Market Performance Highlights for January 2010

PRELIMINARY DATA (Most data through 1/18)

- LBMP for January is \$72.22/MWh, up from \$55.63/MWh in December 2009.
 - Average monthly cost is \$75.67/MWh, up from \$59.50/MWh in December 2009.
 - Day Ahead and Real Time LBMPs have increased from December 2009.
- Average daily sendout is 455GWh/day in January, up from 447GWh/day in December 2009 and lower than the January 2009 sendout of 470GWh/day.
- All Fuel prices are up this month compared to last month.
 - Kerosene is \$16.20/MMBtu, up from \$15.14/MMBtu in December.
 - No. 2 Fuel Oil is \$15.14/MMBtu, up from \$14.00/MMBtu in December.
 - No. 6 Fuel Oil is \$12.56/MMBtu, up from \$11.89/MMBtu in December.
 - Natural Gas is \$9.29MMBtu, up from \$6.90/MMBtu in December.
- Uplift per MWh is down from the previous month.
 - Uplift (not including NYISO cost of operations) is \$0.89/MWh, down from \$1.45/MWh in December 2009.
 - No Thunderstorms Alerts were called in January (\$0.00/MWh)
 - The Local Reliability Share is \$0.61/MWh
 - The Other Share is \$0.28/MWh
 - Total uplift (Schedule 1 components including NYISO Cost of Operations) is trending lower than December 2009.

Daily NYISO Average Cost/MWh (Energy & Ancillary Services)* 2009 Annual Average \$48.63/MWh January 2009 YTD Average \$75.55/MWh January 2010 YTD Average \$75.67/MWh \$240 \$220 \$200 \$180 \$160 \$140 \$120 \$100 \$80 \$60 \$40 \$20 \$0 3/26 4/23 10/8 11/5 12/3 7 6/4 7/2 2010 **-**2009

Market Monitoring Prepared: 1/19/2010 2:53 PM

^{*} Excludes ICAP payments.

These numbers reflect the true-ups thru June 2009.

Market Monitoring Prepared: 1/25/2010 9:18 AM

^{*} Excludes ICAP payments.

DAM Contract Balancing amounts are for payments made to generating units to make them whole for being dispatched below their Day-Ahead schedule, as a result of out-of-merit dispatches.

DAM Bid Production Cost Guarantees for Virtual Transactions are included in the chart and are shown from the inception of Virtual Transactions. These values are small and cannot be identified on the chart.

DAM residuals consist of both energy and loss revenue collections and payments. By design, there is a net over collection of revenues due to the difference between the marginal losses paid to generation and the average losses charged to loads.

ISO Operations & Reliability Performance Metrics Report **Period Ending January 2010** All reliability metric performances are normal. Frequency threshold exceedences primarily attributed to interconnection system events outside the NYISO. **Alert State Declarations** 100 **System State Declarations** 80 ACE Threshold Exceedance Occurrences 60 40 **Adverse Operating Conditions** 20 **Communications Degradation** Jan-Feb-Aug-Sep-Oct- Nov- Dec-**Frequency Threshold** May-Jun-09 09 09 09 09 09 09 09 09 09 Exceedance Interface Transfer Limit (IROL) Exceedance **Major Emergency State Declarations** 10 **Neighboring System in Voltage** Reduction Occurrences **Operating Reserve Deficiency** Thermal Rating Limit (SOL) **Exceedance** Voltage Rating Limit (SOL) Exceedance Feb-Mar-Sep-Nov- Dec-Jan-Apr-May-Jun-Jul-Aug-Oct-Jan-09 09 **NERC IROL Time Over Limit NERC IROL** 45 Average time over limit (minutes) 30 Minutes **NERC IROL Time Limit** 15 0 Aug-09 Jan- Feb-Mar-May-Jun-Jul-Sep-Nov- Dec-09 09 09 09 09 09 09 09 09 09 10 Definitions **Alert State Declarations:** The number and causes of Alert State declarations reflect system operating conditions beyond thresholds associated with Normal and Warning States. Declaration of the Alert State allows the NYISO to take corrective actions not available in the Normal and Warning States.

