Market Performance Highlights for November 2010

- LBMP for November is \$44.96/MWh, up from \$39.29/MWh in October 2010.
 - Average monthly cost is \$46.89/MWh, up from \$41.58/MWh in October 2010.
 - Day Ahead and Real Time LBMPs have increased from October 2010.
- Average daily sendout is 405GWh/day in November, up from 393GWh/day in October 2010 and slightly higher than the November 2009 sendout of 401GWh/day.
- Fuel Prices are up compared to last month.
 - Kerosene is \$17.77/MMBtu, up from \$17.19/MMBtu in October.
 - No. 2 Fuel Oil is \$16.51/MMBtu, up from \$15.98/MBtu in October.
 - No. 6 Fuel Oil is \$13.55/MMBtu, up from \$12.65/MMBtu in October.
 - Natural Gas is \$4.10/MMBtu, up from \$3.70/MMBtu in October.
- Uplift per MWh is lower than the previous month.
 - Uplift (not including NYISO cost of operations) is (\$0.24)/MWh, down from \$0.21/MWh in October:
 - The TSA Share is \$0.00/MWh
 - The Local Reliability Share is (\$0.16)/MWh
 - The Other Share is (\$0.08)/MWh
 - Total uplift (Schedule 1 components including NYISO Cost of Operations) is lower than in October.

Daily NYISO Average Cost/MWh (Energy & Ancillary Services)* 2009 Annual Average \$48.68/MWh November 2009 YTD Average \$47.62/MWh November 2010 YTD Average \$57.96/MWh \$240 \$220 \$200 \$180 \$160 \$140 \$120 \$100 \$80 \$60 \$40 \$20 \$0 1/29 3/26 4/23 10/8 2/26 5/21 7/2 2/30 8/27 9/24 10/22 11/5 11/19 12/3 12/17 12/31 7 2/1 6/4 2010 **-**2009

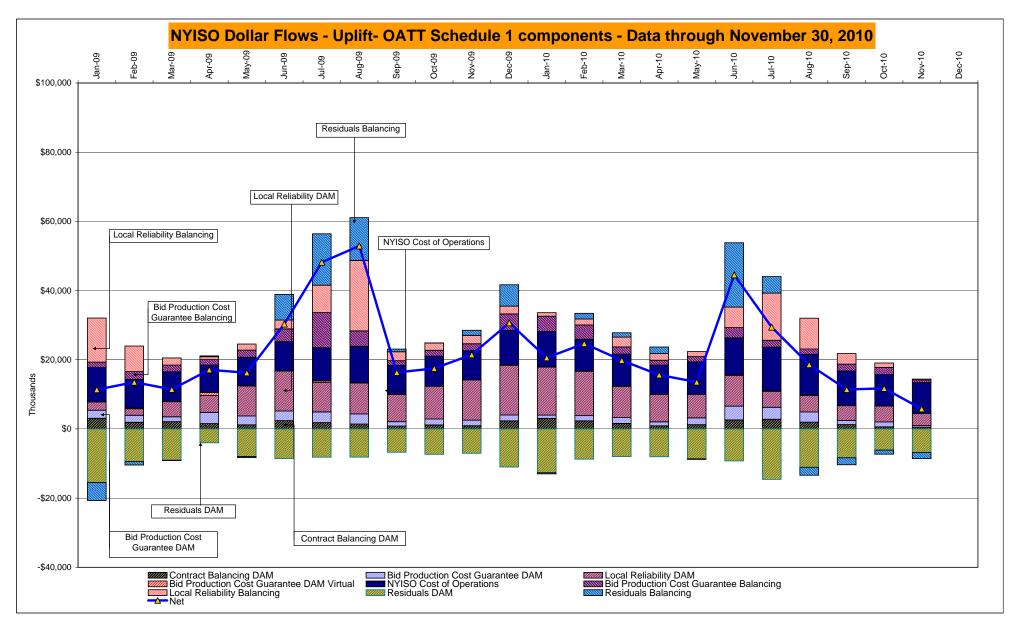

^{*} Excludes ICAP payments.

Market Mitigation and Analysis Prepared: 12/7/2010 11:44 AM

^{*} Excludes ICAP payments.

DAM Contract Balancing amounts are for payments made to generating units to make them whole for being dispatched below their Day-Ahead schedule, as a result of out-of-merit dispatches.

