation of the changes is scheduled for 1 st quarter and 4 th quarter of 2009. The second phase of the project was successfully deployed in March. Deliverables: Implementation of a series of market efficiency enhancements that have been requested by Market Participants. Each of the requested enhancements requires detailed analysis and study to determine the potential for market impact.
	Auxiliary Market Pro	market impact. oduct Enhancements
B119	Demand Response Program Management System	Status: The NYISO currently uses a series of manual procedures to collect and process EDRP and SCR registrations and SCR monthly ICAP data. This multi-year effort will identify products available to automate current procedures and expand the capabilities of demand response program management, including implementation of new demand response programs. The initial phase will include the development of requirements, evaluation of system products, a make-or-buy decision, and implementation of prioritized requirements. Efforts necessary to support integration with a SmartGrid network will be explored and incorporated into the planning requirements.
		Deliverables : Phase 1 implementation of prioritized requirements will include replacement of the existing Access database and Excel worksheets for demand response program registration, monthly processing of SCR data, and automation of the demand response event payment calculations. A subsequent phase will include on-line registration for market participants, enhanced event data submission functions and automation of CBL and performance calculations using hourly interval meter data.

	Description	Status and Milestone Deliverables
		Status: On January 15, 2009, FERC ruled on the NYISO's Aug. 5 Deliverability filing. NYISO will need to implement software changes to include the following:
		Existing generators will be capped at a Summer Capability Period ICAP level via a one-time process based on the highest summer DMNC test over the past five years.
A911	ICAP Market Changes - Deliverability	 New generators will be assigned an ICAP equivalent cap for the Summer Capability Period based on the results of the Deliverability Test performed in conjunction with the annual Class Year assessment. For all generators, Winter Capability Period ICAP caps will be set to the ratio of CRIS to ERIS levels for each unit, multiplied by the then applicable Winter DMNC level.
		Software changes were successfully deployed in March.
		Deliverables: NYISO will need to implement changes to the existing ICAP Market System to support the results of Deliverability tests.
		Status: This project will implement the rules set forth in the NYISO's May 7, 2008 FERC filing, pending FERC approval. The effort consists of:
		 For new generators deemed to be Uneconomic, flagging the unit Uneconomic and establish an Effective Start/End Date when the unit is subject to Buyer-Side Mitigation.
	ICAP Buyer-Side	Calculating and entering a Unit Specific Buyer-Side Mitigation Reference Floor Price.
	In-City Mitigation	 Prohibiting Offers to Sell for Uneconomic Unit as Bilateral Sale, Strip or Monthly Auction. Implementing rules to handle overlap between Supply-Side and Buyer-Side Mitigation for units deemed
		 Implementing rules to handle overlap between Supply-Side and Buyer-Side Mitigation for units deemed Uneconomic.
		Deliverables: The software changes necessary to support these rules are being developed and tested with implementation scheduled for 2^{nd} quarter of 2009.
A907	Forward Capacity Market Design	Status: With the implementation of long-term forward capacity markets in PJM and ISO-NE, the NYISO and its stakeholders are considering the addition of a forward market and modifications to the existing capacity market as necessary. Top-level designs for both a mandatory and voluntary market design were vetted with stakeholders during 2008. Stakeholder discussions are ongoing with recent emphasis on credit implications and potential credit requirements. Stakeholder approval of a design is targeted for 2 nd quarter 2009. If significant agreement is reached during this phase, it will be possible to begin software development of the new market design in 2009.
		Deliverables: Design of a forward capacity market to supplement existing capacity market instruments. Following agreement on a design, and implementation plan and schedule will be developed and executed.