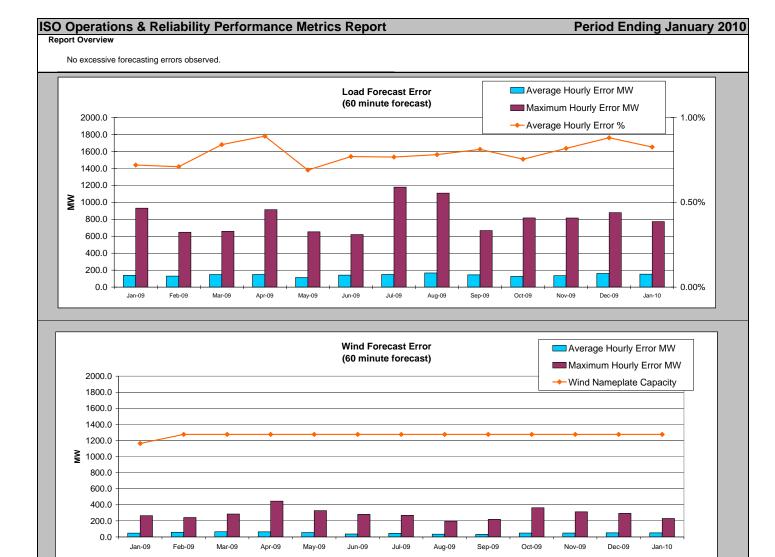

Major Emergency State Declarations:

The number and causes of Major Emergency State declarations reflect system operating conditions beyond thresholds associated with the Alert State. Declaration of the Major Emergency State allows the NYISO to take aggressive corrective actions not available in the Alert State.

NERC IROL Time Over Limit:

For IROL exceedances leading to a Major Emergency State declarations, the average time for which the limit is exceeded. IROL exceedances that last for more than thirty minutes are considered a non compliance event.

Definitions

Load Forecast Error

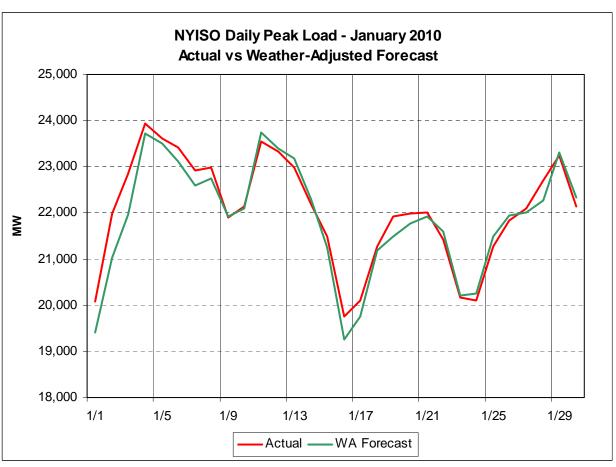

Absolute value of the difference between the hourly average actual load demand and the average 60-minute forecast load demand.

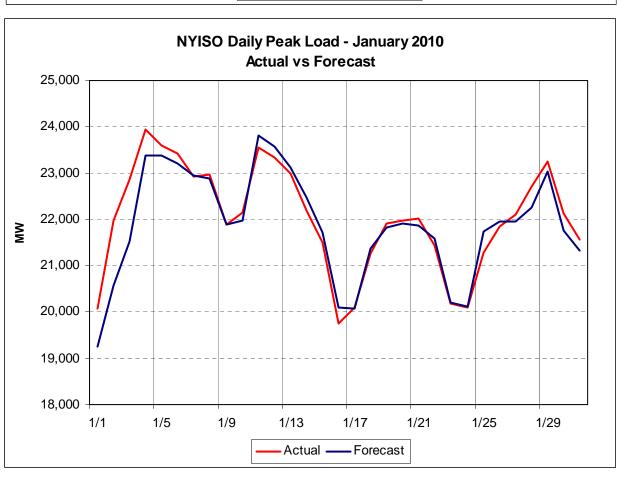

Average Hourly Error % - Average value of the ratio of hourly average error magnitude to hourly average actual load demand.

