# ***Operations Performance Metrics Monthly Report***

## ***November 2011 Report***

### **Operations & Reliability Department New York Independent System Operator**

Prepared by NYISO Operations Analysis and Services, based on settlements initial invoice data collected on or before December 8, 2011.

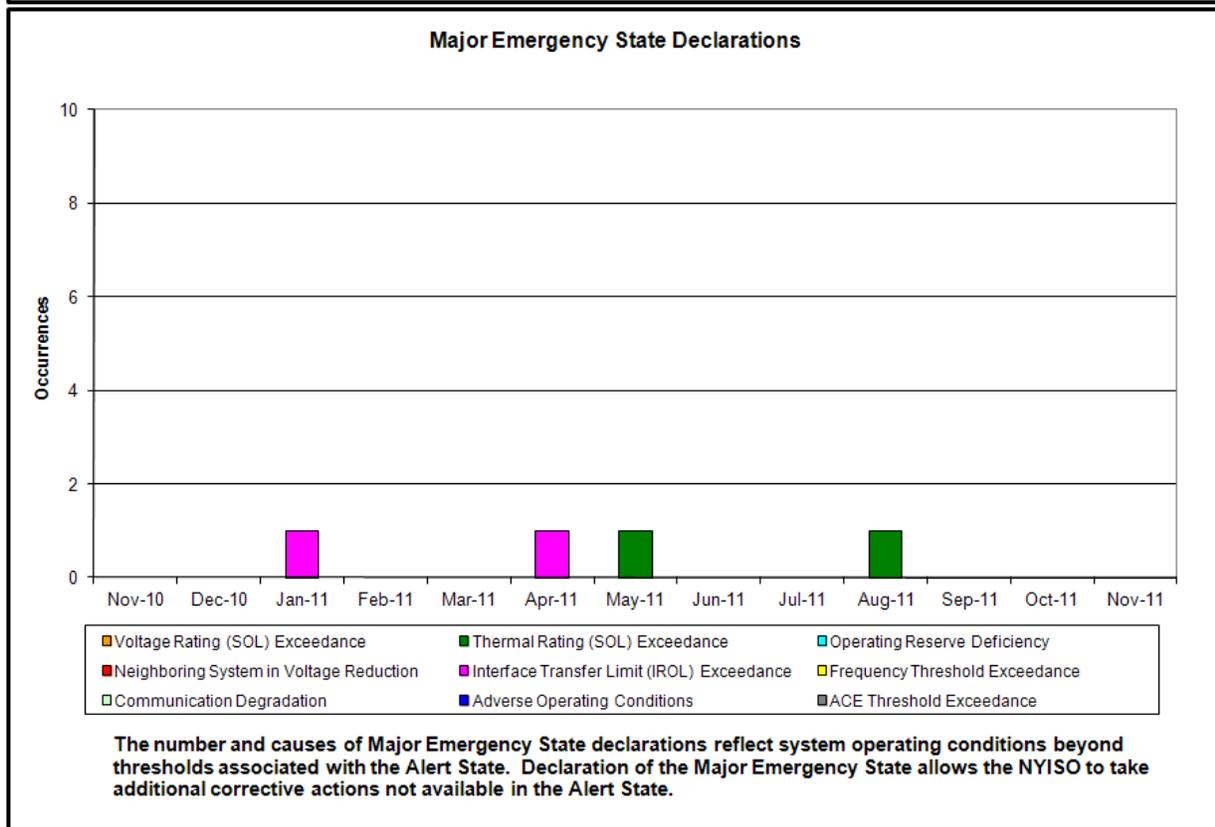

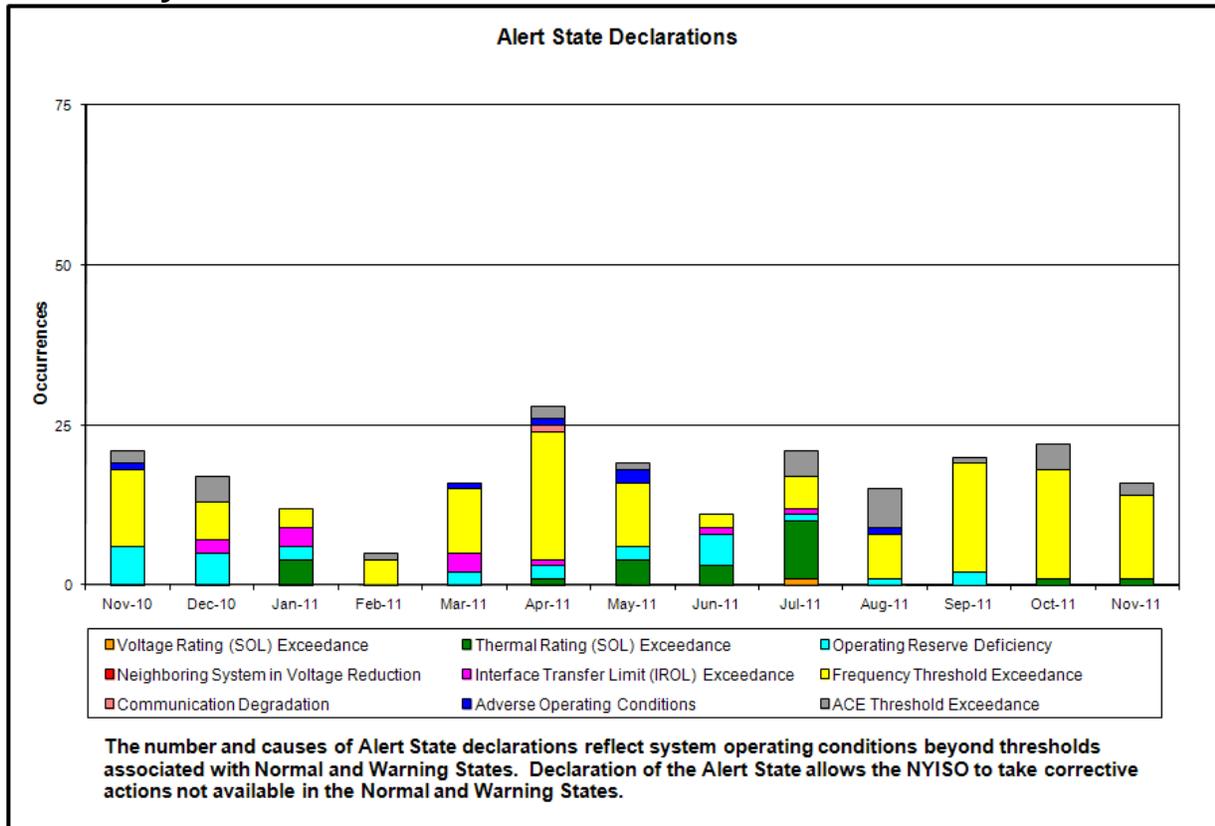

## **Table of Contents**

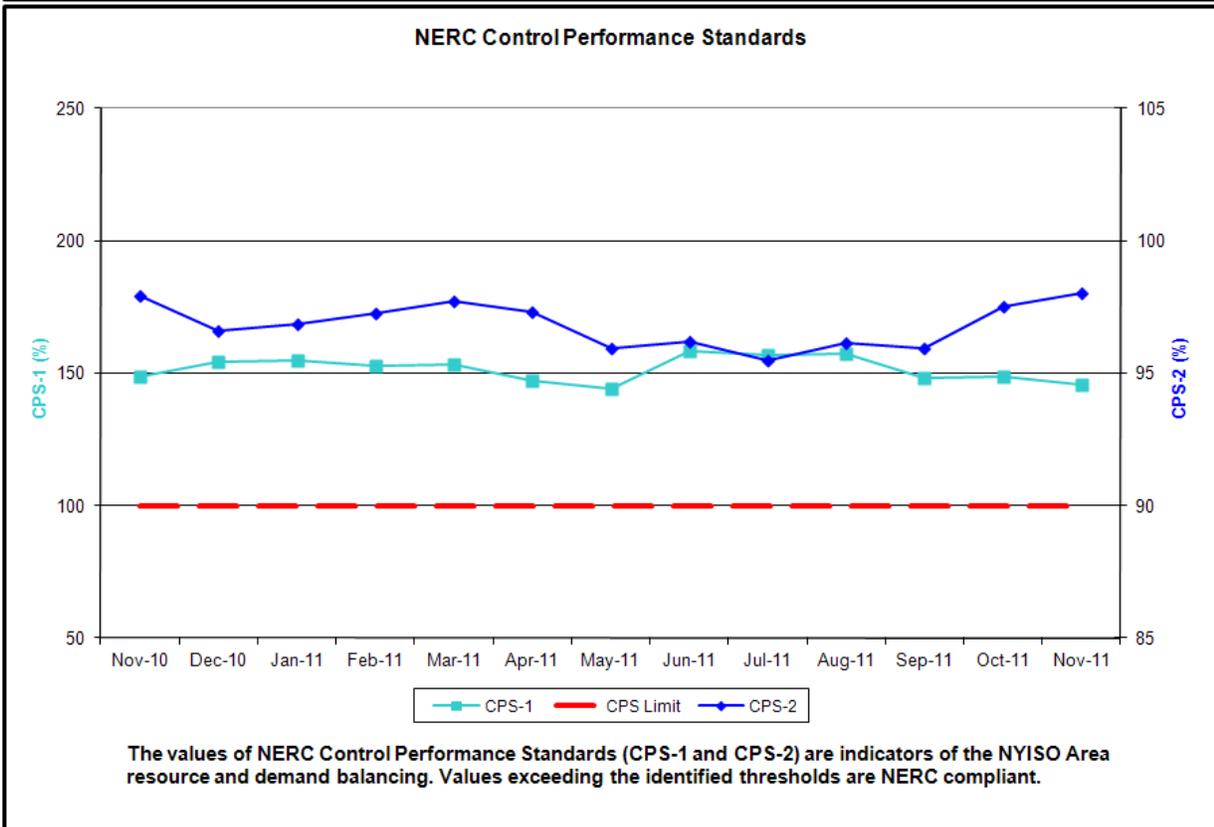

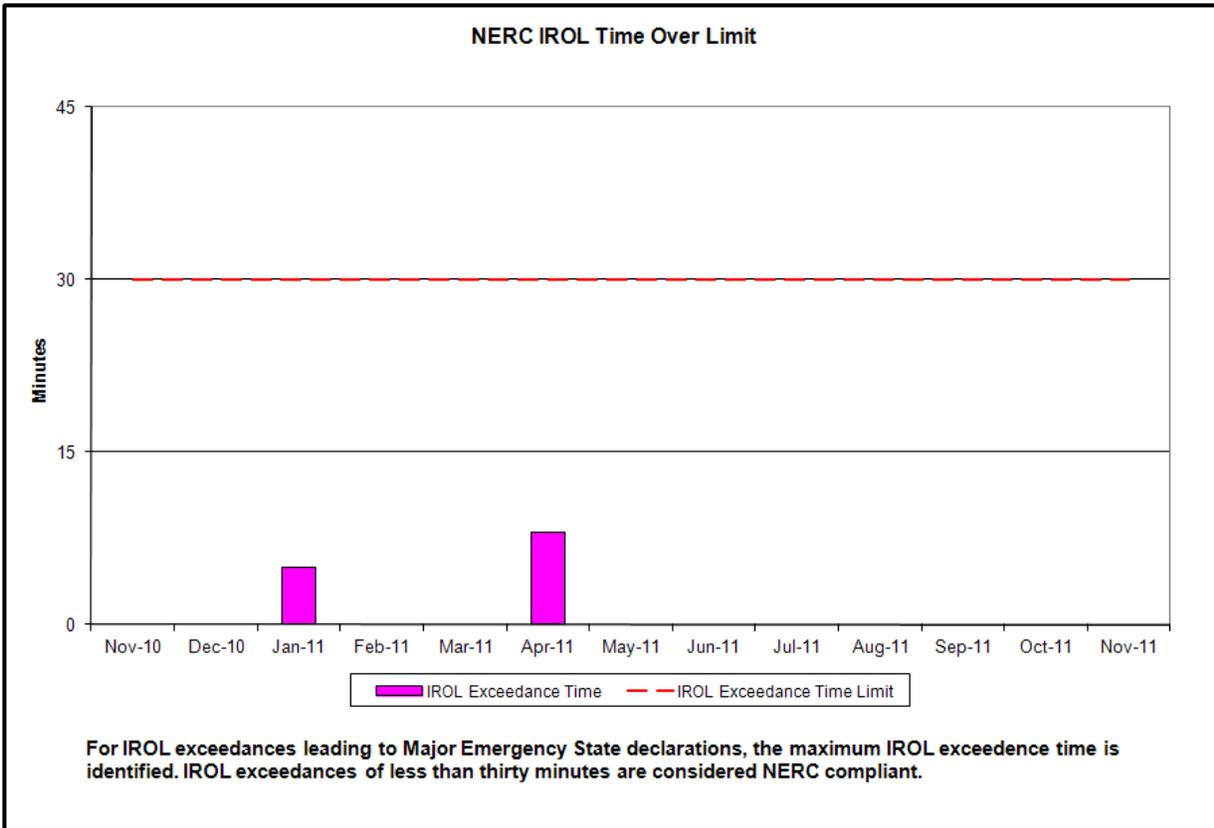

- ◆ **Highlights**
  - *Operations Performance*
  
- ◆ **Reliability Performance Metrics**
  - *Alert State Declarations*
  - *Major Emergency State Declarations*
  - *IROL Exceedance Times*
  - *Balancing Area Control Performance*
  - *Reserve Activations*
  - *Disturbance Recovery Times*
  - *Load Forecasting Performance*
  - *Wind Forecasting Performance*
  - *Lake Erie Circulation and ISO Schedules*
  
- ◆ **Market Performance Metrics**
  - *RTM Congestion Residuals Monthly Trend*
  - *RTM Congestion Residuals Daily Costs*
  - *RTM Congestion Residuals Event Summary*
  - *RTM Congestion Residuals Cost Categories*
  - *DAM Congestion Residuals Monthly Trend*
  - *DAM Congestion Residuals Daily Costs*
  - *DAM Congestion Residuals Cost Categories*
  - *NYCA Unit Uplift Components Monthly Trend*
  - *NYCA Unit Uplift Components Daily Costs*
  - *Local Reliability Costs Monthly Trend & Commitment Hours*
  - *ICAP Spot Market Clearing Price*
  - *UCAP Awards*