Status and Milestone Deliverables

	TCC Marketplace Dr	adust Eulapasamant
A993	TCC Marketplace Pro TCC Auction Automation – Phase 3	Status: Following the implementation of the first phase of the TCC Auction Automation software project (Automation of the Awards Process), following phases will deliver the Database / Inventory Automation (Phase 2) and Bidding (Phase 3) functionality required to fully automate the TCC markets. Phase 2 successfully deployed in October 2008. Phase 3 deliverables will allow Market Participants to submit their bids and offers into an auction via a web interface and through an upload process. Error detection will be performed on these submitted bids and offers. Screens will be developed to allow Market Participants to review and modify their submitted bids and offers. Phase 3 was successfully deployed to production on February 10 prior to the Spring 2009 Capability Period Auction. This project is complete. Deliverables: Following the implementation of the first phase of the TCC Auction Automation software project
		(Automation of the Awards Process), following phases will deliver the Database / Inventory Automation (Phase 2) and
B125	TCC Enhancement Features – Phase 1	 Bidding (Phase 3) functionality required to fully automate the TCC markets. Status: NYISO has engaged stakeholders in discussions regarding desired functionality in the end state. Specifically, the following functionality will be addressed as part of Phase 1: Seasonal Auction Changes (An important feature of the end state auction engine is that it can simultaneously evaluate bids and offers for TCCs of multiple durations, permitting the NYISO to sell six-month and annual TCCs within the same auction round, and add auctions of TCCs additional durations, without extending the length of the auction). Monthly Auction Changes (The ability of the end-state auction to simultaneous sell or reconfigure TCCs of multiple durations would enable the NYISO to expand its monthly auctions to reconfiguration auctions not only covering the next month, but the remainder of the capability period or the remainder of the year). Expanding the availability of LTFTRs (per FERC's Order) to LSEs that seek to use non-historic points of injection and withdrawal as well as making LTFTRs available to non-LSEs. Deliverables: This project will provide for TCC Auction 'End State' functionality to include the ability to offer Multi-Period Auctions with possible Balance-of-Period Auction, On Peak - vs- Off Peak, etc.
	Operations and Relia	ability Product Enhancements
B122	Reference Price Software Replacement	Status: In 2008 the NYISO initiated the scoping, requirement definition and project plan development, which is currently scheduled for completion in 1 st quarter 2009. These activities will include deciding on internal/vendor provision as well as process improvements. A software/implementation design is targeted for 3 rd quarter 2009. NYISO selected LTI and Potomac through a competitive bidding process; requirements definition is currently underway. Deliverables: This is a multi-phased project focusing on the next generation of the Reference Price Software.

ı	Description	Status and Milestone Deliverables
B118	Linden VFT	Status: The Linden VFT Project's 300 MW of incremental Transmission Transfer Capability was auctioned in twelve - 25 MW blocks. Four customers were awarded transmission scheduling rights ("TSRs") in the open season auction for terms of either three, five or seven years from commercial operation. Nine 25 MW blocks were subscribed for a three year term. Three 25 MW blocks were subscribed for five years. Implementation is requested for June 2009 (100 MW) and end of year (300 MW).
5116		Deliverables: This project will implement the controllable tie line for Linden VFT. The Linden VFT will be a 300 MW VFT bidirectional, controlled line from NJ to the Goethals 345 station. Linden VFT will use incremental transmission capacity on the existing 345 kV radial line that connects the Linden Cogeneration Facility to Con Ed's Goethals substation. This project will also incur cost of additional metering equipment, telephone lines at the PCC & KCC (Phase 1 data signal).
B128	Outage Scheduler Automation – Phase 2	Status: Transmission and generator outage information is submitted to the NYISO by telephone, email, and/or fax. NYISO scheduling staff then approves or disapproves the outage request and manually enters the information into a proprietary database that exists outside of the Ranger operating environment. This proprietary database is used to produce required operating and market facing outage schedule reports. Phase 1 was successfully deployed in January 2009. Phase 2 includes integration with Ranger and automation of external interfaces.
-,		Deliverables: This multi-phased project includes the replacement of the proprietary database, as well as automation of the manual processes to enter, manage and track outage information. This project also includes the automation and integration with Ranger, and the implementation of user-friendly web interfaces for TOs and Generators to submit outage requests and forced outage data.
	Finance Systems Pro	duct Enhancements
A949	Credit Management	Status: The multi-phase project will provide credit automation capabilities for each of the NYISO markets in a phased delivery fashion. Following review of the proposals, the cross-functional team selected the software product from the ROME Corporation as the platform on which to build the new system. The project was officially launched in April 2008 with discovery and detailed planning activities. Some internal credit functionality was deployed to production in November 2008. The integration of the Credit Management System and the TCC Automated System was successfully deployed on schedule in February.
АУ4У	System	Deliverables: Implementation of a rules-based system to integrate with the various NYISO market platforms for the purposes of providing a comprehensive Credit Management System for the NYISO enterprise. This multi-phase project will provide the tools necessary for the Credit Department to manage MP credit and collateral limits, provide Market Participants with tools and reports to manage their own credit, and provide integration to all NYISO market functions such that customer credit obligations are met. 2009 deliverables include Virtual Transactions (Phase 2), Energy and Ancillary Services (Phase 3) and ICAP – Software Ready (Phase 4).