DAM Bid Production Cost Guarantees for Virtual Transactions are included in the chart and are shown from the inception of Virtual Transactions. These values are small and cannot be identified on the chart.

DAM residuals consist of both energy and loss revenue collections and payments. By design, there is a net over collection of revenues due to the difference between the marginal losses paid to generation and the average losses charged to loads.

⁺ Balancing Energy: Load(MW) purchased at Real Time LBMP.

Notes: Percent totals may not equal 100% due to rounding.

Virtual Transactions are not reflected in this chart.

Market Monitoring

Prepared: 1277/2010 11:51 AM Data reflects true-ups through September 2010.

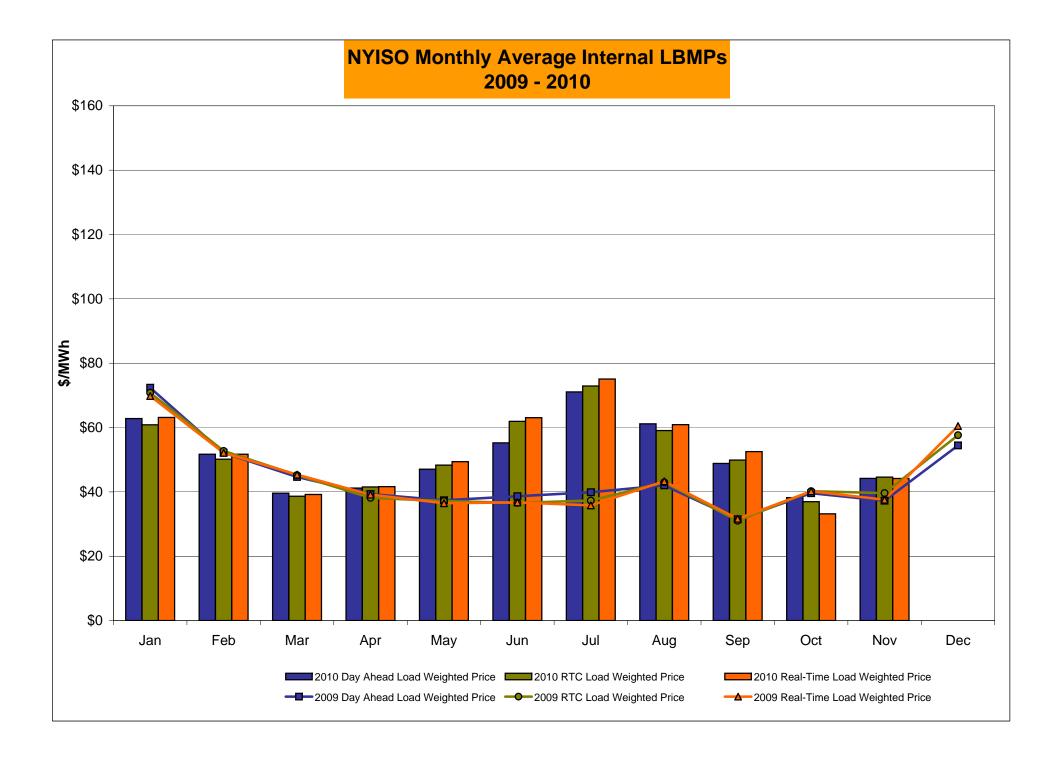

^{*} The signs for the detail section intuitively reflect the direction of power flow eliminating the use of double negatives when Balancing Energy is negative.