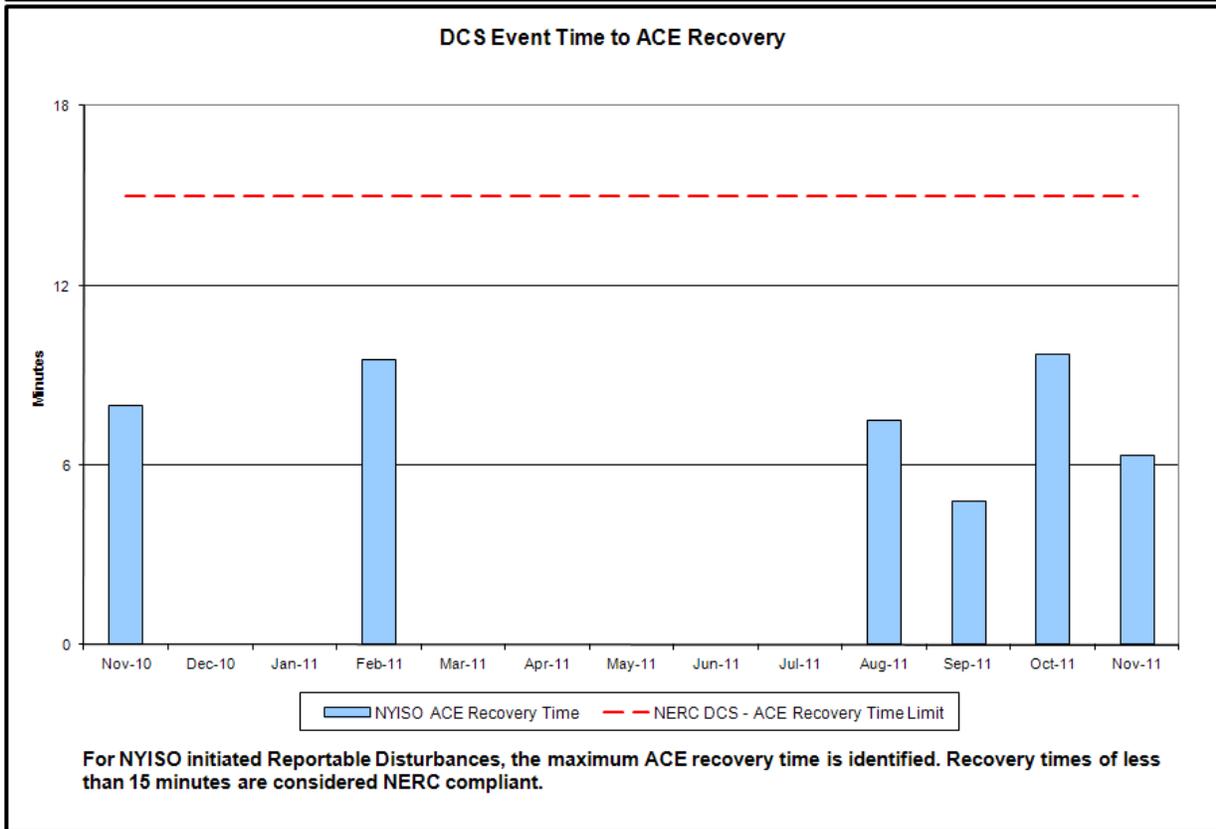

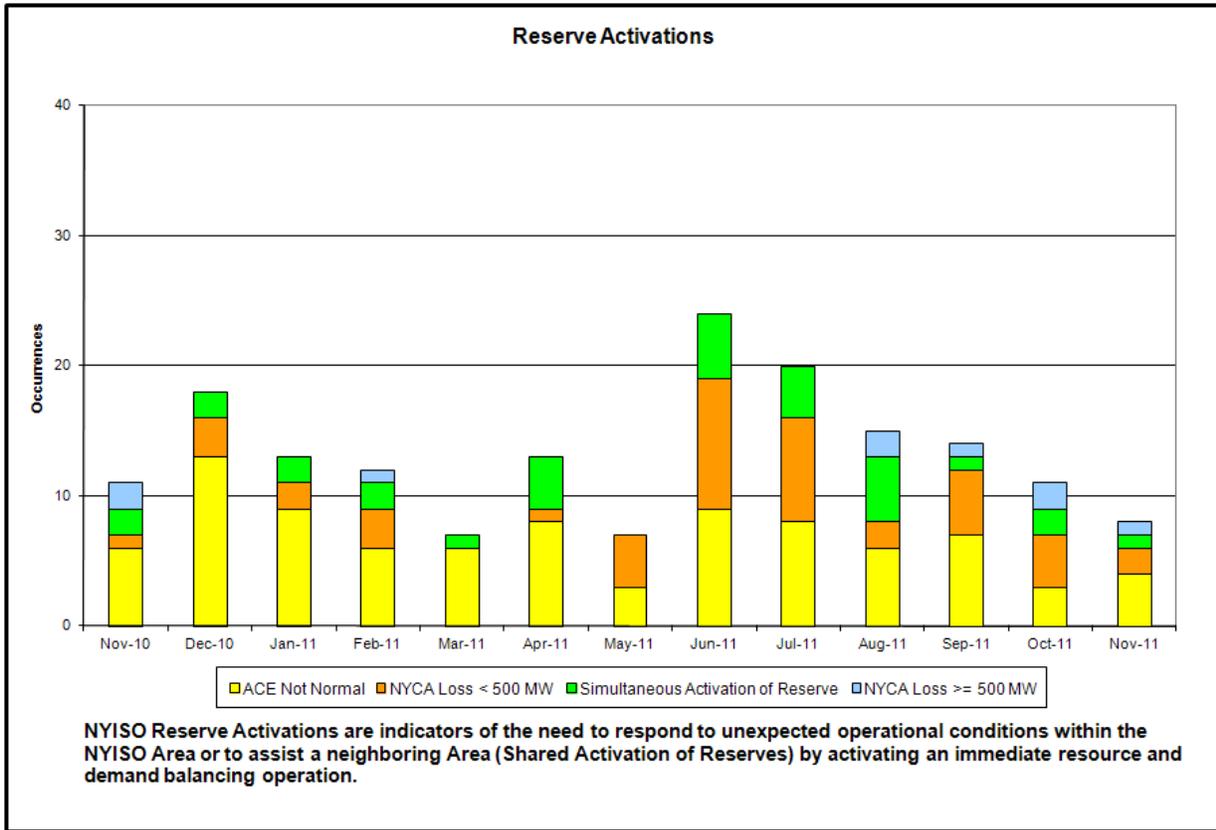

## November 2011 Operations Performance Highlights

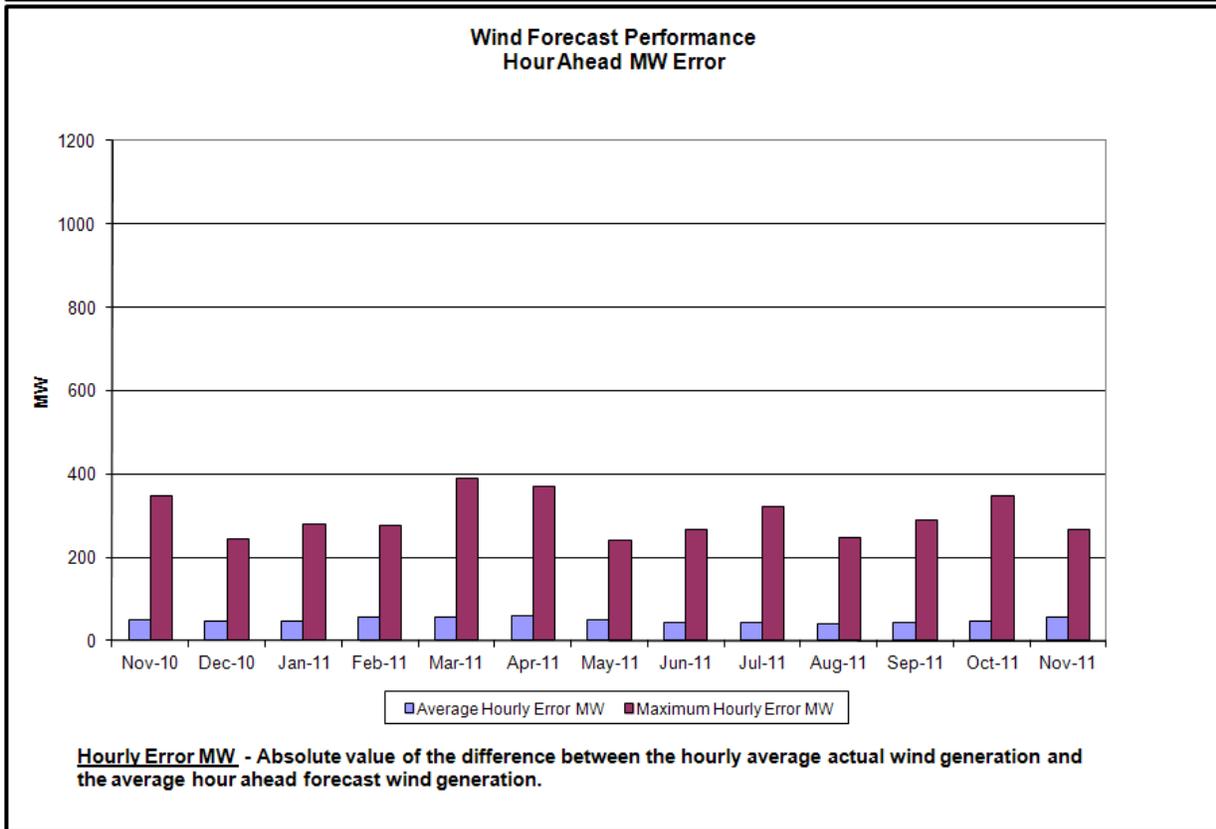

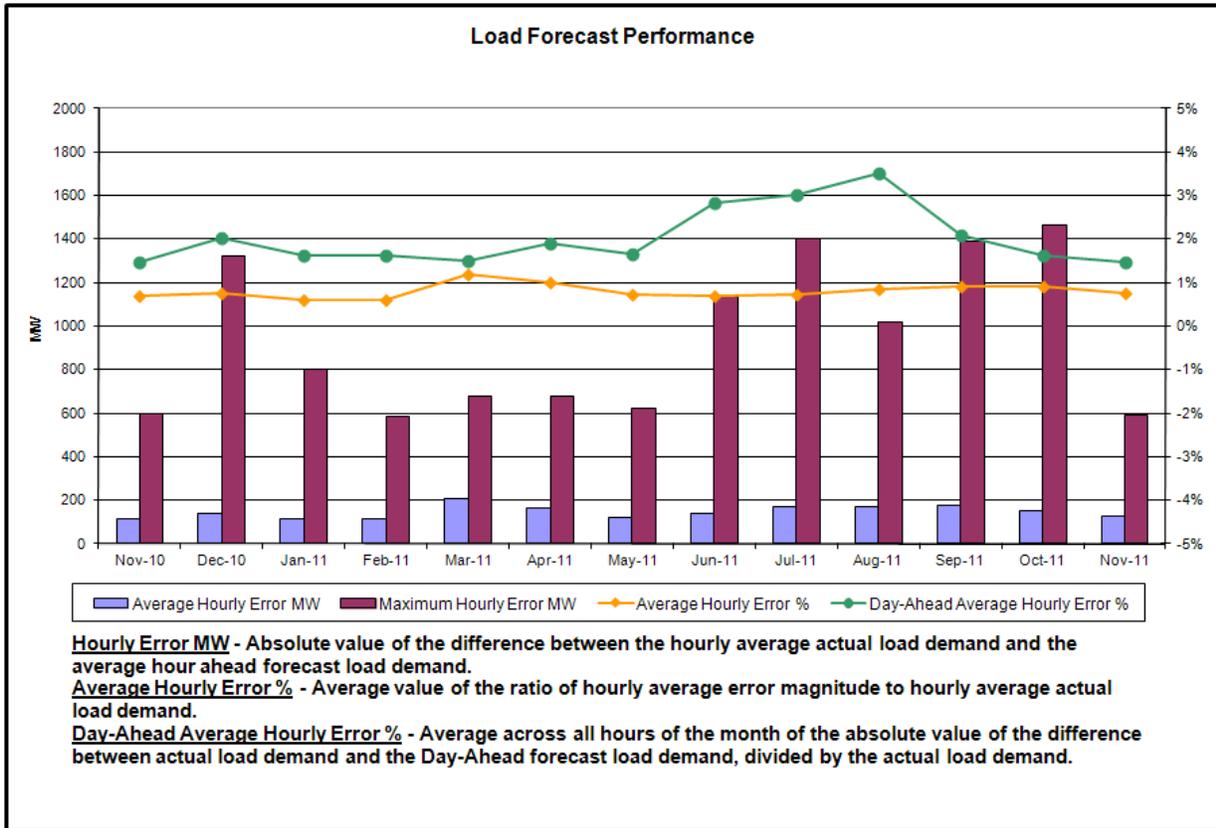

- Peak load of 21,541 MW occurred on 11/22/2011 HB 17
- All-time winter capability period peak load of 25,541 MW occurred on 12/20/2004 HB 17
- 0 hours of Thunder Storm Alerts were declared.
- **Lake Erie Loop Flows Reduce to Average Zero**
  - 2 hours of NERC TLR level 3 curtailments
- Simultaneous, Beck – Niagara and Beck – Packard outages are scheduled for Fall 2011, beginning December 5 and ending December 16
- Effective 12/1/2011 HQ intra-hour ramp will increase from 50MW to 100 MW for each 15 minute interval (see revised TB#158 for details). Also, HQTE will increase the intra-hour scheduling capability from +/-100MW to +/-125MW.