	Description	Status and Milestone Deliverables
	Billing Process	Status: This project is in the discovery and requirements phase. This settlement process will ultimately require integration with the new Demand Response Program Management System.
B129	Automation – EDRP Settlements	Deliverables: The NYISO is continuing to dedicate resources to identify automated solutions to the most prevalent manual billing adjustments; this program has been identified as critical and valuable by settlements stakeholders. This project will provide an automated data processing solution for EDRP settlements. The 2009 deliverable is a software design with implementation planned for 2010.
	Consolidated Invoice Enhancements	Status: This is a multi-year project with the ultimate objective of redesigning or replacing Consolidated Invoice to provide a cleaner interface for MPs to receive settlement data and to provide greater flexibility and supportability for NYISO staff on the basis of a more robust architecture. Con Invoice has been identified for redesign or replacement to support the goals of the Settlement System Replacement (SSR) strategy. Redesign would entail leveraging the new rules engine platform to the greatest extent possible for the timely delivery of settlement invoices.
	Dusiness Intelligence	Deliverables: 2009 project objectives will deliver targeted functionality to support any changes to market rules or the settlement cycle per stakeholder discussions and approval, as well as design deliverables to support the eventual rearchitecture of the platform.
	Business Intelligence	ce Product Enhancements Status: This project continues the multi-year effort to build a new data mart designed around the needs of the Market
B139	MMP Data Mart – Phase 2 and 3	Monitoring and Performance (MMP) team. Since the data needs for this team are extensive and require much of the data that is produced by the NYISO, an initial investigation provided a prioritization for providing needed capabilities in phased approach. The Physical and Economic Withholding area of responsibility within MMP emerged as the area to provide the most value with a reasonably moderate set of data. This project leverages the significant investment NYIS has made in the Decision Support System (DSS). As this data is introduced into a new data mart for MMP it will also be made available in the existing Customer Settlements and the Pricing Data Marts where appropriate. The first phase was deployed to production in October 2008. Phase 2 is scheduled to complete the delivery of data access to Physical Withholding and Phase 3 is planned for transactions data access.
		Deliverables: Process and system reviews performed for the Market Monitoring and Performance unit during 2007 highlighted deficiencies in the tool-set available to the MMP team for performing certain monitoring and analysis functions. This project is a multi-phase, multi-year effort to provide an integrated and robust set of tools to augment existing processes and manual tools in place. Additional analysis capabilities beyond compliance requirements will be identified and provided.
B126	NYISO Public Website Redesign	Status: This is a significant project to update the NYISO public website with an emphasis on replacing old technology and moving to a more current, navigational design. The requirements for this project will incorporate input from discussions with internal stakeholders (External Affairs) and external stakeholders (Market Participants. This project is currently in the requirements phase.

	Description	Status and Milestone Deliverables
		Deliverables: This project is a redesign of the public website, including the overall look and feel (moving to a navigational design); the base technology (currently Tibco Portal builder); and the content and organization of the site.
	Infrastructure Produ	uct Enhancements
B114	HRIS/ERP System – HR Automation	Status: The NYISO Human Resources process is currently carried out by a team of HR Generalists who use a set of spreadsheet-based tools, manual data capture, and storage processes. While the manual processes are well-documented and consistently followed, they can be cumbersome and inefficient. Deliverables in 2009 are concentrated on four modules for implementation: Human Resources Information, Self Service for Employees, Advanced Benefits an Time and Labor. This project is currently on hold, pending the resolution of the Oracle software licensing issues.
		Deliverables: The end-state vision is an application with the following: supports bidirectional data flow between NYISO applications; robustness to support future expansions; easily configurable to support calculation changes; and standard and customized reporting capabilities to support analysis and business processes.
A928	Oracle Forms Replacement	Status: The project has been defined to multiple phases according to the individual business owner / functional area impacted. The first phase was completed in 2007 and involved the usage analysis and elimination of unnecessary forms. The second phase is directed at the Operations department functions and was successfully deployed in mid September. Parallel tracks of work are already addressing the other functional areas of the platform. Finance forms were successfully deployed in February.
	Kopidoomoni	Deliverables: A number of the internal use applications are developed on the Oracle Forms development platform. This technology is no longer supported by the vendor, and the replacement of this platform represents a gating factor for the upgrade of the Oracle database version. Oracle Forms applications are in use by almost every internal NYISO department for managing market data and supporting various NYISO business processes.
B138	Lotus Notes Retirement	Status: As a result of the MS Exchange Project there has been preliminary analysis performed regarding the impact to the Lotus Notes Applications and databases. Work is underway to complete the roadmap for the retirement of the application and database being utilized in Lotus Notes as the NYISO transitions to MS Exchange for E-Mail and calendaring. There needs to be a roadmap put together for the retirement of the application and databases being utilized in Lotus Notes. The migration from Notes to Exchange is currently underway, with approximately two-thirds of the migration complete.
		Deliverables: Implement MS Exchange and retire Lotus Notes.

