

# Stakeholder Survey Results and NYISO Scoring of 2023 Proposed Market Projects (revised)

#### **Brian Hurysz**

Manager, Enterprise Infrastructure Products

#### **Budget and Priorities Working Group**

July 12, 2022, KCC

#### Agenda

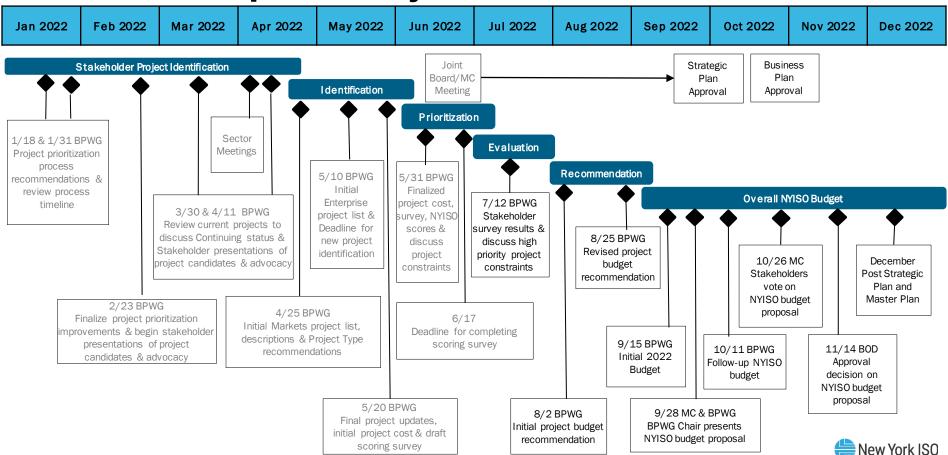

- Project Prioritization Timeline
- Stakeholder Survey
- Stakeholder Survey Comments
- High Priority Project Constraints and Options
- Historic Budgets
- Next Steps
- Appendix: (Material from May 31st BPWG)
  - Milestones and Project Prioritization Phases
  - 2023 Market Project Candidates
  - NYISO Scores & High Priority Project Constraints

# Project Prioritization Timeline

#### **2023 Proposed Project Prioritization Timeline**

Raw Score = Average of scores from each organization that completed the stakeholder survey

Weighted Score = Scores from voting members only are averaged across the sector they are in and weighted based on governance voting weights Sector Count = number of sectors where at least 25% of the sector's survey responses put points on a project and the average points across the sector was 5 or greater

Count = number of survey responses that had assigned points to the project

# Stakeholder Survey Comments

| Project                         | Organization   | Comment   |
|---------------------------------|--|---|
| 5-Minute Transaction Scheduling | Long Island Power Authority                          | The ability to address ramping and quickly changing resource needs on a wholesale level is increasingly important.  |
| Advancing NYISO Transparency    | Savion, LLC  | This doesn't take much effort, just release studies to stakeholder's as they become available.  |
| Balancing Intermittency (SOM)   | City of New York                                     | This project, the Dispatchability and Fast Response Product project, and the Review of Real-Time Market Structure project all seem to be addressing the same general topic - the transition that is now occurring and the changing resource mix. The NYISO should merge these three projects into one project and comprehensively consider the overlapping issues they are intended to address. |
| Balancing Intermittency (SOM)   | Enerwise Global Technologies,<br>Inc. dba CPower     | This project will be important to planning for future market dynamics and identify market reforms and new products or designs that will help accommodate and incent the resource operating characteristics that will provide the most value in maintaining a reliable electric system.  |
| Balancing Intermittency (SOM)   | Long Island Power Authority                          | Addressing cost-causation and avoiding externalizing balance of system costs will create a more economic renewable build-out.   |
| Balancing Intermittency (SOM)   | NYS Department of State Utility<br>Intervention Unit | Project Nos. 3, 7, and 22 all designed to address a common issue of intermittent resource integration. The ultimate work product of the three would be best considered in an integrated project.  |