Description	Status and Milestone Deliverables				
Auxiliary Market Produc	*ts				
Demand Curve Reset	Status: NERA is the consultant performing the demand curve study. There were many stakeholder discussions throughout 2010 and oral arguments at the October Board meeting. The FERC filing was submitted November 30. This project is complete.				
	Deliverables: Per the Market Services Tariff, the NYISO will be developing new sets of demand curves for the capacity market in 2010, with a requirement to file the new curves with FERC by 11/30/2010.				
	Status: Phase 1 was successfully deployed in the 4 th quarter of 2009 and Phase 2 was completed in March 2010. The remainder of the work is scheduled for 2010. The Market Participant User Interface was successfully deployed in June and the final phase is scheduled to be software ready at the end of the 4 th quarter.				
Demand Response Information System	Deliverables: The Demand Response Information System project is a multi-year project to automate the current core functionality of Registration Processing, Event Notification, and Reporting, as well as the ICAP/SCR Processing and the Event Performance, Management and Settlement Preparation calculations. The project also includes new functionality in Event and Meter Data Management and Marketplace functions.				
	Status: These software enhancements to the existing ICAP automated system were successfully deployed in March. This project is complete.				
ICAP Import Rights Modeling-Capabilities	Deliverables: This project would implement new capability to model external locations to the sub zone level to support any new interfaces including, HQEX, HQ-Cedars, NPX-AC, NPX-CSC, OH-AC, PJM-AC, and PJM-Neptune. Specifically, the project will address:				
for New Interfaces	 Multiple import rights models at each physical interface Specific modeling to treat Unforced Capacity Deliverability Rights (UDRs) 				
	Additional flexibility to model and track wheel-throughs				
	 Apportioning of CRIS and ERIS for exports Monthly adjustment in import limits to account for deliverability rules Support of buyer-side mitigation as necessary 				
	Status: Discussions are currently underway with the expectation that market rule changes will be minimal if aggregations are treated in the same manner as individual DSASP resources. Through the course of working group discussions and 2010 Sector Meetings, Market Participants have specifically requested the NYISO to delay proposing a market design until telemetry alternatives can be identified, reviewed and discussed with Market Participants. The Market Design Concept was				
Demand Response Aggregations in DSASP	proposed and approved by Market Participants at the December 8 BIC.				
	Deliverables: Based on the NYISO's response to FERC Order 719, NYISO will be investigating the changes needed to accommodate aggregated small demand response resources providing ancillary services (DSASP). The current DSASP program allows individual resource participation through a TO; this project would allow multiple demand response resources to participate in DSASP by providing an aggregate signal through a TO to the NYISO. The primary effort				

Description	Status and Milestone Deliverables					
	involves discussions with NPCC and the NYSRC on any potential rule changes in their areas.					
	Status: This project was successfully deployed in September. This project is complete.					
	Deliverables: On the basis of FERC's June 23, 2009 ruling and NYISO's filing on External CRIS Rights due October 2009, there will be additional modifications to the ICAP AMS to implement the rules associated with External CRIS Rights, specifically:					
	 Identifying external suppliers, bilateral contracts, and commitments to offer market capacity associated with Long-Term External CRIS Rights 					
Final Deliverability Rules	Tracking the duration of rights awards and specific months when offers are required					
•	 Imposition of an offer cap (\$/kW-mo); creating and modifying the values associated with the cap 					
	 Tracking of offer behavior, and identification of situations where an entity with Long-Term External CRIS Rights is in violation of its commitment 					
	Renewal of Long-Term External CRIS Rights					
	 Transfer of rights to another entity; ability to allow partial MW transfer of rights 					
	 Compatibility with existing import rights process for short-term imports 					
	Status: The NYISO and its stakeholders will jointly develop the rationale for creating additional capacity zones, which was a recommendation in the 2008 State of the Market report. The initial Market Design Concept has been discussed with stakeholders; work will continue in 2011.					
Criteria for New Capacity Zones	Deliverables: Significant modification of the existing code design will be required to provide the flexibility to accommodate the creation and deletion of new capacity zones. Another area that will be addressed is the modeling of imports; all imports are currently modeled into the ROS region, but there will be situations where imports from one external control area will enter multiple NYISO capacity zones.					
	Status: The NYISO will work with its stakeholders to develop a Market Design Concept by the end of the 2 nd quarter. The Market Design Concept was discussed at a June ICAP working group meeting. Stakeholders have deemed this effort to be a low priority at this time. There is no work proposed for 2011.					
Capability Period Alignment	Deliverables: The NYISO's Capacity Market Capability Year runs from May through the following April; both ISO-NE's and PJM's capability years begin in June. The misalignment of capability years creates issues for suppliers importing capacity into NY from PJM or ISO-NE for use in the NYISO's strip auction, and also impacts NY LSE IRM/locality requirements. This project will consider the extent of market rule changes, software changes and potential operations procedure changes that would be required to align NY's capability year with those of PJM and ISO-NE.					