NYISO REGULATORY FILINGS – April 2009

Apr.1, 09	NYISO section 205 tariff filing regarding recovery of penalty assessments (ER09-945-000)
Apr. 8, 09	NYISO section 205 filing regarding the cost allocation methodology for certain Rate Schedule 1 charges in the OATT and Services Tariff (ER09-971-000)
Apr. 8, 09	NYISO filing of a notification of tariff implementation errors and request for limited tariff waivers (ER09-972-000)
Apr. 10, 09	NYISO filing section 205 Linden VFT (ER09-981-000)
Apr. 10, 09	NYISO section 205 filing regarding proposed Tariff amendments to eliminate OATT provisions governing assignment of transmission service (ER09-984-000)
Apr. 15, 09	NYISO filing of a quarterly compliance report regarding progress on the netting bilaterals project (ER03-552-011, ER03-984-009)
Apr. 15, 09	NYISO filing of a Major Emergency Report to FERC (EY09-1-000)
Apr. 16, 09	NYISO filing to FERC's Office of Enforcement the balance of our response to its data request.
Apr. 17, 09	NYISO filing of a compliance report regarding unreserved use and late study penalties (OA09-26-000)
Apr. 17, 09	NYISO section 205 filing of tariff revisions regarding credit requirements for virtual transactions and TCCs (ER09-1010-000)
Apr. 17, 09	NYISO section 205 filing of tariff revisions regarding the billing and payment provisions (ER09-1009-000)
Apr. 20, 09	NYISO filing of a motion to intervene and comment regarding the Astoria and Con Ed request for tariff waiver concerning adjustments to generator meter data (ER09-942-000)
Apr. 22, 09	NYISO section 205 filing to revise the definition of intermittent power resources to include landfill gas generation (ER09-1027-000)
Apr. 27, 09	NYISO filed a Motion for Extension of Time and Request for Expedited Action. (RM07-19-000 and AD07-7-000)
Apr. 27, 09	NYISO filing of FERC Reporting Requirement No. 582

FERC ORDERS - April 2009

- Apr. 2, 09 FERC letter order granting NYISO's request for waiver of certain NAESB WEQ standards related to physical transmission reservations (ER09-643-000)
- Apr. 2, 09 FERC deficiency letter regarding NYISO's ICAP demand curve compliance reports (ER01-3001-021 and 022, ER03-647-012 and 013)
- Apr. 7, 09 FERC letter order accepting tariff revisions to conform Services Tariff language to the NYISO's practice in developing the statewide load forecast for the determination of day-ahead schedules (ER09-803-000)
- Apr. 8, 09 FERC letter order accepting tariff revisions regarding inadvertent errors in the filing of certain sheets concerning the day-ahead process for unit commitment and to align the scheduling and pricing outcomes (ER09-736-000)
- Apr. 9, 09 FERC letter order accepting compliance filing regarding NYISO's further work on self supply of operating reserves (ER03-836-007)
- Apr. 9, 09 FERC letter order accepting NYISO's fifth quarterly report on the progress it is making in pursuing changes to software modeling requirements and market rules that would improve the efficient utilization of combined cycle units within the NYISO markets (ER04-230-020, ER01-3155-014, ER1-1385-023, EL01-45-022)
- Apr. 16, 09 FERC order accepting NYISO's LTFTR compliance filings and denying various requests for rehearing (ER07-521-006, 007 and 008)
- Apr. 24, 09 FERC order approving an uncontested settlement and accepting a compliance filing regarding the NYCA minimum UCAP requirement for a given Capability Period (EL05-17-003, 004, 005 and 006)
- Apr. 28, 09 FERC notice granting NYISO an extension of time to make a compliance filing regarding the final rule issued on October 17, 2008 concerning competition in organized markets (RM07-19-000, AD07- 7-000)

This list is current as of 02:01 PM April 27, 2009.