| Project   | Organization                                     | Comment   |
|---|--|---|
| Constraint Specific Transmission Shortage Pricing (SOM)                         | Long Island Power Authority                      | Worth continuing.   |
| Coordinated Grid Planning Process (CGPP)<br>Support - Requested by New York TOs | Long Island Power Authority                      | Important for timely and cost-effective CL&CPA implementation.  |
| Coordinated Grid Planning Process (CGPP)<br>Support - Requested by New York TOs | Savion, LLC                                      | This local grid work is imperative to meeting CLCPA goals.  |
| CRIS Expiration Evaluation  | Savion, LLC                                      | The NYISO has at least 3GW of CRIS tied up in units with very low capacity factors. This is costing IC's and rate payers hundreds of millions in Transmission overbuild.                      |
| Dispatchability and Fast Response Product - Requested by NYPA                   | Enerwise Global Technologies,<br>Inc. dba CPower | We support investigation and development of new market products that incent resource flexibility and fast-response capabilities that will be applicable to all technology and resource types. |
| Dispatchability and Fast Response Product - Requested by NYPA                   | Helix Ravenswood, LLC                            | This will likely be an important project at a later date - other priorities prevent an allocation of vote at this time.   |
| Dispatchability and Fast Response Product - Requested by NYPA                   | Long Island Power Authority                      | Cost recovery for dispatchable products is important. Cost allocation on a cost-causation basis will also help.   |

| Project  | Organization   | Comment   |
|--|--|---|
| Dispatchability and Fast Response<br>Product - Requested by NYPA | NYS Department of State Utility<br>Intervention Unit | Project Nos. 3, 7, and 22 all designed to address a common issue of intermittent resource integration. The ultimate work product of the three would be best considered in an integrated project.  |
| Dynamic Reserves (SOM)   | Long Island Power Authority                          | Important as need for reserves becomes increasingly dynamic.  |
| Emissions Transparency - Requested by<br>Stakeholders            | Enerwise Global Technologies,<br>Inc. dba CPower     | Increased visibility into grid emissions in real time on an hourly basis will help to provide visibility to all MPs, stakeholders, and energy users and will help optimize energy consumption/DER operation to times when they will be most beneficial to reduce carbon. The transparency will also be beneficial for reporting and policy development.   |
| Emissions Transparency - Requested by Stakeholders               | Long Island Power Authority                          | Helpful in understanding marginal emissions impacts of various market choices.  |
| Emissions Transparency - Requested by Stakeholders               | Savion, LLC  | If this isn't included as carbon pricing in the market, then this won't move the needle.  |
|  | Centrica Business Solutions                          | The language focuses on price responsiveness as a way of enhancing demand side participation, but does not limit it to those types of approaches. Our point allocation is explicitly conditioned on this project being open to considering other ways of enhancing DR participation including specifically making changes to the existing SCR program, as |
| Engaging the Demand Side   | Optimize, LLC  | suggested by Mike DeSocio in a conversation at the Annual Meeting.  |

| Project                  | Organization                                     | Comment  |
|--------------------------|--|--|
| Engaging the Demand Side | City of New York                                 | The need to consider load as much as supply was made clear at the recent Joint MC-Board meeting. While we appreciate the other work facing this team, the NYISO should dedicate some resources to engaging with customers and understanding the contributions they can make to maintaining a reliable system.  |
| Engaging the Demand Side | Enel X North America, Inc.                       | Do not support project as written but would support reforming SCR to include an option for longer duration participation and an option for shorter notification times if it led to higher capacity accreditation   |
| Engaging the Demand Side | Enerwise Global Technologies,<br>Inc. dba CPower | While the Engaging the Demand Side project looks to explore opportunities to enhance participation of demand based in response to price, the NYISO should also explore opportunities to modify existing demand response programs to retain and grow participation in these programs. Following conversation with NYISO staff during the Joint Board and Management Committee meetings this year, they indicated that this project could be utilized to explore such program modifications. |
| Engaging the Demand Side | Helix Ravenswood, LLC                            | This will likely be an important project to enhance the interaction of demand with intermittent supply at a later date when intermittency becomes a critical variable - other priorities prevent an allocation of vote at this time.   |