Business Intelligence F	Products
E-Tariff	Status: NYISO partnered with ISO-NE, PJM and SPP to contract with a vendor to develop the software needed for FERC compliance. NYISO is scheduled to be software ready in the 2 nd quarter and awaiting confirmation of FERC concurrence with NYISO's proposed timing for an initial baseline filing. The vendor software has been installed and is running in a production environment; NYISO successfully filed its baseline filing at FERC on June 30. This project is complete.
	Deliverables: This is a project to comply with FERC Order 714 by April 1, 2010. The NYISO must implement a system to electronically manage the submission of all tariff filings with FERC, using a FERC mandated XML format. This project will also involve the migration of both NYISO tariffs from a page-based format to a record-based format and will culminate in an initial baseline filing for each of the two tariffs.
	Status: NYISO is scheduled to implement the new E-Room for Planning by the end of the 2 nd quarter 2010. This project was successfully delivered in June. This project is complete.
E-Planning Collaboration	Deliverables: The interactive collaboration provided by NYISO today for planning studies uses a combination of email, burned CDs and posting to a secured area of the NYISO website. This is difficult to administer and does not provide the robust functionality desired. This project would provide for a new collaborative environment through the use of Microsoft SharePoint.
	Status: The NYISO is currently evaluating the most economic and efficient means of obtaining access to this data. Access to this data was deployed in October. This project is complete.
Non-NYISO Transactions Data Access	Deliverables: This data is currently gathered manually on an ad-hoc basis. This project would focus on providing access to data from surrounding control areas to NYISO's Market Mitigation and Analysis Unit. The project will also provide access to the tools necessary to analyze this data.
	Status: This project was successfully deployed to production in September. Communications is planning a rollout to employees during the 4 th quarter. This project is complete.
Intranet Redesign	Deliverables: The NYISO has not updated the technological platform or the design of the NYISO Intranet since its inception. This is an internal NYISO project with the purpose of moving the site, which currently exists on outdated technology, to a new technological platform for the benefit of content publishing, ease of navigation and maintenance.

Description	Status and Milestone Deliverables					
	Status: Web Postings refers to a series of Tibco Business Works processes that generate and publish various CSV, PDF, and HTML files to NYISO's OASIS site (http://mis.nyiso.com/public). These files include zonal and generator pricing data for the Real-Time, Hour-Ahead, and Day-Ahead markets, outage data, interface limits & flows, PAR schedules & flows, actual load and load forecasts, various reports, and other publicly available data used by our Market Participants. There are over 40 postings in total that publish to the site throughout the day. Phase I was successfully deployed in October.					
W.I.B. (' . E.I	Deliverables: The Web Posting Enhancement project is a multi-year project with phased deliverables to address the					
Web Posting Enhancements	following objectives: • Improve reliability and performance of the web posting process					
	Eliminate dependency on proprietary Tibco technology for Postings					
	 Ensure pricing data quality across NYISO systems with authoritative transactional source for prices and price 					
	versions					
	 Improve reliability and greatly simplify DSS price data integration 					
	 Address NAESB WEQ-002 posting technical requirements 					
Energy Markets Produ	cts					
Long Term Loop Flow Response-Buy Through Congestion	Status: As a result of the events leading to the 2008 Lake Erie loop flow issues, in 2009 the NYISO, PJM, ISO-NE and MISO identified solutions to the costs imposed on the non scheduling RTO. The Market Design Concept was approved by stakeholders at the December 8 BIC.					
Through congestion	Deliverables: This project will focus on designing software and rules in conjunction with neighboring control areas to mitigate the effect of loop flows on our systems.					
	Status: In 2009, NYISO worked with PJM and NYISO stakeholders to develop a Congestion Management protocol.					
	NYISO, and the other ISOs/RTOs have chosen a common tool, NERC's Interchange Distribution Calculator, which is being					
Congestion Management Market Flow	developed by OATI. The tool is scheduled for deployment in 1stQ 2011.					
Calculator	Deliverables: Before this protocol can be implemented, automated software to calculate the market flow between PJM					
	and NY must be created. In 2010 NYISO will evaluate whether to build or buy software to implement this calculator. Once					
	implemented, NYISO will analyze flows to determine with PJM and NYISO stakeholders the proper basis for compensation.					