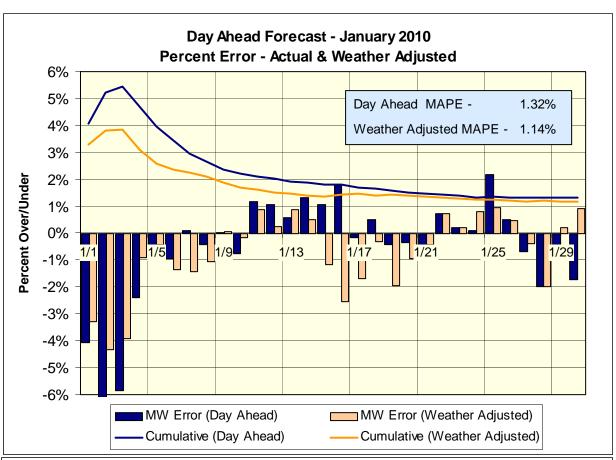

Wind Forecast Error:

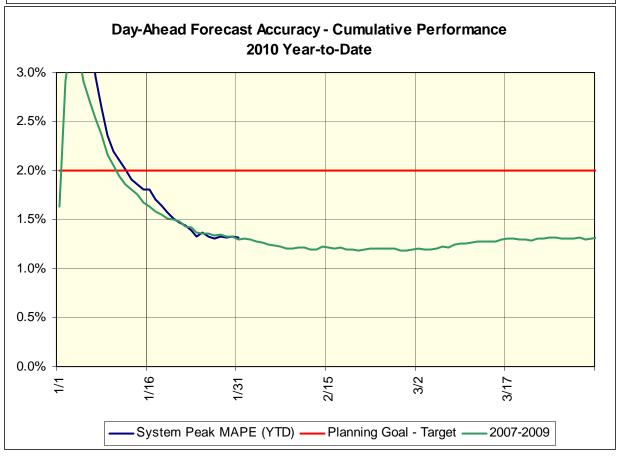

Absolute value of the difference between the hourly average actual wind generation and the average 60-minute forecast wind generation.

Wind Nameplate Capacity - Maximum value of installed NYCA wind generator capacity.

Description	Status and Milestone Deliverables
	•
Auxiliary Market Produc	
Demand Curve Reset	Status: NERA is the consultant performing the demand curve study. This is an ongoing process with many stakeholder discussions planned throughout 2010. NERA is proposing to use the same econometric model for Energy and Ancillary Service revenue as the previous study.
	Deliverables: Per the Market Services Tariff, the NYISO will be developing new sets of demand curves for the capacity market in 2010, with a requirement to file the new curves with FERC by 11/30/2010.
	Status: Phase 1 was successfully deployed in the 4 th quarter of 2009. The remainder of the work is scheduled for 2010. The Market Participant User Interface is scheduled for deployment in June and the final phase is scheduled to be software ready at the end of the 4 th quarter.
Demand Response Information System	Deliverables: The Demand Response Information System project is a multi-year project to automate the current core functionality of Registration Processing, Event Notification, and Reporting, as well as the ICAP/SCR Processing and the Event Performance, Management and Settlement Preparation calculations. The project also includes new functionality in Event and Meter Data Management and Marketplace functions.
	Status: These software enhancements to the existing ICAP automated system are scheduled for deployment in March.
ICAD Import Dights Madeling Capabilities	Deliverables: This project would implement new capability to model external locations to the sub zone level to support any new interfaces including, HQEX, HQ-Cedars, NPX-AC, NPX-CSC, OH-AC, PJM-AC, and PJM-Neptune. Specifically, the project will address:
ICAP Import Rights Modeling-Capabilities for New Interfaces	Multiple import rights models at each physical interface
Tor New Interfaces	Specific modeling to treat Unforced Capacity Deliverability Rights (UDRs)
	Additional flexibility to model and track wheel-throughs
	 Apportioning of CRIS and ERIS for exports Monthly adjustment in import limits to account for deliverability rules
	Support of buyer-side mitigation as necessary
	Status: Discussions are currently underway with the expectation that market rule changes will be minimal if aggregations are treated in the same manner as individual DSASP resources. NYISO is scheduled to complete the market design in the 1 st quarter.
Demand Response Aggregations in DSASP	Deliverables: Based on the NYISO's response to FERC Order 719, NYISO will be investigating the changes needed to accommodate aggregated small demand response resources providing ancillary services (DSASP). The current DSASP program allows individual resource participation through a TO; this project would allow multiple demand response resources to participate in DSASP by providing an aggregate signal through a TO to the NYISO. The primary effort involves discussions with NPCC and the NYSRC on any potential rule changes in their areas.