| Project  | Organization                              | Comment  |
|--|---|--|
| Engaging the Demand Si de  | NRG Power Marketing LLC                   | While the focus of the project is to examine how to incorporate price-responsive load into the market, there is a low-hanging fruit of revising demand response program that was first developed 15+ years ago to provide another tool to balance the NYCA system. Our point allocation is explicitly conditioned on this project being open to considering ways of enhancing SCR program, for example: (1) allowing demand response resources to provide longer than 4-hr load reduction for additional compensation; and/or (2) creating a fast (-er) response demand response product that can be committed just few hours ahead of the anticipated need thus introducing additional operational flexibility addressing peaking conditions and intermittency. |
| Enhancing Fuel and Energy Security   | Long Island Power Authority               | Critical ongoing work.   |
| Enhancing Fuel and Energy Security   | Savion, LLC                               | This will happen automatically.  |
| Evolving Financial Transaction Capabilities:<br>Bilateral Transactions - Requested by NY-Best<br>and Bayonne Energy Center | Savion, LLC                               | There is n't much meat here, ESR's need to be deliverable in their load zone. Charging as a sink only really helps energy, which is consistent with the MIS.   |
| Hybrid Aggregation Model   | Consolidated Edison Co. of New York, Inc. | While Con Edison has not given any points to this project, we support continued work on it in 2023 and believe that the project should have been characterized as Continuing given its current stage of development.   |

| Project   | Organization                                     | Comment   |
|---|--|---|
| Hybrid Aggregation Model                                      | Enerwise Global Technologies,<br>Inc. dba CPower | This project will be key to helping enable heterogenous DER aggregations a viable option for participation within the DER PM.   |
| Hybrid Aggregation Model                                      | Helix Ravenswood, LLC                            | See note to Storage as Transmission – Requested by Stakeholders project.  |
| Hybrid Aggregation Model                                      | Long Island Power Authority                      | Very important in supporting hybrid resources not externalizing their balance of system costs.  |
| Hybrid Aggregation Model                                      | Orange & Rockland Utilities, Inc.                | While Con Edison has not given any points to this project, we support continued work on it in 2023 and believe that the project should have been characterized as Continuing given its current stage of development.                |
| Improve Duct-Firing Modeling (SOM)                            | Long Island Power Authority                      | Savings to loads and generators.  |
| Interconnection Process Enhancements -<br>Requested by ACE-NY | City of New York                                 | The City is supportive of the need to improve the interconnection process, and it appears that the FERC intends to take action on this issue later this year. In other words, this likely will become a mandatory project for 2023. |

| Project  | Organization                                      | Comment   |
|--|---|---|
| Interconnection Process Enhancements - Requested by ACE-NY | GI Endurant LLC dba GI Energy                     | With advent of "dual participation," the new Energy Storage Resources (ESR) asset class under FERC Order 841, and especially the coming DER participation model under FERC Order 2222, it will be invaluable to NYISO and developers/customers alike to have more streamlined, standardized, and transparent interconnection protocols and interfaces as the volume of applications increases. The Joint Utilities (JU) of NY have each started to adopt interconnection portals/softwaree.g. PowerClerk or other CRM-based portalsthat provide a centralized way to interact with case managers and to track application progress. An equivalent system for NYISO interconnections would be fantastic! |
| Interconnection Process Enhancements - Requested by ACE-NY | NYS Department of State Utility Intervention Unit | The NYISO has recognized the benefit of making improvements to its interconnection process and FERC has signaled that it will be exploring this issue later this year. Therefore, we anticipate the NYISO will have to put resources to address interconnection in 2023.  |
| Interconnection Process Enhancements - Requested by ACE-NY | Savion, LLC                                       | We are seeing studies that are very behind. 300 Interconnection requests went in last year and are waiting SRIS studies. This needs to happen or CLCPA will fail.   |
| LCR Optimizer Enhancements                                 | Long Island Power Authority                       | Cost savings can be expected.   |
| M2M West PARs  | Savion, LLC                                       | This is good planning practice.   |

| Project   | Organization                                      | Comment   |
|---|---|---|
| Reserving Capacity for TCC Balance-of-<br>Period (BoP) Auctions | Long Island Power Authority                       | Can postpone pending higher priority items.   |
| Review of Real-Time Market Structure<br>(SOM)                   | NYS Department of State Utility Intervention Unit | Project Nos. 3, 7, and 22 all designed to a ddress a common issue of intermittent resource integration. The ultimate work product of the three would be best considered in an integrated project.   |
|   |   | Additional mechanisms for storage participation in the NYISO markets must be just and reasonable and not unduly discriminatory or preferential. Proposals that would result in storage as a transmission only asset ("SATOA") run the risk of being unduly discriminatory or preferential because they can favor incumbent transmission owners. Helix Ravenswood supports creating just and reasonable opportunities for storage to participate in the NYISO markets and as part of competitive solicitations. As opposed to a new project, one possibility could be to fit certain storage under the NYISO's "CSR" or integrate it into the discussions for the development of hybrid storage rules. However, at this time, rather than create a new project, the NYISO should focus on other priorities. As storage becomes part of solicitations for supply, RECs, transmission or some combination of service, rules can be developed to accommodate their integration in an existing project. As long as a storage resource is selected as part of a just and reasonable and not |
| Storage as Transmission – Requested by                          |   | unduly discriminatory or preferential competitive solicitation, market rules should   |
| Stakeholders  | Helix Ravenswood, LLC                             | be able to follow.  |