Description	Status and Milestone Deliverables					
Interregional Transaction Coordination	Status: Currently, energy transactions between the NYCA and other control areas are evaluated economically once for the hour. This project is targeted for deployment in March 2011.					
Phase 1-HQ on Dispatch	Deliverables: This project will focus on instituting an intra-hour economic evaluation and scheduling of transactions with neighboring control areas, starting with the HQCA.					
	Status: Currently ancillary services are procured from internal resources only.					
Interregional Transaction Coordination Phase 2-Ancillary Services	Deliverables: This project will focus on designing a method to economically evaluate and schedule the reserve and regulation products from neighboring control areas, starting with the HQCA.					
Increasing Bids in RT	Status: Currently generators with accepted Day Ahead bids are prohibited from increasing the accepted portion of their bids in the Real Time markets. Circumstances can arise, such as fuel outages or restrictions, which cause the accepted DA bids to no longer be representative of the units' actual costs. This project was deployed in October. This project is complete.					
	Deliverables: This project will allow these resources to represent their new costs in Real Time.					
Scheduling & Pricing Phase 4 – Modify	Status: Currently Day Ahead scheduled transactions are carried over into the Real Time market as price takers to insure prioritization, their prices are set to the bid floors. Curtailments of these transactions in Real Time can then lead to an arbitrary price of -\$999.70. This can lead to significant balancing residuals. The required software changes were successfully deployed in March. This project is complete.					
Transaction Default Settings	Deliverables: This project will evaluate the feasibility and appropriateness of modifying this default value and implement this new value.					
Finance Products						
Credit Management System	Status: In 2009, the project delivered functionality for the TCC Market, Credit Infrastructure, Virtual Transactions Market and ICAP Market. In 2010, the project is planned to provide the functionality required to support the (1) Energy and Ancillary Services Market, (2) 2 year TCCs and (3) Market Participant User Interface. Energy, Ancillary Services and 2 year TCCs were successfully deployed in June. The final phase of the project, the Market Participant User Interface, was successfully deployed in October. This project is complete.					
	Deliverables: Streamline, automate, and integrate the credit management processes through a Credit Management System (CMS) to make the processes more efficient and auditable. The end state vision for this multi-year project is an automated and integrated CMS that provides a real time credit position and settlement results netted across all markets. NYISO and MPs will be able to manage collateral as a portfolio and make business decisions using analytical tools and					

Description	Status and Milestone Deliverables
	information through a year interface. In addition the NVICO will be able to laware automatic the investment and the
	information through a user interface. In addition, the NYISO will be able to leverage automation to implement credit requirements that are better matched to market risk.
Infrastructure Products	
	Status: This project continues the roadmap initiated with a 2009 project that enabled support for Microsoft-based applications for market participants.
Identity and Access Management	Deliverables: This multi-year project will deliver a foundation for enterprise-wide identity and access management to achieve compliance. Technical controls and workflows will manage employee user identities and access rights to widely used critical cyber assets defined by NERC CIP. The solution will provide reporting and visibility to current access entitlements and immediate revocation of rights on employee exit.
Data Warehouse Platform Evolution	Status: With data intensive initiatives, NYISO requires a high performance scalable cost effective data warehouse platform. The Netezza data warehouse appliance will allow NYISO IT to deliver business intelligence projects faster, greatly increase reporting performance and make data available sooner for reporting. The Pricing Datamart was successfully migrated to the new platform in August.
	Deliverables: NYISO will migrate the existing datamarts to the new platform in 2010 to achieve business and technical benefits for current and planned DSS development efforts.
Shared Governance Voting Software	Status: The ISO Agreement requires that the NYISO facilitate a voting process as defined in the Agreement. This voting process is currently conducted via a laptop spreadsheet program (Lotus 1-2-3), which was developed at the inception of the NYISO. The existing voting program presents some risk to the NYISO as it based upon unsupported software and has no provisions for change management. This project was delivered on time in March. This project is complete.
Shared Governance voting Software	Deliverables: This project will replace the existing software with a more robust and reliable application. The new application will provide flexibility to adapt to potential changes in the future, while also providing a reliable and supportable platform.
Operations and Reliabili	
	Status: This is a continuation of a multi-phased project focusing on the next generation of the Reference Level Software. In 2009 NYISO developed detailed requirements and a design. This project was successfully deployed in October.
Reference Level Software	Deliverables: 2010 will focus on building and implementing the new Reference Level Software, as well as implementing required changes in other existing NYISO applications, e.g. MIS. It is critical that the NYISO continue to address several identified issues with the calculation and management of the reference price process, and to automate several manual processes related to the reference price process. NYISO will also certify that the reference level calculations are in compliance with required tariffs through an independent validation of application results. The certification will be completed prior to deploying the Reference Level Software to production.