Description	Status and Milestone Deliverables				
	Status: Implementation of the software enhancements is scheduled for 3 rd quarter 2010.				
	Deliverables: On the basis of FERC's June 23, 2009 ruling and NYISO's filing on External CRIS Rights due October 2009, there will be additional modifications to the ICAP AMS to implement the rules associated with External CRIS Rights, specifically:				
	 Identifying external suppliers, bilateral contracts, and commitments to offer market capacity associated with Long-Term External CRIS Rights 				
Final Deliverability Rules	Tracking the duration of rights awards and specific months when offers are required				
	 Imposition of an offer cap (\$/kW-mo); creating and modifying the values associated with the cap Tracking of offer behavior, and identification of situations where an entity with Long-Term External CRIS Rights is in violation of its commitment 				
	Renewal of Long-Term External CRIS Rights				
	Transfer of rights to another entity; ability to allow partial MW transfer of rightsCompatibility with existing import rights process for short-term imports				
	Status: The NYISO and its stakeholders will jointly develop the rationale for creating additional capacity zones, which was a recommendation in the 2008 State of the Market report. The Market Design Concept is scheduled for completion in the 4 th quarter 2010.				
Criteria for New Capacity Zones	Deliverables: Significant modification of the existing code design will be required to provide the flexibility to accommodate the creation and deletion of new capacity zones. Another area that will be addressed is the modeling of imports; all imports are currently modeled into the ROS region, but there will be situations where imports from one external control area will enter multiple NYISO capacity zones.				
	Status: The NYISO will work with its stakeholders to develop a Market Design Concept by the end of the 2 nd quarter.				
Capability Period Alignment	Deliverables: The NYISO's Capacity Market Capability Year runs from May through the following April; both ISO-NE's and PJM's capability years begin in June. The misalignment of capability years creates issues for suppliers importing capacity into NY from PJM or ISO-NE for use in the NYISO's strip auction, and also impacts NY LSE IRM/locality requirements. This project will consider the extent of market rule changes, software changes and potential operations procedure changes that would be required to align NY's capability year with those of PJM and ISO-NE.				

