

# Special Case Resources

**Special Case Resources (SCRs)** are electricity consumers that can reduce load as directed by the NYISO

- Minimum eligibility requirement: **100kW**
- Demand Response can be provided by one resource or a group of aggregated resources

## Examples of Demand Response Resources:

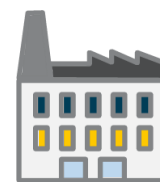

**Colleges**

**Hospitals**

**Commercial Buildings**

**Industrial Companies**

## Load Reduction

### Response Type C:

Curtailment: Curtailing the resource facility's load

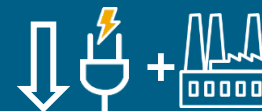

### Response Type G:

Generation: Use of a qualified behind-the-meter local generator

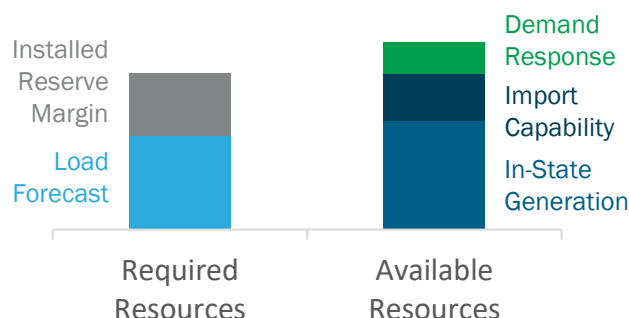

### Response Type B:

Both: Use of i) curtailment and ii) generation

## ICAP Market Participation

SCRs offer capacity into ICAP auctions based upon response type

## Settlement

### Energy Payments:

Based on actual Load Reduction

### Capacity Payments:

Based on capacity awarded in auctions