Description	Status and Milestone Deliverables						
Wind Management Evolution – Meteorological Data Submission	Status: As more generation from wind resources is added to the system, it becomes increasingly important for NYISO to have strong tools at its disposal to manage these resources in a reliable manner. The NYISO has begun achieving that goal by implementing an intelligent wind power forecasting program, and a process to dispatch wind resources using an economic evaluation. Additionally, NYISO conducted a study assessing the implications of large wind integration in New York, including the impacts on market rules, grid reliability, system cost, and ancillary services. This project was deployed in June. This project is complete.						
	Deliverables: This project will continue expanding NYISO's ability to effectively and reliably manage wind power integration into the NY Bulk Power Grid by providing NYISO operations with tools to enhance their ability to see significant wind ramp events before they occur through the enhanced collection of meteorological data from each wind resource.						
Outage Scheduler Phase III	Status: Transmission and generator outage information is submitted to the NYISO by telephone, email, and/or fax. NYISO scheduling staff then approves or disapproves the outage request and manually enters the information into a proprietary database that exists outside of the Ranger operating environment. This proprietary database is used to produce required operating and market facing outage schedule reports. Phase 1 was successfully deployed in January 2009. Phase 2 was deployed in October 2009 and included integration with Ranger and automation of external interfaces. Phase 3 was deployed in October. This project is complete.						
·	Deliverables: This multi-phased project includes the replacement of the proprietary database, as well as automation of the manual processes to enter, manage and track outage information. This project also includes the automation and integration with Ranger, and the implementation of user-friendly web interfaces for TOs and Generators to submit outage requests and forced outage data.						
Planning and TCC Marl	ket Product Enhancements						
	Status: NYISO has engaged stakeholders in discussions regarding desired functionality in the end state. Specifically, the following functionality will be addressed as part of Phase 1:						
TCC Auction Enhancement Features - Phase I	 Seasonal Auction Changes (An important feature of the end state auction engine is that it can simultaneously evaluate bids and offers for TCCs of multiple durations, permitting the NYISO to sell six-month and annual TCCs within the same auction round, and add auctions of TCCs additional durations, without extending the length of the auction). Monthly Auction Changes (The ability of the end-state auction to simultaneous sell or reconfigure TCCs of multiple durations would enable the NYISO to expand its monthly auctions to reconfiguration auctions not only covering the next month, but the remainder of the capability period or the remainder of the year). Expanding the availability of LTFTRs (per FERC's Order) to LSEs that seek to use non-historic points of injection and withdrawal as well as making LTFTRs available to non-LSEs. 						

Description	Status and Milestone Deliverables				
	NYISO successfully delivered functionality supporting Offers in Any Round in June.				
	 Deliverables: This is a multi-year project to provide for TCC Auction 'End State' functionality to include: Remove restrictions on TCC sales in non-reconfiguration rounds in capability period auctions by providing the opportunity to sell TCCs in any round Implement Multi Duration Capability Period Auctions Balance of period (BOP) TCCs; revised structure of the monthly auctions Status: This project will provide NYISO with improved ability to meet CARIS requirements as outlined in NYISO's Compliance filing, Docket No. OA08-52-000, Section II, 6. & 7. and, Attachment Y of the OATT, Section 15.6 in support of FERC Order 890. This software will support the CARIS voting process. This project was successfully deployed in July. This project is complete. 				
CARIS Voting Software	 Deliverables: The CARIS voting software needs to automate the process of LSE project voting allowing for tracking results of the planning process for CARIS. Deliverables include: ➤ An internal user interface for the NYISO Planning group to allow for customizing the LSE voting list by zone, and with respective weighting share for each CARIS project proposed ➤ Ability to determine the vote weight of each LSE based on project criteria ➤ Calculate the overall weighted LSE affirmative votes to two decimal places 				

Summary Description of FERC Regulatory Filings, Investigations and Rulemakings and Related Orders in NYISO Matters 2007-2009