Description

2010 Major Product Enhancements

Status and Milestone Deliverables

Business Intelligence	Products				
	Status: NYISO partnered with ISO-NE, PJM and SPP to contract with a vendor to develop the software needed for FERC compliance. NYISO is scheduled to be software ready in the 2 nd quarter and awaiting confirmation of FERC concurrence with NYISO's proposed timing for an initial baseline filing.				
E-Tariff	Deliverables: This is a project to comply with FERC Order 714 by April 1, 2010. The NYISO must implement a system to electronically manage the submission of all tariff filings with FERC, using a FERC mandated XML format. This project will also involve the migration of both NYISO tariffs from a page-based format to a record-based format and will culminate in an initial baseline filing for each of the two tariffs.				
	Status: NYISO is scheduled to implement the new E-Room for Planning by the end of the 2 nd quarter 2010.				
E-Planning Collaboration	Deliverables: The interactive collaboration provided by NYISO today for planning studies uses a combination of email, burned CDs and posting to a secured area of the NYISO website. This is difficult to administer and does not provide the robust functionality desired. This project would provide for a new collaborative environment through the use of Microsoft SharePoint.				
	Status: The NYISO is currently evaluating the most economic and efficient means of obtaining access to this data. Access to this data is scheduled for delivery in 4 th quarter 2010.				
Non-NYISO Transactions Data Access	Deliverables: This data is currently gathered manually on an ad-hoc basis. This project would focus on providing access to data from surrounding control areas to NYISO's Market Mitigation and Analysis Unit. The project will also provide access to the tools necessary to analyze this data.				
	Status: This project is scheduled for delivery in September 2010.				
Intranet Redesign	Deliverables: The NYISO has not updated the technological platform or the design of the NYISO Intranet since its inception. This is an internal NYISO project with the purpose of moving the site, which currently exists on outdated technology, to a new technological platform for the benefit of content publishing, ease of navigation and maintenance.				

Description	Status and Milestone Deliverables				
	Status: Web Postings refers to a series of Tibco Business Works processes that generate and publish various CSV, PDF, and HTML files to NYISO's OASIS site (http://mis.nyiso.com/public). These files include zonal and generator pricing data for the Real-Time, Hour-Ahead, and Day-Ahead markets, outage data, interface limits & flows, PAR schedules & flows, actual load and load forecasts, various reports, and other publicly available data used by our Market Participants. There are over 40 postings in total that publish to the site throughout the day. Phase I is scheduled for deployment in 4 th quarter of 2010.				
Web Posting Enhancements	 Deliverables: The Web Posting Enhancement project is a multi-year project with phased deliverables to address the following objectives: Improve reliability and performance of the web posting process 				
	 Eliminate dependency on proprietary Tibco technology for Postings Ensure pricing data quality across NYISO systems with authoritative transactional source for prices and price versions 				
	 Improve reliability and greatly simplify DSS price data integration Address NAESB WEQ-002 posting technical requirements 				
Energy Markets Product	s				
Long Term Loop Flow Response-Buy	Status: As a result of the events leading to the 2008 Lake Erie loop flow issues, in 2009 the NYISO, PJM, ISO-NE and MISO identified solutions to the costs imposed on the non scheduling RTO.				
Through Congestion	Deliverables: This project will focus on designing software and rules in conjunction with neighboring control areas to mitigate the effect of loop flows on our systems.				
PJM Congestion Management Market Flow Calculator	Status: In late-2006, PJM approached NYISO, interested in developing a program to allow inter-control area dispatch to help manage congestion. PJM has implemented a program with MISO and is currently in the early stages of designing such a program with SPP. In 2007, NYISO initiated discussions with PJM to further understand the MISO program and begin to outline a conceptual straw proposal for a similar program between PJM and NY. NYISO has continued to define the details of a Congestion Management protocol between NYISO and PJM. In 2009, NYISO worked with PJM and NYISO stakeholders to develop a Congestion Management protocol.				
	Deliverables: Before this protocol can be implemented, automated software to calculate the market flow between PJM and NY must be created. In 2010 NYISO will evaluate whether to build or buy software to implement this calculator. Once implemented, NYISO will analyze flows to determine with PJM and NYISO stakeholders the proper basis for compensation.				