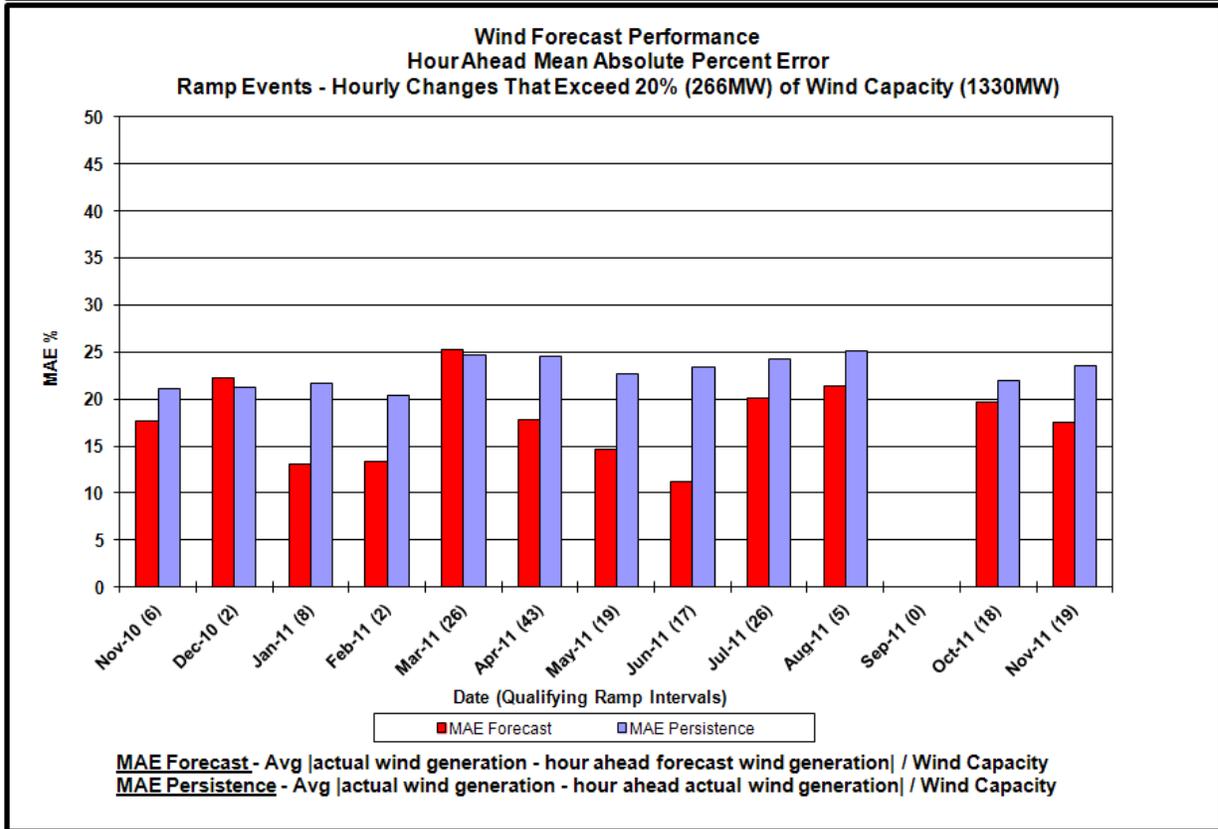

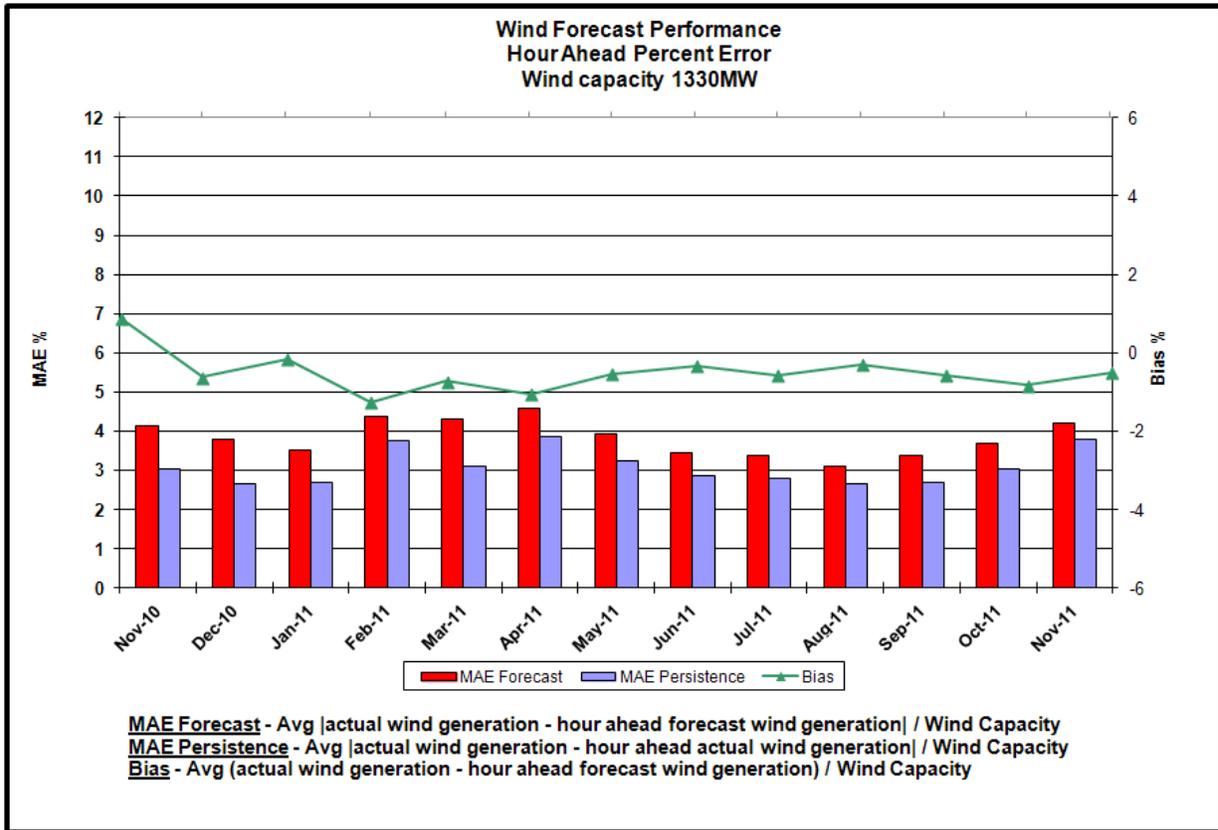

## Reliability Performance Metrics

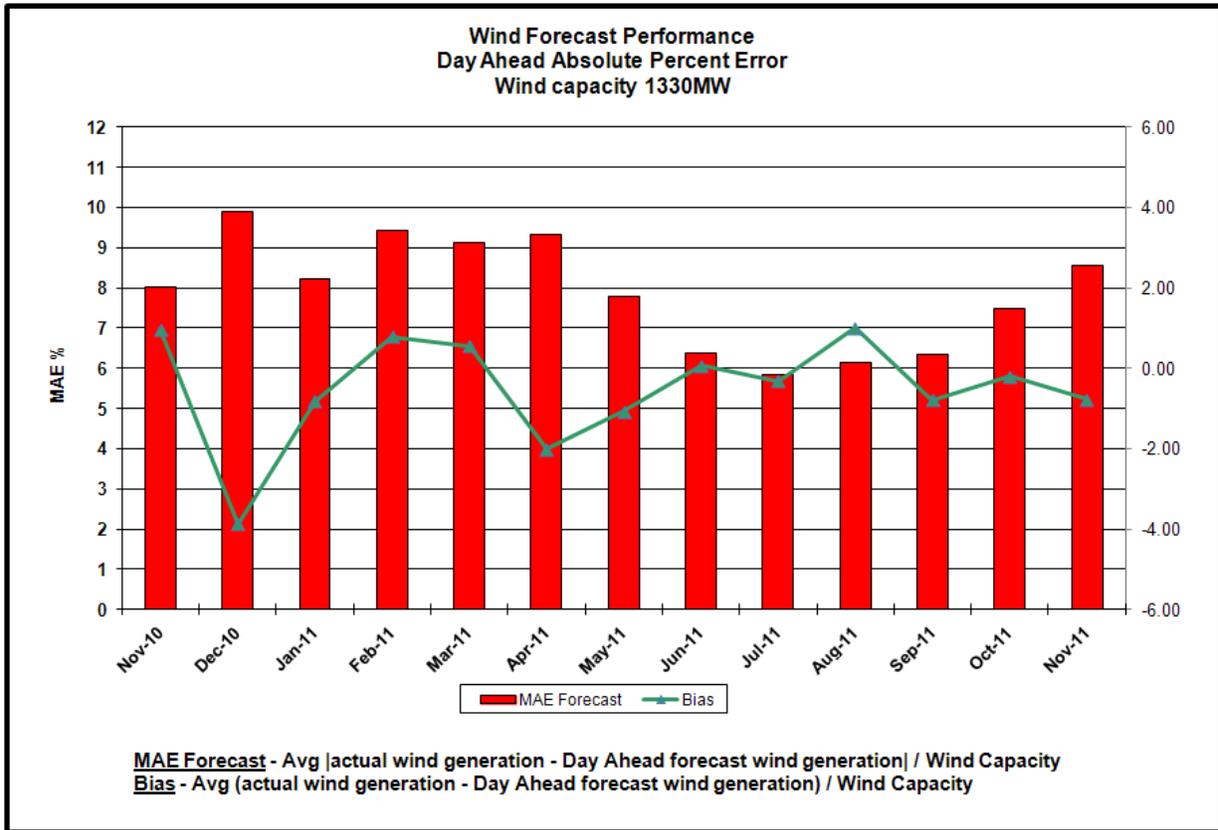

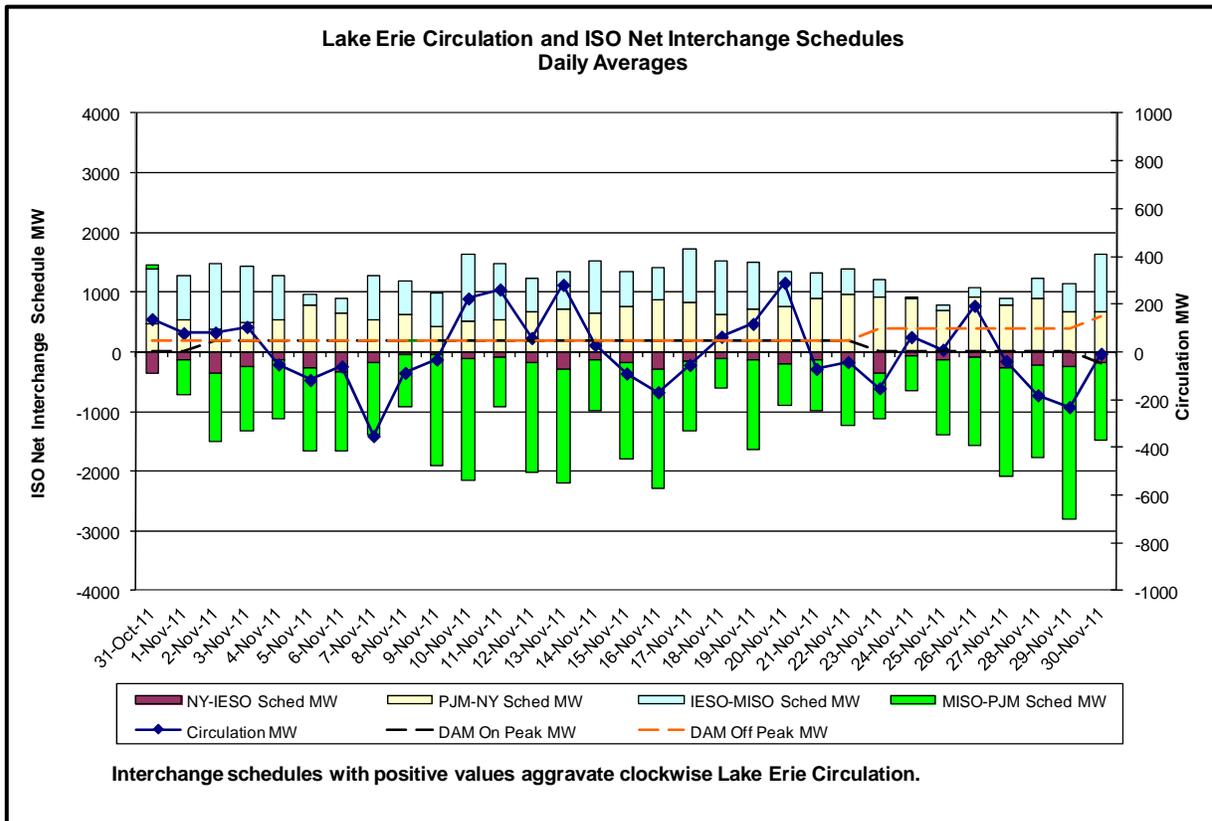

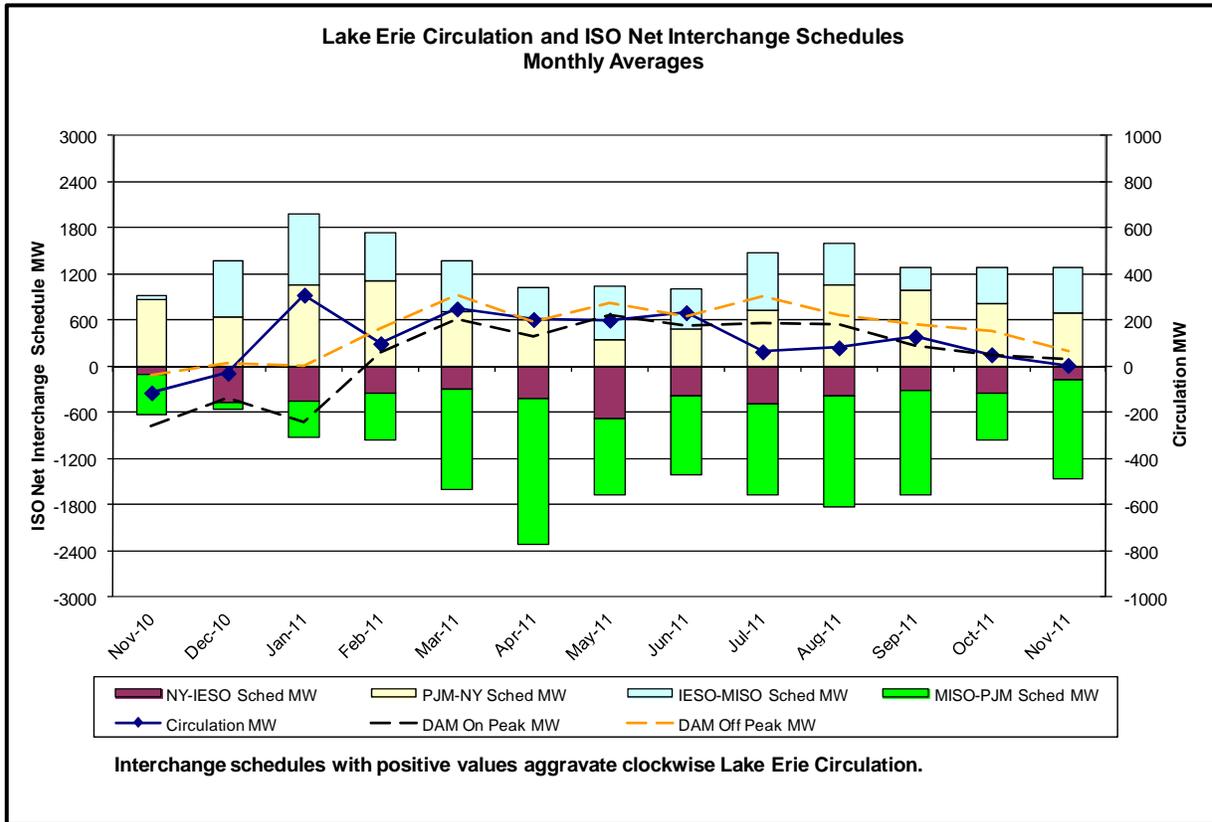

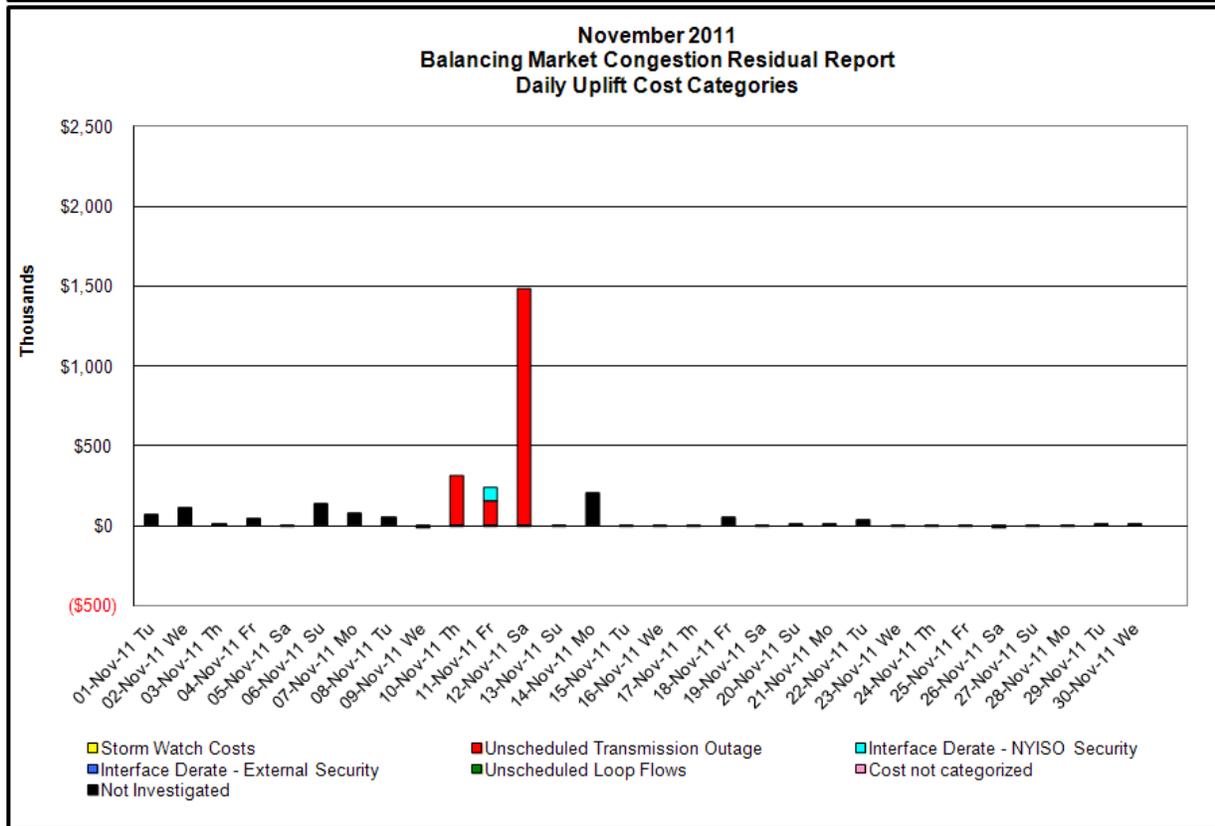

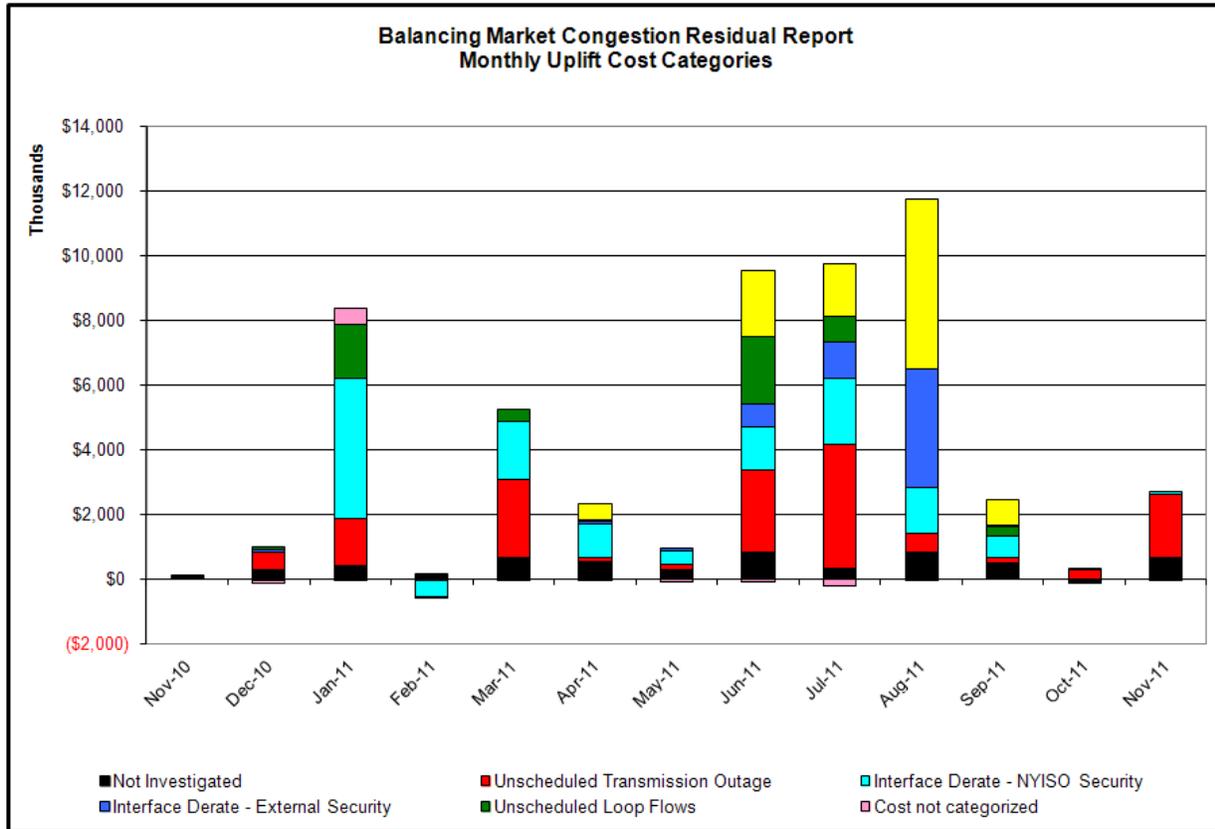

## Market Performance Metrics

Day's investigated in November: 10, 11, 12

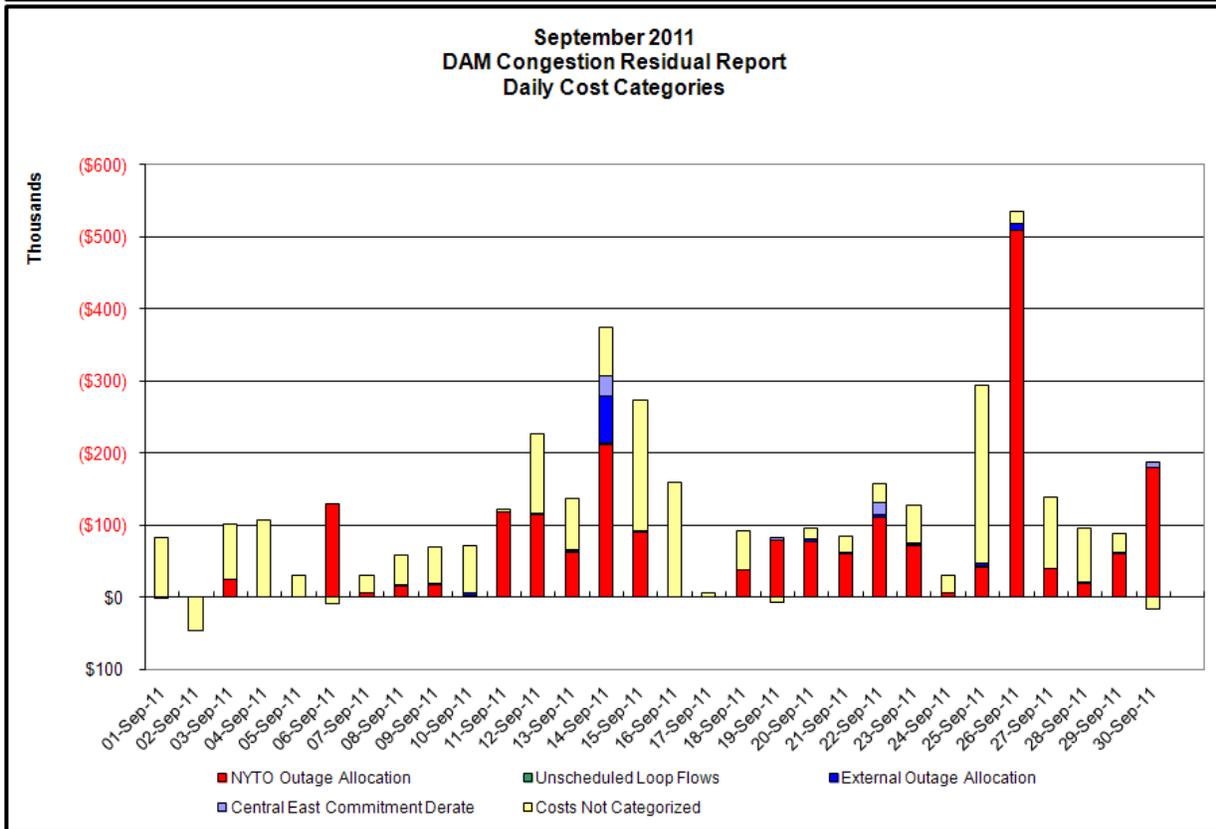

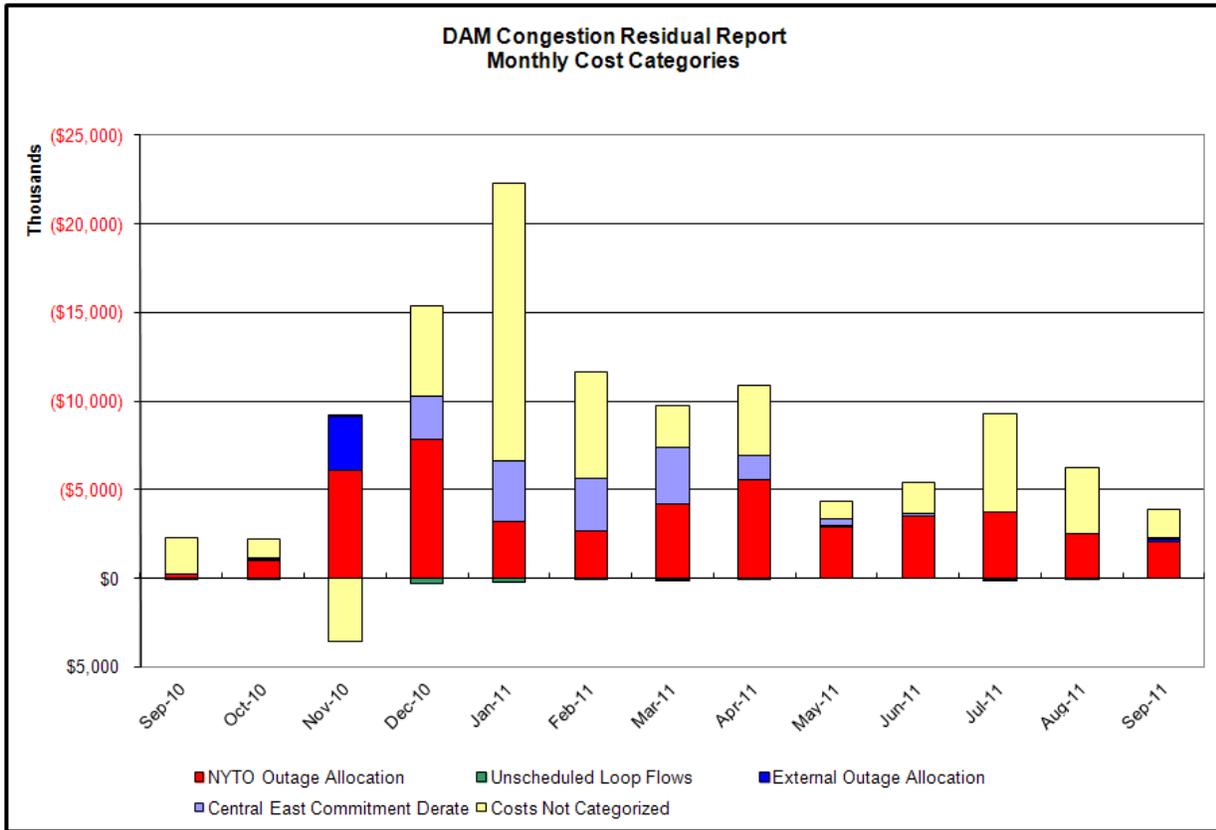

Event	Date (yyyymmdd)	Hours	Description
Red	11/10/2011	16-23	Forced outage GowanusS-Greenwood 138kV (#42232)
	11/10/2011	17	Extended outage New Scotland-Edic Porter 345kV (#14)
	11/10/2011	21-23	Forced outage Jamaica-Corona 138kV (#18002)
Cyan	11/11/2011	0-16	Forced outage GowanusS-Greenwood 138kV (#42232)
	11/11/2011	8-10	Derate Dunwoodie-Shore Road 345kV (#Y50)
	11/11/2011	14-16	Derate Dunwoodie-Shore Road 345kV (#Y50) for I/o Neptune HVDC Tie Line
Red	11/11/2011	8,12-16	Derate East 179th Street-Hell Gate East 138kV (#15054)
	11/12/2011	0-21,23	Extended outage Sprainbrook-East Garden City 345kV (#Y49)

**Real-Time Balancing Market Congestion Residual (Uplift Cost) Categories**

<u>Category</u>	<u>Cost Assignment</u>	<u>Events Types</u>	<u>Event Examples</u>
Storm Watch	Zone J	Thunderstorm Alert (TSA)	TSA Activations
Unscheduled Transmission Outage	Market-wide	Reduction in DAM to RTM transfers related to unscheduled transmission outage	Forced Line Outage, Unit AVR Outages
Interface Derate - NYISO Security	Market-wide	Reduction in DAM to RTM transfers not related to transmission outage	Interface Derates due to RTM voltages
Interface Derate - External Security	Market-wide	Reduction in DAM to RTM transfers related to External Control Area Security Events	TLR Events, External Transaction Curtailments
Unscheduled Loop Flows	Market-wide	Changes in DAM to RTM unscheduled loop flows impacting NYISO Interface transmission constraints	DAM to RTM Clockwise Lake Erie Loop Flows greater than 125 MW