Filing Date	Filing Summary	Docket	Order Date	Order Summary	Outcome
07/06/2010	NYISO filing of a Request for Rehearing and Clarification of FERC's June 4, 2010 Order on Compliance Filing regarding proposed "traffic ticket" violations	ER09-1142-008	11/05/2010	FERC order denying rehearing and granting clarification	Rejected - Unfavorable
07/21/2010	NYISO 205 Filing for BPCG and DAMAP	ER10-1866-000	11/03/2010	FERC letter order accepting revisions and subsequent errata filing in ER10-1866-000, 001 and 002	Accepted
8/10/2010	NYISO errata to correct some administrative errors which will more accurately reflect the tariff language in Bid Production Cost guarantee payment ("BPCG") filing (July 21, 2010)	ER10-1866-001	11/03/2010	FERC letter order accepting revisions and subsequent errata filing in ER10-1866-000, 001 and 002	Accepted
09/27/2010	NYISO 205 filing of Proposed Revisions to MST Attachment H for Enhancements to In-City Buyer-Side Capacity Mitigation Measures, Request for Expedited Commission Action, and Contingent Request for Waiver of Prior Notice Requirement	ER10-3043-000	11/26/2010	FERC order accepting and rejecting in part and directing further compliance	Accepted - Compliance Rqrd
09/28/2010	NYISO Errata to Filing to Revise Provisions concerning Guarantee and Margin Assurance Payments and Rules for Implementation of Improved Reference Levels for Generators that Are Not Able to Complete their Minimum Run Time Within the Dispatch Day and Request for Expedited Treatment	ER10-1866-002	11/03/2010	FERC letter order accepting revisions and subsequent errata filing in ER10-1866-000, 001 and 002	Accepted
09/29/2010	Errata Filing on Real-Time Energy Offers Filing (July 26, 2010). The NYISO previously made a filing on July 21, 2010, concerning some of the same tariff sections	ER10-1977-003	11/03/2010	FERC letter order accepting revisions effective 9/30/10 as requested	Accepted
10/12/2010	NYISO refiling of proposed tariff amendments for Late Day Start, IBRT, and RLS. Originally filed on 7/21/10,	ER11-92-000	11/03/2010	FERC letter order accepting revisions	Accepted - Compliance Rqrd

Filing		D 1 4	Order		
Date	Filing Summary	Docket	Date	Order Summary	Outcome
	7/26/10, and 7/30/10 respectively				
11/01/2010	NYISO 205 filing of an executed LGIA among the NYISO, LIPA and Long Island Solar Farm	ER11-1975-000			
11/1/2010	NYISO Filing a Request of Answer to its Independent MMU and Answer to Comments and Protests	ER10-3043-000			
11/02/2010	NYISO Motion to Intervene and Request for Additional Time to File Comments, and Request for Expedited Commission	ER11-1844-000			
11/08/2010	NYISO compliance filing – OATT Attachment C re: Order Nos. 729-B and 890 calculating Available Transfer Capability and other values	ER11-2048-001			
11/15/2010	NYISO compliance re: IBRT and RLS	ER10-2062-000, 001, ER10-1977- 000, 001, 002			
11/16/2010	NYISO supplemental filing of certificate of service for 11/15/10 IBRT and RLS filing	ER10-2062-000, 001, ER10-1977- 000, 001, 002			
11/17/2010	NYISO Filed It's Protest Against Midwest ISO/ITC PAR Cost Allocation Proposal	ER11-1844-000			
11/22/2010	NYISO Filing of a Request for Clarification or Rehearing of Aspects of Order No. 741 and Request for Expedited Action	RM10-13-000			
11/24/2010	NYISO Motion For Leave to Answer and Answer in Response to Request for Rehearing of the Alliance, IPPNY and TransCanada	ER10-2220-000, 003			
11/29/2010	NYISO 205 filing of LGIA among NYISO, Con Edison and Bayonne Energy Center	ER11-2199-000			
11/30/2010	NYISO 205 filing of tariff revisions to clarify its Locational Based Marginal Pricing Calculation (LBMP)	ER11-2217-000			
11/30/2010	NYISO 205 Filing Regarding Tariff Revisions to Implement Revised ICAP Demand Curves for Capability Years 2011/2012, 2012/2013 and 2013/2014	ER11-2224-000