Description	Status and Milestone Deliverables
Interregional Transaction Coordination	Status: Currently, energy transactions between the NYCA and other control areas are evaluated economically once for the hour.
Interregional Transaction Coordination Phase 1-HQ on Dispatch	Deliverables: This project will focus on instituting an intra-hour economic evaluation and scheduling of transactions with neighboring control areas, starting with the HQCA.
	Status: Currently ancillary services are procured from internal resources only.
Interregional Transaction Coordination Phase 2-Ancillary Services	Deliverables: This project will focus on designing a method to economically evaluate and schedule the reserve and regulation products from neighboring control areas, starting with the HQCA.
Increasing Bids in RT	Status: Currently generators with accepted Day Ahead bids are prohibited from increasing the accepted portion of their bids in the Real Time markets. Circumstances can arise, such as fuel outages or restrictions, which cause the accepted DA bids to no longer be representative of the units' actual costs.
	Deliverables: This project will allow these resources to represent their new costs in Real Time.
Scheduling & Pricing Phase 4 – Modify	Status: Currently Day Ahead scheduled transactions are carried over into the Real Time market as price takers to insure prioritization, their prices are set to the bid floors. Curtailments of these transactions in Real Time can then lead to an arbitrary price of -\$999.70. This can lead to significant balancing residuals.
Transaction Default Settings	Deliverables: This project will evaluate the feasibility and appropriateness modifying this default value and implement this new value.
Finance Products	
	Status: In 2009, the project delivered functionality for the TCC Market, Credit Infrastructure, Virtual Transactions Market and ICAP Market. In 2010, the project is planned to provide the functionality required to support the (1) Energy and Ancillary Services Market, (2) 2 year TCCs and (3) Market Participant User Interface.
Credit Management System	Deliverables: Streamline, automate, and integrate the credit management processes through a Credit Management System (CMS) to make the processes more efficient and auditable. The end state vision for this multi-year project is an automated and integrated CMS that provides a real time credit position and settlement results netted across all markets. NYISO and MPs will be able to manage collateral as a portfolio and make business decisions using analytical tools and information through a user interface. In addition, the NYISO will be able to leverage automation to implement credit requirements that are better matched to market risk.

Description

2010 Major Product Enhancements

Status and Milestone Deliverables

Infrastructure Product	S
	Status: This project continues the roadmap initiated with a 2009 project that enabled support for Microsoft-based applications for market participants.
Identity and Access Management	Deliverables: This multi-year project will deliver a foundation for enterprise-wide identity and access management to achieve compliance. Technical controls and workflows will manage employee user identities and access rights to widely used critical cyber assets defined by NERC CIP. The solution will provide reporting and visibility to current access entitlements and immediate revocation of rights on employee exit.
Data Warehouse Platform Evolution	Status: With data intensive initiatives, NYISO requires a high performance scalable cost effective data warehouse platform. The Netezza data warehouse appliance will allow NYISO IT to deliver business intelligence projects faster, greatly increase reporting performance and make data available sooner for reporting.
	Deliverables: NYISO will migrate the existing datamarts to the new platform in 2010 to achieve business and technical benefits for current and planned DSS development efforts.
Shared Governance Voting Software	Status: The ISO Agreement requires that the NYISO facilitate a voting process as defined in the Agreement. This voting process is currently conducted via a laptop spreadsheet program (Lotus 1-2-3), which was developed at the inception of the NYISO. The existing voting program presents some risk to the NYISO as it based upon unsupported software and has no provisions for change management.
Shared Governance voting Software	Deliverables: This project will replace the existing software with a more robust and reliable application. The new application will provide flexibility to adapt to potential changes in the future, while also providing a reliable and supportable platform.
Operations and Reliabi	lity Products
	Status: This is a continuation of a multi-phased project focusing on the next generation of the Reference Level Software. In 2009 NYISO developed detailed requirements and a design. Implementation is scheduled for September 2010.
Reference Level Software	Deliverables: 2010 will focus on building and implementing the new Reference Level Software, as well as implementing required changes in other existing NYISO applications, e.g. MIS. It is critical that the NYISO continue to address several identified issues with the calculation and management of the reference price process, and to automate several manual processes related to the reference price process. NYISO will also certify that the reference level calculations are in compliance with required tariffs through an independent validation of application results. The certification will be completed prior to deploying the Reference Level Software to production.