| Project   | Organization                | Comment   |
|---|-----------------------------|---|
| Storage as Transmission – Requested by Stakeholders | Long Island Power Authority | Creating processes where storage PPR solutions can be compared and if warranted, selected for regional cost allocation will be helpful as storage costs decline.  |
| Storage as Transmission – Requested by Stakeholders | Savion, LLC                 | The NYISO should dedicate 0 effort. Storage is always a market participant and should be required to gothrough the queue like all market participants. Further storage projects in lieu of transmission upgrades rarely makes economic sense. |

| Project                                    | Organization                          | Comment   |

| Please enter any additional comments below | Alcoa, Inc.                           | Given increasing demands and challenges being placed on the system, Multiple Intervenors feels that the NYISO needs to better enhance load participation in wholesale markets and, therefore, strongly supports the Engaging the Demand Side project. |
| Please enter any additional comments below | Alliance for Clean Energy New<br>York | Thank you NYISO!  |
| Please enter any additional comments below | Covanta Niagara, LP                   | I believe the constant phone surveys are unnecessary and bring absolutely zero value to the stakeholders.   |
| Please enter any additional comments below | Cypress Creek Renewables, LLC         | In addition to working on the HSR model, we would be interested in the NYISO working to fine-tune the CSR model.  |
| Please enter any additional comments below | Enel X North America, Inc.            | Please see my comment above that my support for "Engaging the Demand Side" is contingent on a different scope of work. Thanks.  |
| Please enter any additional comments below | GlobalFoundries, U.S., Inc.           | Given increasing demands and challenges being placed on the system, Multiple Intervenors feels that the NYISO needs to better enhance load participation in wholesale markets and, therefore, strongly support the Engaging the Demand Side project.  |

| Project Organizat  | cion Comment  |
|--|---|
| Please enter any additional comments below. Helix Ravenswood, Ll | Overall the NYISO market designs and rules must be just and reasonable and not unduly discriminatory or preferential on a collective basis. Individual market rules, which might make sense as part of a more comprehensive and larger market design, might not be just and reasonable without other changes to ensure efficient competitive incentives. Similar to how the buyer-side mitigation changes and capacity accreditation revisions moved forward in a coordinated manner, future rule changes need to continue to be developed and implemented in a balanced and coordinated manner. Although Helix Ravenswood may have provided 0% for certain projects, it is not necessarily because the project is not worthwhile at some time in the future, it is because it thinks other priorities need to be addressed sooner. |
| Please enter any additional comments below IBM Corporation       | Given increasing demands and challenges being placed on the system, Multiple Intervenors feels that the NYISO needs to better enhance load participation in wholes ale markets and, therefore, strongly support the Engaging the Demand Side project.   |
| Please enter any additional comments below Long Island Power Au  | Lots of work to do to accommodate renewable build-out and required flexible emission-free resources.  |
| Please enter any additional comments below LS Power Grid New Y   | The coordination between the NYISO, DPS Staff, and NY Utilities on this effort is critical in identifying the most efficient and cost effective transmissions olutions ork, LLC for the market.   |