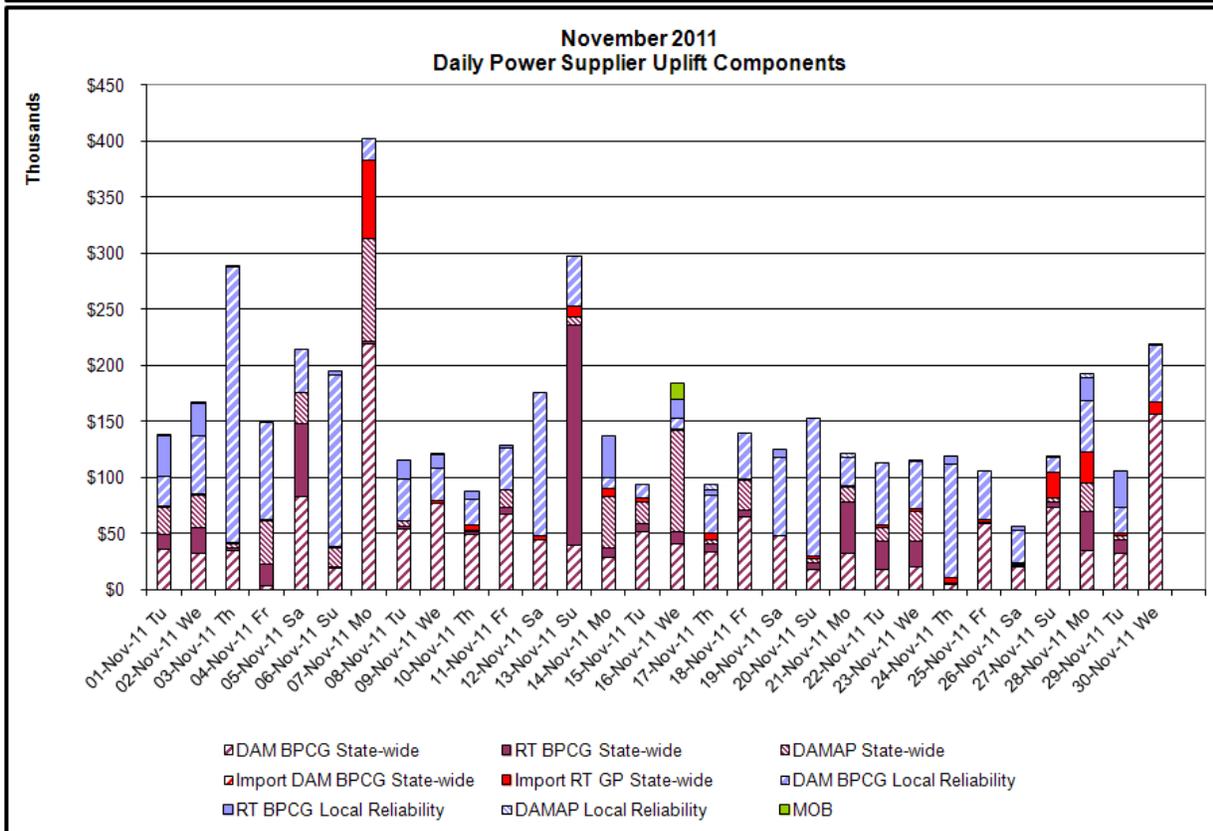

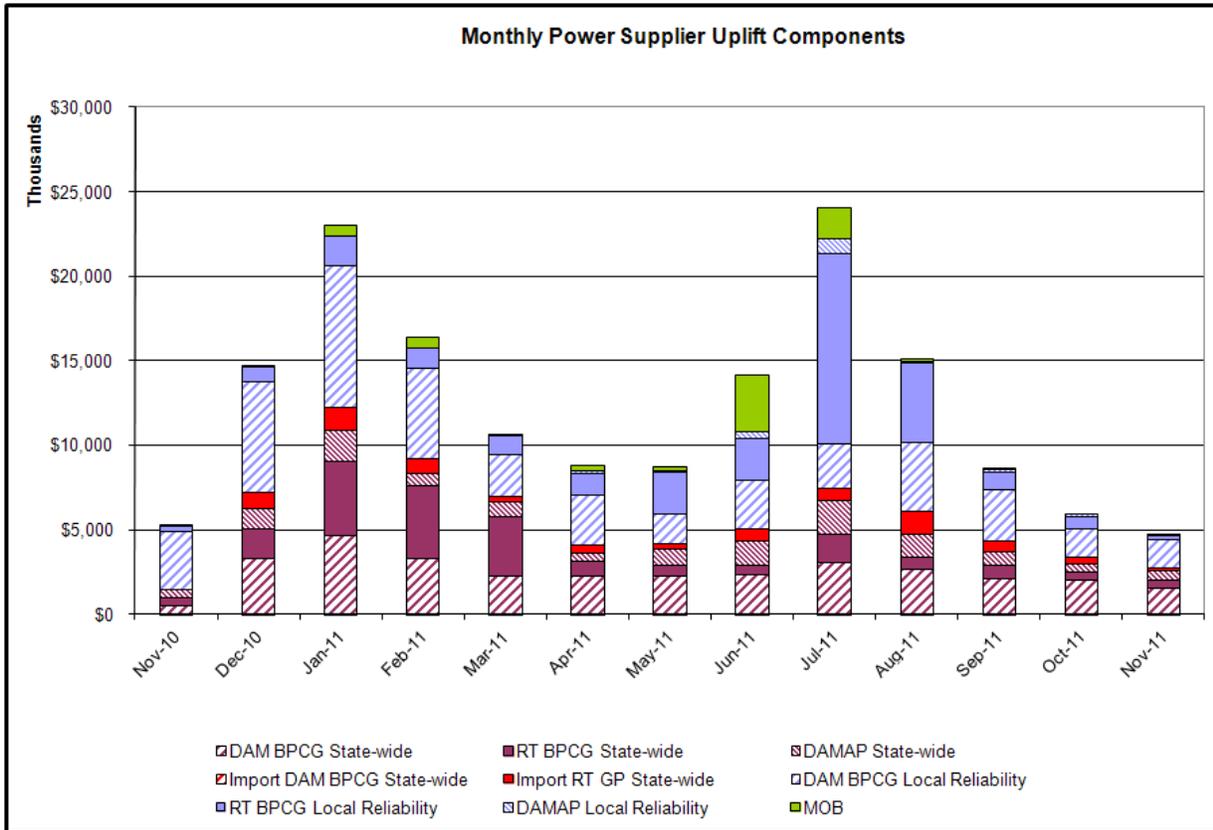

**Monthly Balancing Market Congestion Report Assumptions/Notes**

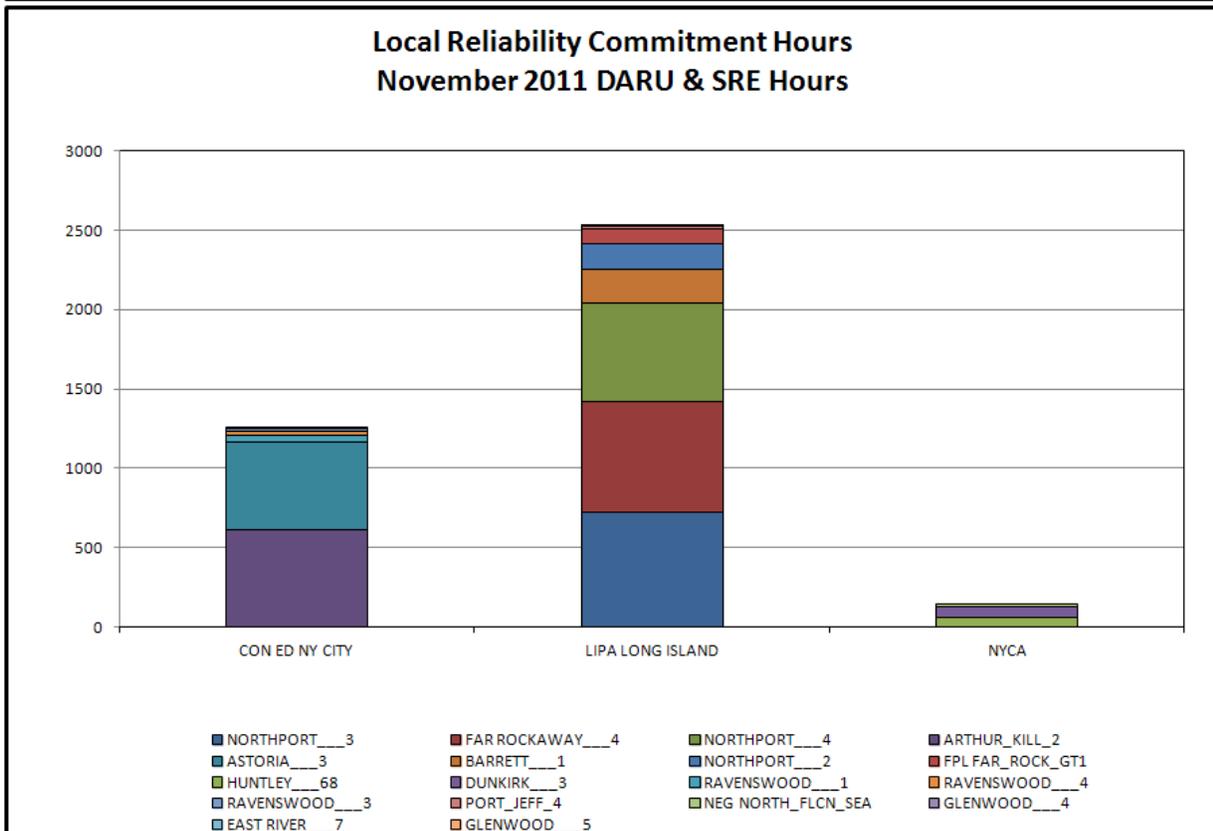

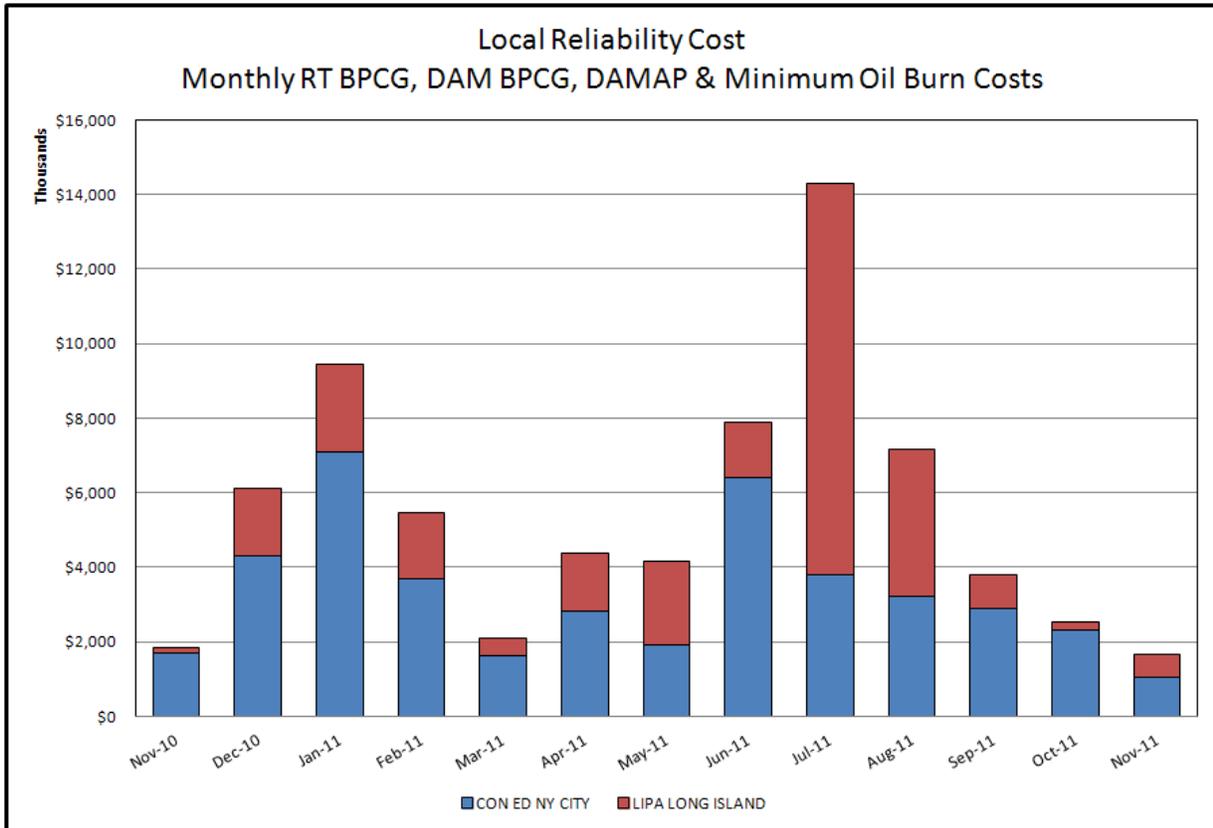

- 1) Storm Watch Costs are identified as daily total uplift costs
- 2) At a minimum those days with \$ 100 K/HR, shortfall of \$ 200 K/Day or more, or surplus of \$ 100 K/Day or more are investigated
- 3) Uplift costs associated with multiple event types are apportioned equally by hour
- 4) Investigations began with Dec 2008. Prior months are reported as Not Investigated.