	20 TO Major 1 Todast Emilancements
Description	Status and Milestone Deliverables
Wind Management Evolution – Meteorological Data Submission	Status: As more generation from wind resources is added to the system, it becomes increasingly important for NYISO to have strong tools at its disposal to manage these resources in a reliable manner. The NYISO has begun achieving that goal by implementing an intelligent wind power forecasting program, and a process to dispatch wind resources using an economic evaluation. Additionally, NYISO conducted a study assessing the implications of large wind integration in New York, including the impacts on market rules, grid reliability, system cost, and ancillary services.
	Deliverables: This project will continue expanding NYISO's ability to effectively and reliably manage wind power integration into the NY Bulk Power Grid by providing NYISO operations with tools to enhance their ability to see significant wind ramp events before they occur through the enhanced collection of meteorological data from each wind resource.
Outage Scheduler Phase III	Status: Transmission and generator outage information is submitted to the NYISO by telephone, email, and/or fax. NYISO scheduling staff then approves or disapproves the outage request and manually enters the information into a proprietary database that exists outside of the Ranger operating environment. This proprietary database is used to produce required operating and market facing outage schedule reports. Phase 1 was successfully deployed in January 2009. Phase 2 was deployed in October 2009 and included integration with Ranger and automation of external interfaces. Phase 3 is scheduled for 2010.
	Deliverables: This multi-phased project includes the replacement of the proprietary database, as well as automation of the manual processes to enter, manage and track outage information. This project also includes the automation and integration with Ranger, and the implementation of user-friendly web interfaces for TOs and Generators to submit outage requests and forced outage data.
Planning and TCC Mar	ket Product Enhancements
	Status: NYISO has engaged stakeholders in discussions regarding desired functionality in the end state. Specifically, the following functionality will be addressed as part of Phase 1:
TCC Auction Enhancement Features - Phase I	 Seasonal Auction Changes (An important feature of the end state auction engine is that it can simultaneously evaluate bids and offers for TCCs of multiple durations, permitting the NYISO to sell six-month and annual TCCs within the same auction round, and add auctions of TCCs additional durations, without extending the length of the auction). Monthly Auction Changes (The ability of the end-state auction to simultaneous sell or reconfigure TCCs of multiple durations would enable the NYISO to expand its monthly auctions to reconfiguration auctions not only covering the next month, but the remainder of the capability period or the remainder of the year). Expanding the availability of LTFTRs (per FERC's Order) to LSEs that seek to use non-historic points of injection and withdrawal as well as making LTFTRs available to non-LSEs.

Description	Status and Milestone Deliverables					
	Deliverables. This is a multi-very project to provide for TCC Austien (Find Ctate) functionality to include.					
	 Deliverables: This is a multi-year project to provide for TCC Auction 'End State' functionality to include: Remove restrictions on TCC sales in non-reconfiguration rounds in capability period auctions by providing the opportunity to sell TCCs in any round 					
	 Implement Multi Duration Capability Period Auctions Balance of period (BOP) TCCs; revised structure of the monthly auctions 					
	Status: This project will provide NYISO with improved ability to meet CARIS requirements as outlined in NYISO's Compliance filing, Docket No. OA08-52-000, Section II, 6. & 7. and, Attachment Y of the OATT, Section 15.6 in support of FERC Order 890. This software will support the CARIS voting process.					
CARIS Voting Software	Deliverables: The CARIS voting software needs to automate the process of LSE project voting allowing for tracking results of the planning process for CARIS. Deliverables include: ➤ An internal user interface for the NYISO Planning group to allow for customizing the LSE voting list by zone, and with					
	respective weighting share for each CARIS project proposed Ability to determine the vote weight of each LSE based on project criteria Calculate the overall weighted LSE affirmative votes to two decimal places					