| Project   | Organization                | Comment   |
|---|-----------------------------|---|
| Please enter any additional comments below  | Savion, LLC                 | Please hire extra staff for IC studies. Also review the process and scope to find efficiencies. It seems many SRIS scoped items bare little fruit in terms of reliability issues resolved. Perhaps some of them are not necessary and further some of the scope can be addressed in the CY, since they are dependent on other projects. |
| Please enter any additional comments below  | Wegmans Food Markets        | Given increasing demands and challenges being placed on the system, Multiple Intervenors feels that the NYISO needs to better enhance load participation in wholesale markets and, therefore, strongly supports the Engaging the Demand Side project.   |
| Please provide any recommendations you may have for future enhancements to the Project Prioritization Process | Borrego Solar Systems, Inc. | We greatly appreciate you providing the NYISO resource scoring and prioritization prior to the stakeholder votes.   |
| Please provide any recommendations you may have for future enhancements to the Project Prioritization Process | Hanwha Q CELLS USA Corp.    | Any future interconnection cost allocation should have cost cap and system impact studies should have binding costs.  |
| Please provide any recommendations you may have for future enhancements to the Project Prioritization Process | Savion, LLC                 | This is a good way to understand the stakeholder aggregate needs, but the NYISO has to re-allocate resources accordingly. It seems the same departments have the same staff each year regardless of the survey results. I'd say act on the survey results.  |

# High Priority Project Constraints and Options

#### High Priority Constraints - Stakeholder Scores

- New Resource Team
  - Resource constraints start to show up with Engaging the Demand Side
- Energy Market Team
  - Resource constraints start to show up with Emissions Transparency Requested by Stakeholders
- Capacity Market Team
  - Resource constraints start to show up with LCR Optimizer Enhancements
- Planning Department
  - Resource constraints start to show up with Storage as Transmission Requested by Stakeholders
- Dispatchability and Fast Response Product Requested by NYPA and lower stakeholder ranked projects do not appear supportable based on our initial analysis
  - The NYISO believes the Dispatchability and Fast Response Product and the Balancing Intermittency efforts are very similar in scope. Therefore, the NYISO will consider some of this scope as part of the Balancing Intermittency effort.

#### **Score Comparison**

# Potential Options being considered by the NYISO to Resolve Constraints

- Increase NYISO staff to support more projects
  - The NYISO will also be reallocating staff to support additional high appeal projects
  - For example, Market Design staff will be assigned to cover projects outside their department scope if/when needed
- Utilize consulting to extent possible Impacts Rate Schedule 1
  - For example, utilize consulting to assist with Engaging the Demand Side so that projects like Hybrid Aggregation Model might be supportable
- Adjust proposed project commitments to reduce scope allowing for work on more projects at the same time
  - For example, changing the Storage as Transmission project milestone from Market Design Concept Proposed to Issue Discovery would help to resolve resource constraints
- Remove projects from consideration that had high NYISO score and lower stakeholder score
  - For example, remove Improving Duct Firing Modeling as a project for 2023
- Options being discussed to resolve resource constraints need to be assessed for their impact on the overall NYISO budget

## Historic Budgets

# 2023 Proposed Projects Compared to Historic Approved Budgets

Note: The NYISO did not have separate Market and Enterprise categories prior to 2020

## **Next Steps**

#### **Next Steps**

- Review the NYISO's initial project budget recommendation at the August 2<sup>nd</sup> BPWG meeting
- Review the NYISO's revised project budget recommendation at the August 25<sup>th</sup> BPWG meeting
- Contact Brian Hurysz or Member Relations for any Project Prioritization related issues
  - Send to Brian Hurysz at <u>bhurysz@nyiso.com</u> or cell (518) 461-6405

#### **Our Mission & Vision**

#### **Mission**

Ensure power system reliability and competitive markets for New York in a clean energy future

#### Vision

Working together with stakeholders to build the cleanest, most reliable electric system in the nation

# Milestones and Project Prioritization Phases

#### **Milestone Definitions**

| Milestone                         | Definition   |
|-----------------------------------|--|
| Issue Discovery                   | NYISO has facilitated education session(s) for stakeholder knowledge development of problem/issue, conducted stakeholder solicitation of potential solutions to address problem/issue, and summarized findings at a working group meeting for potential ranking and future project identification. |
| Study Defined                     | The scope of work for the study has been presented to stakeholders, including a discussion on the necessary input(s), assumption(s) and objective(s) of the study.   |
| Study Complete                    | Scope of work to be performed has been completed; results and recommendations have been presented to the appropriate Business Owners and stakeholders.   |
| Market Design Concept<br>Proposed | NYISO has initiated or furthered discussions with stakeholders that explore potential concepts to address opportunities for market efficiency or administration improvements.  |
| Market Design Complete            | NYISO has developed with stakeholders a market design concept such that the proposal can be presented for a vote at the BIC or MC to define further action on the proposal.  |
| Functional Requirements           | NYISO has completed documentation of the functional requirements and the Business Owner has approved.  |
| Architectural Design              | The architectural design document is complete and software development is ready to begin.  |
| Projects with the follow          | ing Milestones will generally be proposed as Continuing in future years, subject to Stakeholder input  |
| Software Design                   | The software design document is complete and software development is ready to begin.   |
| Development Complete              | Development has been completed, packaged and approved by the Supervisor.   |
| Deployment                        | Required software changes to support commitment have been integrated into the production environment.  |