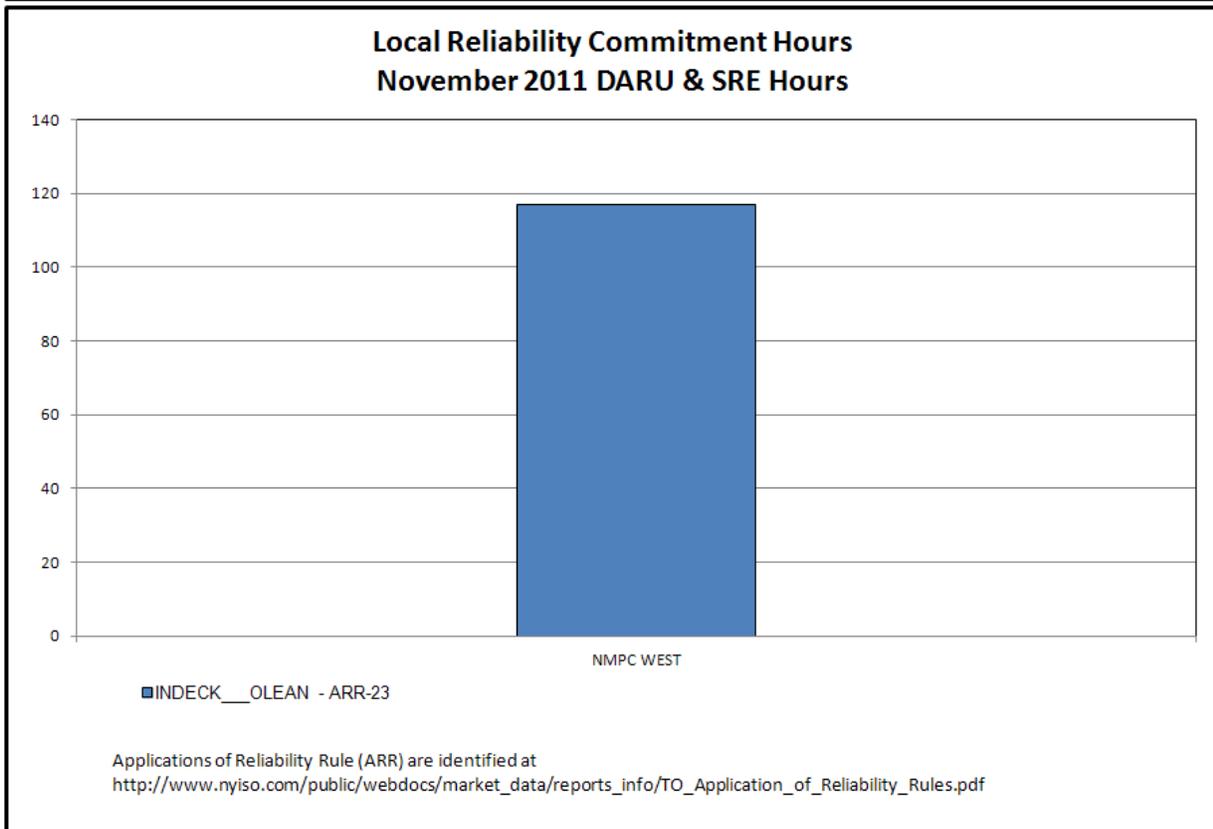

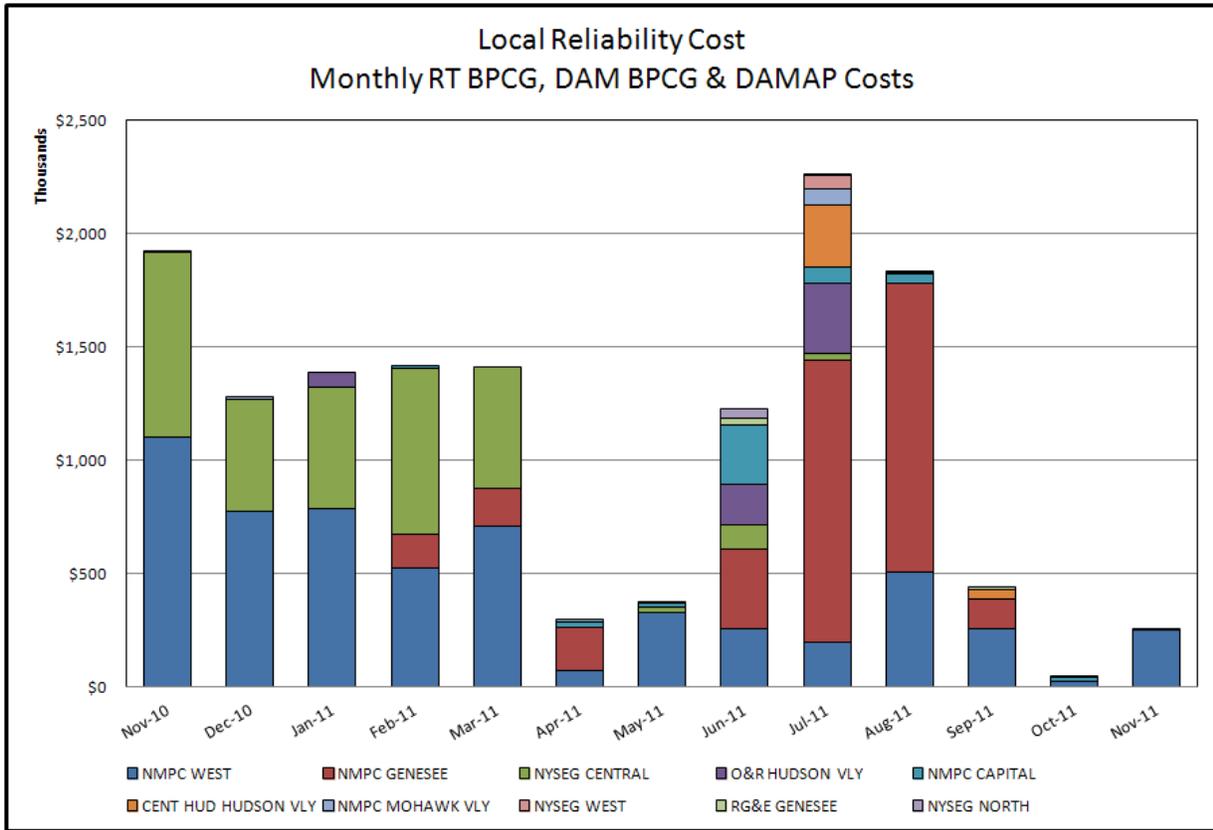

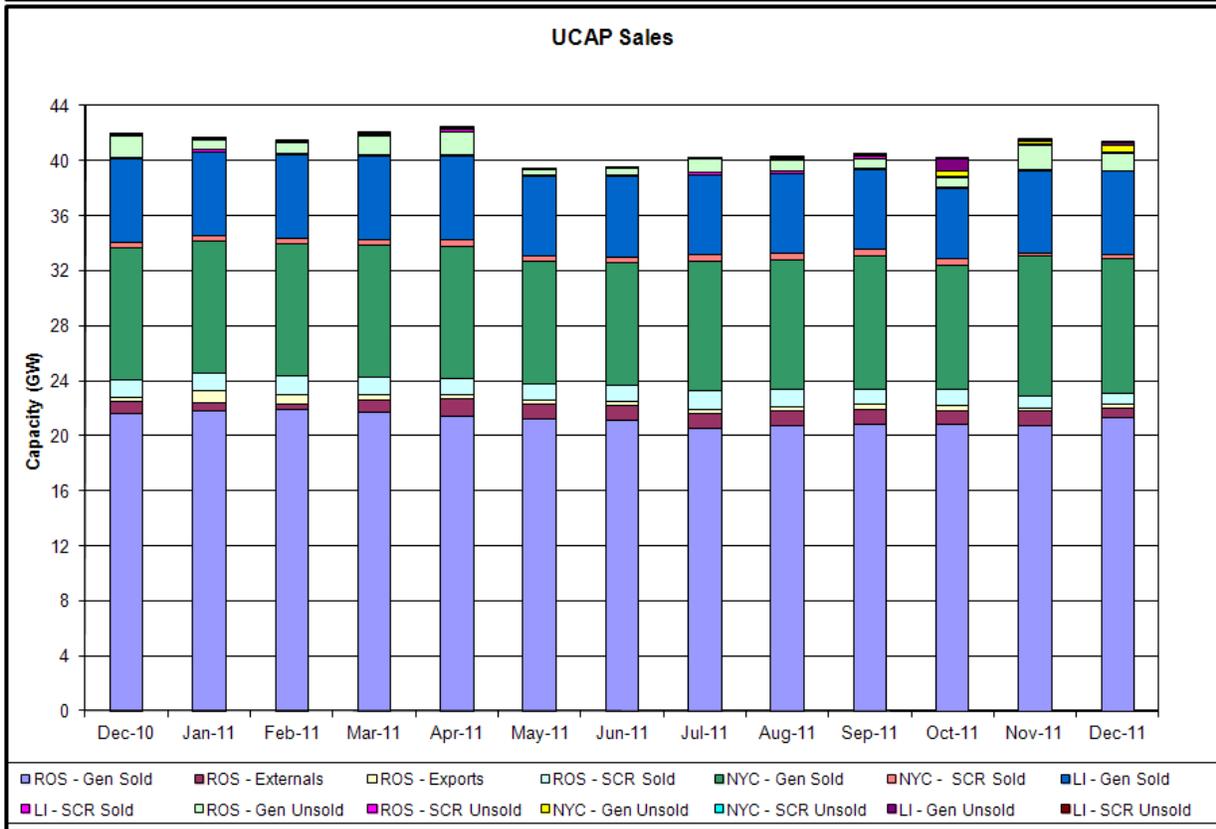

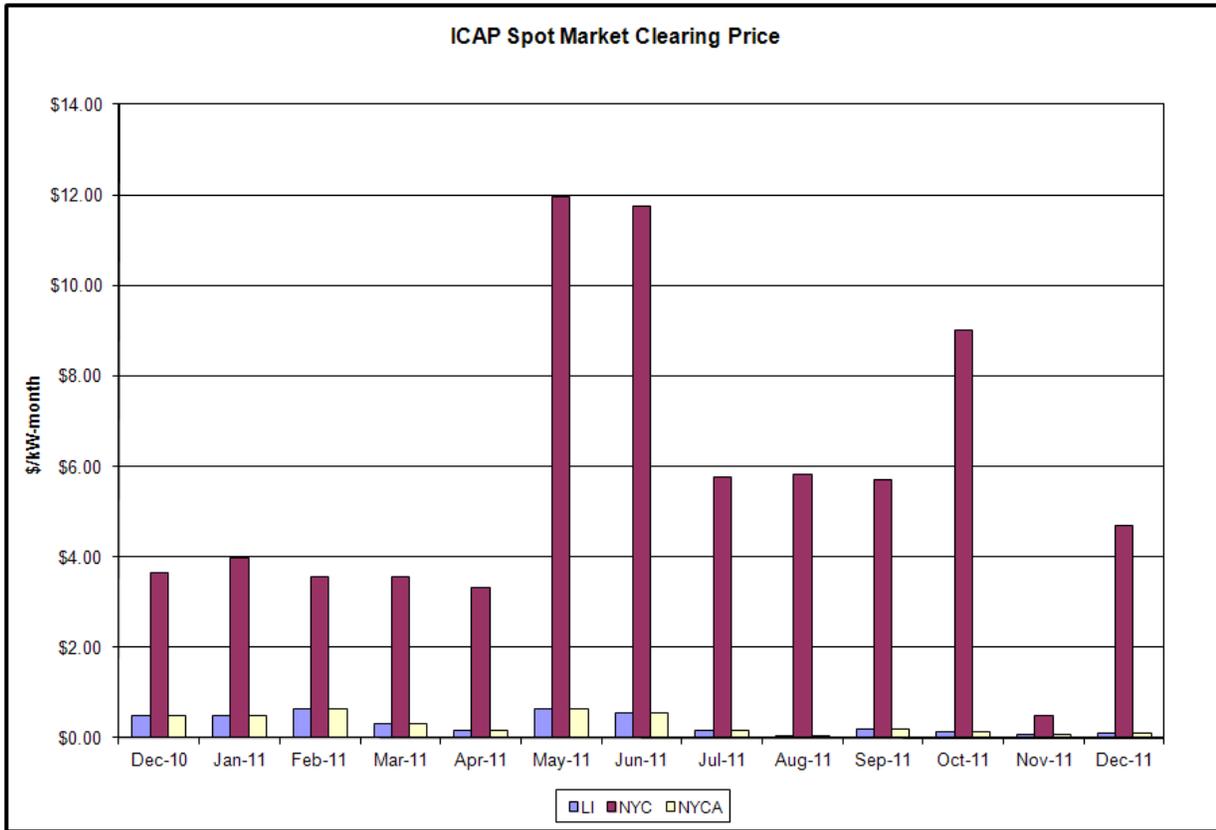

**Day-Ahead Market Congestion Residual Categories**

<u>Category</u>	<u>Cost Assignment</u>	<u>Events Types</u>	<u>Event Examples</u>
NYTO Outage Allocation	Responsible TO	Direct allocation to NYTO's responsible for transmission equipment status change.	DAM scheduled outage for equipment modeled in-service for the TCC Auction.
Unscheduled Loop Flows	All TO by Monthly Allocation Factor	Residual impact of Lake Erie circulation, MW difference between the DAM and TCC Auction.	Lake Erie Loop Flow Assumptions
External Outage Allocation	All TO by Monthly Allocation Factor	Direct allocation to transmission equipment status change caused by change in status of external equipment.	Tie line required out-of-service by TO of neighboring control area.
Central East Commitment Derate	All TO by Monthly Allocation Factor	Reductions in the DAM Central East_VC limit as compared to the TCC Auction limit, which are not associated with transmission line outages.	

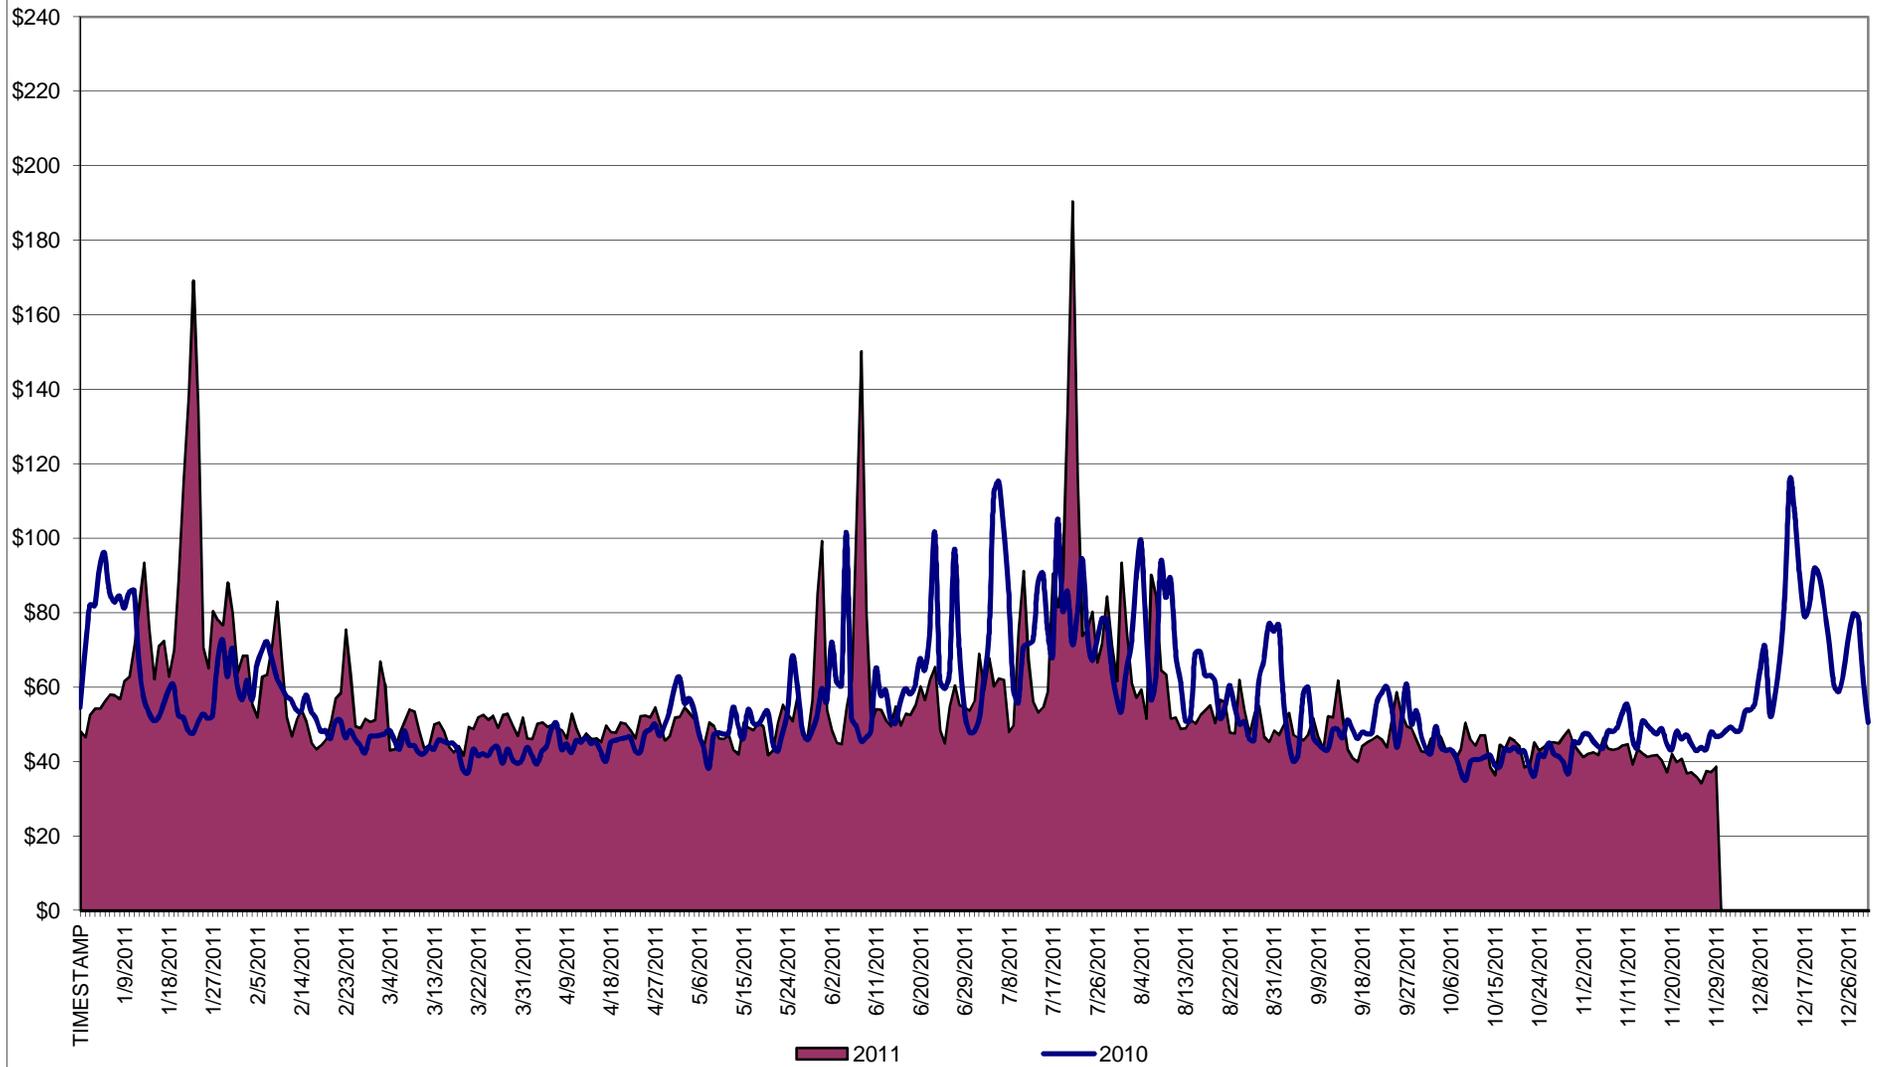

# Market Performance Highlights for November 2011

- **LBMP for November is \$38.97/MWh, down from \$42.48/MWh in October 2011.**
  - Day Ahead and Real Time Load Weighted LBMPs are lower compared to October 2011.
- **Average monthly year-to-date cost of \$57.75/MWh, a decrease from the previous month, \$59.17/MWh.**
- **Average daily sendout is 408GWh/day in November; up from 403GWh/day in October 2011 and higher than 405GWh/day in November 2010.**
- **Natural gas is down while distillates prices are up compared to the previous month.**
  - Kerosene is \$23.31/MMBtu, up from \$22.61/MMBtu in October.
  - No. 2 Fuel Oil is \$21.77/MMBtu, up from \$20.99/MMBtu in October.
  - No. 6 Fuel Oil is \$18.76/MMBtu, up from \$18.34/MMBtu in October.
  - Natural Gas is \$3.46/MMBtu, down from \$3.78/MMBtu in October.
- **Uplift per MWh is higher compared to the previous month.**
  - Uplift (not including NYISO cost of operations) is \$0.05/MWh, higher than (\$0.25)/ MWh in October:
    - The TSA Share is \$0.00/MWh
    - The Local Reliability Share is \$0.01/MWh
    - The Other Share is \$0.04/MWh
  - Total uplift (Schedule 1 components including NYISO Cost of Operations) is higher compared to October.