Summary Description of FERC Regulatory Filings, Investigations and Rulemakings and Related Orders in NYISO Matters January 2010

10/13/2009	NYISO Filing of Request for Leave to Respond and Response to Comments and Protests.	ER09-1682-000	01/15/10	FERC order denying a motion for stay of a confidentiality ruling in the 11/30/09 order and accepts in part and denies, in part, requests for rehearing of the same order – directs NYISO to further compliance filing		
11/06/2009	NYISO 205 filing – development of statewide day-ahead reliability unit (DARU)requests	ER10-231-000	01/07/10	FERC order accepting revisions subject to further compliance	Accepted - Complia	
11/16/2009	NYISO 205 filing re: credit requirements for energy and ancillary services	ER10-272-000	01/06/10	FERC letter order accepting revisions effective 1/16/10	Accepted	
11/18/2009	NYISO 205 filing re: interconnection study queue process	ER10-290-000	01/06/10	FERC deficiency letter – response required by 1/27/10	Deficiency Notice	
11/24/2009	NYISO filed a motion to defer effective date of previously accepted tariff revisions and request for waivers.	ER09-1612-002	01/22/10	FERC order granting the NYISO's 11/24/09 motion and permitting the subject tariff sheets to become effective November 12, 2009 as requested.	Accepted	
01/05/10	205 filing - Joint SGIA between NYISO, NMPC and Innovative Energy Systems (non-tariff filing)	ER10 -554-000				
01/05/10	205 filing - Joint SGIA between NYISO, NMPC and Chautauqua County (non-tariff filing)	ER10-555-000				
01/08/10	NYISO filed a Motion to Intervene and Comments (NERC ATC issue)	RD10-5-000				

01/08/10	NYISO 205 filing of Class Year Catch-up Proposal, as modified by the CPV Valley	ER10-573-000			
	proposal, and the Clarification to Attachment X Regarding the Tendering of Facilities Study Agreements				
01/08/10	NYISO 207 filing of Declaratory order regarding NYPA TCC (Poletti unit status)	EL10-33-000			
01/08/10	NYISO Compliance filing of modification of NYISO's protocols administrative mannual (Market Problem)	ER10-65-001			
01/11/10	NYISO filed a Motion to Advance the Filing Deadline for Filing Certain Compliance Reports for ICAP and Demand Curve Report	ER01-3001-025 ER03-647-015			
01/12/10	NYISO filing of Additional Report on Broader Regional Market Long-Term Solutions to Lake Erie Loop Flow	ER08-1281-000, ER08-198-000			
01/14/10	NYISO 205 filing of Proposed Tariff Revisions to Establish a One-Time Capability Year Adjustment Election for Holders of Rights to Unforced Deliverability Rights, Request for Waiver of Prior Notice Requirements, and Request for Expedited Action.	ER10-603-000			
01/15/10	NYISO filing of its annual reports to FERC on the NYISO's DSM programs, new generation projects in the NYCA, and the ICAP Demand Curves	ER01-3001-024 ER03-647-014			
01/15/10	NYISO filed its Twentieth Quarterly Report and Request to Conclude Reporting Obligation	ER04-230-045, ER01-3155-030, ER01-1385-039, EL01-45-038			

01/20/10	NYISO compliance filing to provide aggregated Bid Production Cost Guarantee payment data for each generator, and the calendar period and the total number of days within which the alleged conduct occurred for 3 unnamed generators	ER09-1682-005			
01/26/10	NYISO's Response to a Deficiency Letter Concerning the Proposed Tariff Revisions Improving the Interconnection Study Queue Process.	ER10-290-000			
01/29/10	NYISO quarterly report on its fullfillment of FERC audit requirements	PA08-3-000			
01/29/10	NYISO compliance price corrections report for prior six months	ER06-1014-000
