

Statement read by Mike DeSocio (NYISO) prior to DER 205 Filing discussion at 2/22/23 MC meeting:

“As part of its 2023 Engaging the Demand Side Project, the NYISO commits to evaluating the ability of small facilities to provide wholesale market services as part of an Aggregation. The NYISO looks forward to collaborating with its stakeholder community to learn about specific use cases for facilities smaller than 10kW and the abilities of Aggregators to efficiently facilitate their wholesale market participation. These discussions will provide both NYISO and its stakeholders with a useful framework to consider how best to accommodate small facilities and, where appropriate, identify modifications to the NYISO’s Aggregation rules. The ultimate goal of these efforts is to propose a set of market rules for small facilities that enhance grid reliability and resilience, reduce consumer costs, and lower barriers to entry for small DER.”