**Daily NYISO Average Cost/MWh (Energy & Ancillary Services)\***  
 2010 Annual Average \$58.94/MWh  
 November 2010YTD Average \$57.99/MWh  
 November 2011YTD Average \$57.75/MWh

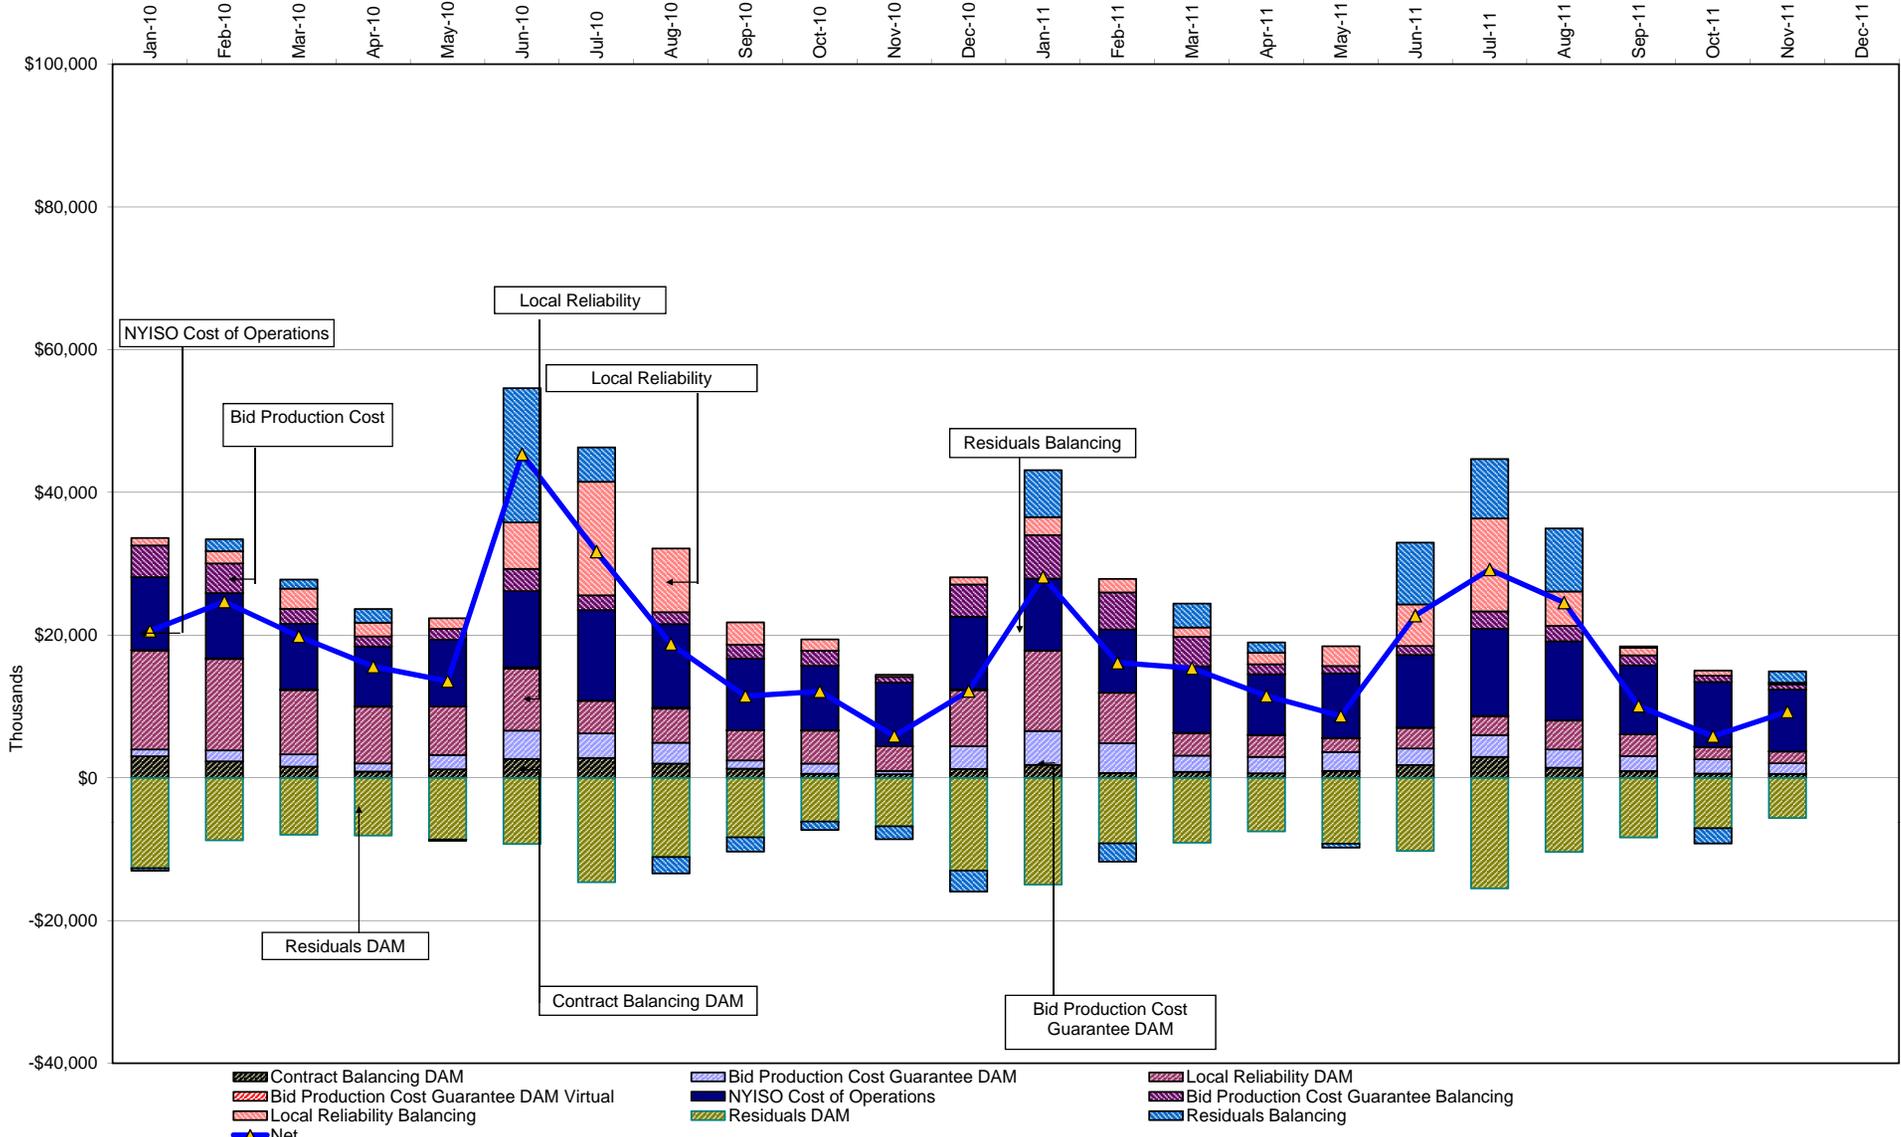

\* Excludes ICAP payments.

**NYISO Average Cost/MWh (Energy and Ancillary Services) \***  
**from the LBMP Customer point of view**

## NYISO Dollar Flows - Uplift- OATT Schedule 1 components - Data through November 30, 2011

DAM Contract Balancing amounts are for payments made to generating units to make them whole for being dispatched below their Day-Ahead schedule, as a result of out-of-merit dispatches.  
 DAM Bid Production Cost Guarantees for Virtual Transactions are included in the chart and are shown from the inception of Virtual Transactions. These values are small and cannot be identified on the chart.  
 DAM residuals consist of both energy and loss revenue collections and payments. By design, there is a net over collection of revenues due to the difference between the marginal losses paid to generation and the average losses charged to loads.

Project	Status and Milestone Deliverables
---------	-----------------------------------

Business Intelligence Products	
--------------------------------	--

E-Planning Enhancements	<p><b>Status:</b> E-Planning is a comprehensive collaboration system for NYISO System Resource Planning. The 2010 deployment was specific for Interconnection Studies. The software enhancements were successfully deployed in June. This project is complete.</p> <p><b>Deliverables:</b> The focus of the 2011 project will be extending functionality to include other types of studies conducted by System Resource Planning, such as Transmission Studies.</p>
-------------------------	---

Web Posting Enhancements: Operational Events	<p><b>Status:</b> "Web Postings" refers to a series of processes that generate and publish various CSV, PDF, and HTML files to NYISO's OASIS site (<a href="http://mis.nyiso.com/public">http://mis.nyiso.com/public</a>). These files include zonal and generator pricing data for the Real-Time, Hour-Ahead, and Day-Ahead markets, outage data, interface limits &amp; flows, PAR schedules &amp; flows, actual load and load forecasts, various reports, and other publicly available data used by Market Participants. Software changes were successfully deployed in October. This project is complete.</p> <p><b>Deliverables:</b> The focus of the 2011 project is to enable the real time posting of operational events, such as Major Emergency, Thunder Storm Alert, Reserve Pickup and Area Control Error (ACE), to nyiso.com. Implementation is scheduled for 4<sup>th</sup> Q 2011.</p>
--	---

Capacity Market Products	
--------------------------	--

Additional Capacity Zones	<p><b>Status:</b> The NYISO and stakeholders developed the rationale in 2010 for creating additional capacity zones, identified as a recommendation in the 2009 State of the Market report. NYISO submitted a FERC compliance filing in January 2011 to define the criteria for creating new capacity zones. A Lower Hudson Valley capacity zone is under consideration to reduce the impact of deliverability and better reflect the cost of new entry. The Market Design Concept was discussed with stakeholders in late October in preparation for the November compliance filing.</p> <p><b>Deliverables:</b> The 2011 project will focus on the functional design of the logic to generalize the addition, and possibly subtraction, of capacity zones within the ICAP Automated Market System.</p>
---------------------------	--

Buyer Side Mitigation Rules	<p><b>Status:</b> In February 2011 FERC accepted NYISO's compliance filing, which was submitted based on 2010 stakeholder discussions. In June NYISO deployed software changes to implement rules specific to new and up-rated Generator projects in NYC. Additional software changes were deployed in September. This project is complete.</p> <p><b>Deliverables:</b> Implement the necessary rule changes within the ICAP Automated Market System, including floor price adjustment, duration of mitigation, and exemption tests. Implementation is scheduled for 3rd Q 2011 to be effective for the Winter Capability Period.</p>
-----------------------------	---

Project	Status and Milestone Deliverables
---------	-----------------------------------

Demand Response Products	
--------------------------	--

Demand Response Aggregations in DSASP	<p><b>Status:</b> Based on the NYISO's response to FERC Order 719, in 2010 NYISO and stakeholders discussed the changes needed to accommodate aggregated small demand response resources providing ancillary services (DSASP). The Market Design Concept to treat aggregations in the same manner as individual DSASP resources was proposed and approved by Market Participants at the December 2010 BIC.</p> <p><b>Deliverables:</b> Implement the required rule changes and software changes. Implementation is planned for 2012.</p>
---------------------------------------	--

Demand Side Ancillary Services Program (DSASP) Direct Metering	<p><b>Status:</b> In 2010 NYISO and stakeholders discussed the stakeholder need to enable direct communications from the NYISO to the DSASP provider/aggregator.</p> <p><b>Deliverables:</b> The 2011 project will address the required market rule, software, and hardware changes needed to enable direct communications from the NYISO to the DSASP provider/aggregator. Completion of the functional requirements is scheduled for the 4<sup>th</sup> Q 2011.</p>
--	---

Demand Response – Real Time Energy Market	<p><b>Status:</b> NYISO and Market Participants are awaiting further direction from FERC on the concepts for permitting demand response entities to participate in the NYISO's real time energy market.</p> <p><b>Deliverables:</b> The focus of this project in 2011 is the development of the architectural design specification for the software changes required to enable this functionality. Completion of the architectural design is scheduled for the 4<sup>th</sup> Q 2011.</p>
---	---

SCR Baseline/Aggregation Rules	<p><b>Status:</b> Stakeholders approved market rule changes at the February 2011 Management Committee. These changes will result in improved estimates of the demand reduction capabilities (and Installed Capacity) of SCRs, better alignment with operational expectations during an SCR event, and greater clarity in applying performance deficiency penalties to the entities that represent SCRs in the NYISO market: Responsible Interface Parties. At the request of the Market Participants, NYISO will be seeking expedited treatment from FERC. All required software changes were successfully deployed in September. This project is complete.</p> <p><b>Deliverables:</b> The focus of the 2011 project is implementation of the required software changes within the Demand Response Information System (DRIS) to implement the market rules approved by stakeholders. Implementation is scheduled for 3<sup>rd</sup> Q 2011.</p>
--------------------------------	--

Project	Status and Milestone Deliverables
---------	-----------------------------------

Energy Markets Products	
-------------------------	--

Ancillary Services Mitigation	<p><b>Status:</b> Per recommendation of NYISO's Market Advisor, NYISO should modify two mitigation provisions that may limit competitive 10-minute reserves offers in the day-ahead market. NYISO presented a market design concept to stakeholders in September. Tariff changes and software changes are planned for 2012.</p> <p><b>Deliverables:</b> This project will focus on an evaluation of these two mitigation provisions and identification of appropriate modifications, if necessary. A market design concept was presented to stakeholders in the 4<sup>th</sup> quarter.</p>
-------------------------------	---

Buy-through of Congestion	<p><b>Status:</b> Buy-Through of Congestion is a Broader Regional Markets initiative that addresses congestion costs created by loop flow from external transactions. Parties scheduling transactions with any of the ISOs surrounding Lake Erie would be billed for real-time congestion costs incurred by neighboring systems supporting the loop flow created by the transaction to maintain the schedule. Parties scheduling transactions would specify if they are, or are not, willing to pay for off-contract path congestion. This project will implement this functionality.</p> <p><b>Deliverables:</b> Given FERC's reprioritization of this BRM initiative in the December 30, 2010 FERC Order, there are no planned deliverables for 2011.</p>
---------------------------	---