#### **Project Prioritization Process**

| Phase                                 | Description  |
|---------------------------------------|--|
| Stakeholder Project<br>Identification | Stakeholders may present project ideas at stakeholder meetings, sector meetings, get feedback and refine their proposal during this phase before the NYISO provides a comprehensive list of candidate projects for consideration.  |
| Identification                        | The NYISO develops a Markets and Enterprise project candidate lists from regulatory obligations, strategic initiatives, State of the Market recommendations, infrastructure enhancements, product plans and stakeholder proposals. These are presented and further refined with stakeholder input during this phase.   |
| Prioritization                        | This phase involves a stakeholder survey and the NYISO prioritization of projects. The stakeholder survey will facilitate an assessment of the relative priority of the topic within the portfolio and is used to determine stakeholder appeal. The NYISO prioritization incorporates the stakeholder appeal into objective criteria that reflects strategic alignment, expected outcomes, risks, and ability to execute in development of a priority score for each Market project. |
| Evaluation                            | This phase involves performing a feasibility assessment based on detailed cost and labor estimates, dependencies, priority scores, and stakeholder feedback.   |
| Recommendation                        | This phase involves proposing a feasible set of project deliverables and related budget requirements. The proposal is refined as needed based on stakeholder feedback.   |

#### **Project Type**

| Project Type | Description  |
|--------------|--|
| Mandatory    | Strategic Initiatives and FERC Orders. These projects will be included in the budget   |
| Continuing   | Approved in a prior year and have progressed to either Software Design, Development Complete, or Deployment. Additional projects may be classified as Continuing based on stakeholder feedback. These projects will be included in the budget  |
| Future       | Consensus from stakeholder discussions of this projects priority relative to other projects has resulted in these projects NOT being prioritized and initiated in the coming budget year. Resources, time constraints, stakeholder feedback, and other project dependencies have been taken into consideration |
| Prioritize   | Projects to be prioritized and included in the budget based on a feasibility assessment taking into consideration resources, time constraints, stakeholder feedback, priority score, and other project dependencies. Market projects are included in the stakeholder survey                                    |

#### **Project Category**

| Project Category | Description  |
|------------------|--|
| Enterprise       | Includes internal-facing technology and back office support projects that have no market rule changes. This list includes projects that may be noticeable to Market Participants. These projects are NOT included in the stakeholder survey        |
| Market           | Projects associated with market rule(s) including market design and study projects as well as any project implementing market rule changes. These projects are included in the stakeholder survey unless they are Mandatory, Continuing, or Future |

#### **Project Scoring**

| Project Scoring       | Description  |
|-----------------------|--|
| NYISO Only            | Enterprise projects that are not Mandatory, Continuing, or Future types are scored by the NYISO Only during the Prioritization phase. These projects are included in the budget based on a feasibility assessment taking into consideration resources, time constraints, priority score and other project dependencies.  |
| Stakeholder<br>Scored | Market projects that are not Mandatory, Continuing, or Future are included in the stakeholder survey and scored by the NYISO during the Prioritization phase. These projects are included in the budget based on a feasibility assessment taking into consideration resources, time constraints, stakeholder feedback, priority score, and other project dependencies. |

#### **High Priority Project Constraints**

- New Resource Team
  - Resource constraints start to show up with Hybrid Aggregation Model
- Energy Market Team
  - Resource constraints start to show up with Improve Duct-Firing Modeling (SOM)
- Capacity Market Team
  - Resource constraints start to show up with CRIS Expiration Evaluation
- Engaging the Demand Side and lower-ranked projects do not appear supportable based on our initial analysis
- The NYISO is continuing to evaluate these resource constraints and looks forward to more insights from the Stakeholder Survey