Enhanced Shortage Pricing Phase I	<p><b>Status:</b> The NYISO implemented reserve demand curves as part of the SMD2 implementation to accurately and consistently capture shortage conditions directly into the market clearing prices. During the development of the market rules, set points (or set point/ MW pairs) were established for the Ancillary Service products. The demand curve will be modified to better reflect the value of reserves during shortage conditions, consistent with operational practices and reserve scheduling requirements.</p> <p><b>Deliverables:</b> The focus of this project for 2011 is to implement the required software changes. This project was successfully implemented in May. This project is complete.</p>
-----------------------------------	---

Interregional Transaction Coordination Phases I and III	<p><b>Status:</b> Interregional Transaction Coordination is a Broader Regional Markets initiative that provides more frequent scheduling of external energy transactions with the interfaces. Currently, energy transactions between NY and other control areas are evaluated economically once for the hour. The 2008 and 2009 State of the Market recommendation #2 is, "NYISO continue its work with neighboring control areas to better utilize the transfer capability between regions." Phase I of this project will enable more frequent scheduling with Hydro Quebec (HQ). Phase III will enable more frequent scheduling with PJM.</p> <p><b>Deliverables:</b> The focus of this project in 2011 is to deliver the necessary software enhancements and tools to implement Intra-hour energy transaction scheduling capabilities with HQ in May 2011 and PJM in September 2011. The Phase I software changes were deployed in May, and NYISO activated the software in July. Phase 1 is complete.</p>
---	---

Project	Status and Milestone Deliverables
<p>Interregional Transaction Coordination Phase IV – ISO-NE Intra-hour Transaction Scheduling</p>	<p><b>Status:</b> This project expands upon the work completed in Phases 1 and 3 by implementing Intra-hour energy transaction scheduling capabilities with ISO-NE. The 2008 and 2009 State of the Market recommendation #2 is, “NYISO continue its work with neighboring control areas to better utilize the transfer capability between regions.”</p> <p><b>Deliverables:</b> The focus of this project in 2011 is to develop the functional requirements and complete the tariff filing in 4<sup>th</sup> Q 2011.</p>
<p>Market to Market Coordination - PJM</p>	<p><b>Status:</b> In late-2006, PJM approached NYISO, interested in developing a program to allow inter-control area dispatch to help manage congestion. PJM has implemented a program with MISO. In 2007, NYISO initiated discussions with PJM to further understand the MISO program and begin to outline a conceptual straw proposal for a similar program between PJM and NY. NYISO has continued to define the details of a Market to Market (formerly known as Congestion Management) protocol between NYISO and PJM. In 2009, NYISO worked with PJM and NYISO stakeholders to develop a Market to Market protocol. Protocol development was not completed in 2009. The question of entitlement rights on coordinated flowgates could not be addressed until the NYISO had developed or procured a market flow calculator. The December 30, 2010 FERC Order regarding the NYISO’s Lake Erie Loop Flow response directs the NYISO to implement market to market with PJM faster than originally planned.</p> <p><b>Deliverables:</b> In 2011 the NYISO will implement the market flow calculator necessary for this project. The deployment of this project is scheduled for 4<sup>th</sup> Q 2012.</p>
<p>Interface Pricing (PAR Modeling Upgrades)</p>	<p><b>Status:</b> PAR Modeling Upgrades is a Broader Regional Markets initiative that modifies how power flows are represented on the SCUC, RTC and RTD models. This requires changes to the current PAR modeling techniques used by SCUC, RTC and RTD, where PARs will need to be modeled as free flow devices for the purposes of pricing and dispatch, but also provide the ability to offset the PAR schedules with an injection or withdrawal to represent extrinsic power flow effects like Lake Erie Loop Flow. The software changes were successfully implemented in October. This project is complete.</p> <p><b>Deliverables:</b> This project is targeted for deployment in October 2011.</p>
<p>Scheduling and Pricing: Regulation Ramp</p>	<p><b>Status:</b> Today, some generators have a physical limitation on the regulation that can be provided within certain unit operating ranges. This project will allow generators to specify different regulation response rates for different energy output levels, similarly to the three energy response rates allowed today. With these additional regulation response rates, SCUC, RTC, RTD and AGC will know how best to co-optimize the output of a generating unit while meeting the physical operating characteristics of that unit. Additionally, these responses rates will still need to be maintained at a rate that is equal to or lower than the energy response rate. An alternative solution may be to create a distinct regulation upper limit.</p> <p><b>Deliverables:</b> The focus of this project in 2011 is to develop a market design concept in 4<sup>th</sup> Q 2011. The market design concept was presented to stakeholders at MIWG in the 4<sup>th</sup> quarter.</p>

Project	Status and Milestone Deliverables
---------	-----------------------------------

<b>Enterprise Technology Products</b>	
---------------------------------------	--

Enterprise Data Storage Migration	<p><b>Status:</b> This project focuses on migrating from leased storage hardware onto purchased storage hardware with a longer lifespan that can be upgraded with minimal disruptions to the organization. This new storage hardware supports increased performance and storage requirements, which are required for upcoming market design and Smart Grid initiatives. The hardware migration was successfully completed in September.</p> <p><b>Deliverables:</b> The hardware migration is scheduled for completion in 3<sup>rd</sup> Q 2011.</p>
-----------------------------------	--

Identity and Access Management	<p><b>Status:</b> This project continues the roadmap initiated in 2010. This project will help address NERC Critical Infrastructure Protection (CIP) compliance requirements and deliver a foundation for enterprise-wide identity and access management. Technical controls and workflows will manage employee user identities and access rights to widely used critical cyber assets defined by NERC CIP. The solution will provide reporting and visibility to current access entitlements and immediate revocation of rights on employee exit. Changes were successfully deployed in August.</p> <p><b>Deliverables:</b> The focus of this project in 2011 is the implementation of the functionality to automate the controls and management of employer user identities and access rights. Implementation is scheduled for 3<sup>rd</sup> Q 2011.</p>
--------------------------------	---

Ranger Hardware Migration	<p><b>Status:</b> This project focuses on migrating from leased servers onto purchased servers for the benefits of a scalable solution that can be upgraded with minimal disruptions to the organization, extends the lifespan of the Ranger platform, and enables software performance tuning to support data volumes anticipated with future market initiatives.</p> <p><b>Deliverables:</b> The hardware migration was successfully completed. This project is now complete.</p>
---------------------------	---

<b>Finance Products</b>	
-------------------------	--

Bid Production Cost Guarantee Enhancements	<p><b>Status:</b> These changes were requested as part of the Strategic Tariff review and specifically impact the Day Ahead and Real Time Bid Production Cost Guarantee (BPCG) calculations with respect to Bilateral transactions and RT BPCG for regulation providers. Modifications are needed to the DA and RT BPCG calculations for generators with bilateral transactions to use implied revenues based on LBMPs and actual bid costs; and, start up costs need to be included in the calculation of BPCG regardless of the existence of bilateral transactions. Modification needed to the RT BPCG calculations for generators providing RT regulation that do not have a DA schedule for energy to include both the cost and revenue components associated with Incremental energy from the units Min Gen to Min Gen plus scheduled regulation MW's. The incremental energy costs are currently not included in the calculation. Software changes were successfully deployed in June. This project is complete.</p> <p><b>Deliverables:</b> The focus of this project is the implementation of the software changes needed to support the market rule changes to be approved by Stakeholders, the Board, and FERC. Implementation is scheduled for 2<sup>nd</sup> Q 2011.</p>
--	---

Consolidated Invoice Redesign	<p><b>Status:</b> This is a multi-year project focused on implementing weekly invoicing in compliance with FERC Order 741 and replacing old technology. This project will include modifications to Consolidated Invoice, Credit Management System,</p>
-------------------------------	--

Project	Status and Milestone Deliverables
	<p>Oracle Financials and Finance Department processes, and the Customer Settlements Data Mart to support flexible invoicing. This project was successfully deployed in August. This project is complete.</p> <p><b>Deliverables:</b> This project will implement the software needed to support a shortened settlement cycle and other credit reforms included in FERC Order #741. Implementation is scheduled for 3<sup>rd</sup> Q 2011 to support production of the first weekly invoice October 12, 2011.</p>
<b>Operations &amp; Reliability Products</b>	
Dynamic Pricing	<p><b>Status:</b> This project will make available LBMP data directly to the Transmission Owners in support of on-going Smart Grid efforts. Today TOs must gather LBMP data from the NYISO web.</p> <p><b>Deliverables:</b> The focus of this project in 2011 is the development of an architectural design specification in 4<sup>th</sup> Q 2011.</p>
Operational Tools and Enhancements	<p><b>Status:</b> The focus of this project is to provide the tools necessary to improve NYISO Operations' analytical capabilities for purposes of improving reliability. There are several initiatives, including support for continuing to provide NERC IDC mandated data exchanges to meet NERC and NASB standards. Existing manual processes used by Security Constrained Unit Commitment (SCUC) Engineers in determining Day Ahead Market (DAM) Unit Commitment will be reviewed and automated where possible. The software changes were successfully deployed in October. Enhancements for 2011 are complete.</p> <p><b>Deliverables:</b> Two deployments are scheduled, one for June and one for October, to implement the prioritized functionality.</p>
Ranger Enhancements for Optimization and Performance	<p><b>Status:</b> Over the next few years, projects like Disaggregated Virtual Trading and the Broader Regional Market initiatives are expected to significantly increase data and transaction volumes processed in the Ranger system. This project aims to analyze and deploy optimization requirements from ABB that are appropriate to improve processing. The primary focus will be on optimization of processing time.</p> <p><b>Deliverables:</b> The focus of this project for 2011 is the completion of an architectural design specification in 4<sup>th</sup> Q 2011.</p>
Reference Level Software Enhancements	<p><b>Status:</b> This project will focus on enhancing the Reference Level Software (RLS) application that was implemented in November 2010. The enhancements to the RLS application will focus on automating manual processes and providing long term monitoring tools to Market Mitigation and Analysis. Software changes were successfully deployed in June. This project is complete.</p> <p><b>Deliverables:</b> The implementation of these prioritized enhancements is scheduled for 2<sup>nd</sup> Q 2011.</p>
Reliability Commitment Transparency	<p><b>Status:</b> This project will provide Dispatchers with a drop down list of available Application of Reliability Rules (ARR) to select the ARR in effect when TOs call to inform dispatchers of a Day Ahead Reliability Unit (DARU). Software changes</p>

Project	Status and Milestone Deliverables
	<p>were deployed in June. This project is complete.</p> <p><b>Deliverables:</b> Implementation of this functionality is scheduled for 2<sup>nd</sup> Q 2011.</p>
<b>Planning and TCC Market Products</b>	
<p>TCC Multi-Duration and Balance of Period Centralized Auction</p>	<p><b>Status:</b> This project continues the 2010 efforts to provide for TCC Auction 'End State' functionality; in 2010 NYISO implemented functionality for MPs to sell TCCs in any round. Continuing efforts will focus on the implementation of Non-Historic Long Term Fixed Price TCCs, multi-duration capability period auctions, and balance of period TCCs. Consistent with NYISO's response to a FERC Order, NYISO is planning a June 2013 implementation to support offering Non-Historic Long Term Fixed Price TCCs beginning with the Autumn 2012 Capability Period Auction. NYISO completed the functional requirements specifications in June as planned.</p> <p><b>Deliverables:</b> The focus of this project is the completion of the functional requirements specifications for all of the functionality in 2<sup>nd</sup> Q 2011.</p>
<p>High Performance Computing for Planning Studies</p>	<p><b>Status:</b> This is a project to put in place the infrastructure required to enable System Resource Planning to conduct large, data intensive planning studies. The solution for MARs was successfully deployed in August. Phase I of this project is complete.</p> <p><b>Deliverables:</b> The focus of this project in 2011 is the implementation of the solution in 4<sup>th</sup> Q 2011.</p>
<p>Siemen's PTI Model-on-Demand Phase II</p>	<p><b>Status:</b> The second phase of this project will focus on maintenance and consulting for implementation of the Siemens PTI Model-on-Demand (MOD) web portal, which will allow TOs and MPs to review and approve data in a structured, interactive manor. The architectural design specification was reviewed and approved by IT in September.</p> <p><b>Deliverables:</b> The focus of this project in 2011 is the completion of the architectural design specification in 3<sup>rd</sup> Q 2011.</p>

## Summary Description of FERC Regulatory Filings, Investigations and Rulemakings and Related Orders in NYISO Matters November 2011

<b>Filing Date</b>	<b>Filing Summary</b>	<b>Docket</b>	<b>Order Date</b>	<b>Order Summary</b>	<b>Outcome</b>
9/23/2011	205 filing of an LGIA among NYISO, NiMo, NYSEG, and Nine Mile Point	ER11-4621-000	11/4/2011	FERC letter order accepting the Nine Mile Point LGIA, effective 9/8/11 as requested	Accepted
9/16/2011	NYISO compliance filing to correct EITC formula (remove parenthesis) ST section 25.6.2	ER11-2547-004	11/14/2011	FERC letter order accepting re: correction to the Import Supplier Guarantee Payment formula	Accepted
9/28/2011	Section 205 filing of tariff revisions regarding penalties for voltage service suppliers	ER11-4664-000	11/15/2011	FERC letter order accepting tariff revisions effective 11/27/11 as requested	Accepted
10/5/2011	Section 205 filing of tariff revisions regarding Dispute Resolution Provisions	ER12-26-000	11/25/2011	FERC letter order accepting revisions effective 12/4/11, as requested	Accepted
10/5/2011	Section 205 filing of ISO Agreement revisions regarding Dispute Resolution Provisions	ER12-27-000	11/25/2011	FERC letter order accepting revisions effective 12/4/11, as requested	Accepted
11/1/2011	NYISO e-filing of Opposition to request for fast track processing included in the 10/27/11 Complaint of Seneca Power Partners Requesting Fast-Track Processing	EL12-6-000, EC12-16-000			
11/4/2011	NYISO filing of comments to USDOE in the ITC Transmission proceeding regarding operation of PARs on the Ontario/Michigan Interface	DOE PP-230-4			
11/7/2011	NYISO filing of proposed tariff revisions regarding new capacity zones	ER12-360-000			
11/9/2011	NYISO answer to the motion to strike and motion for leave to answer of the NRG Companies concerning NRG's and Complainants' statements regarding the alleged disclosure of confidential information contained in the NYISO's October 12, 2011 answer	EL11-50-000			
11/15/2011	NYISO 205 errata to MST section 4.5 RS 1 defined terms	ER12-416-000			
11/16/2011	NYISO 205 filing of an executed amended and restated LGIA among	ER12-428-000			

<b>Filing Date</b>	<b>Filing Summary</b>	<b>Docket</b>	<b>Order Date</b>	<b>Order Summary</b>	<b>Outcome</b>
	NYISO, NYSEG, and Howard Wind				
11/18/2011	NYISO filing of comments on Green Mountain request for Tariff Waiver	ER12-307-000			
11/23/2011	NYISO filing of an answer to certain RS1 revision protests and comments	ER12-89-000			
11/28/2011	NYISO filing of its answer to Seneca Power Partners complaint (public and privileged versions)	EL12-2-000
