

Timothy Lundin

LS Power Grid NY

May 2021 – Present

Transmission Regulatory Policy Manager 6/2021 –Current

- Monitor NYISO governance process to identify market rule impacts to LS Power Grid NY operations.
- Monitor for PPTN solicitation activity and support development of proposals.
- Advocate improvements through NYISO working groups and committees.
- Current Chair of the Electric System Planning Working.

New York State Power Authority

December 2015 – May, 2021

Senior Business Development Manager – July 2019 to May 2021

- Prior Project Lead for a transmission project awarded through the New York State Independent Operator (NYISO) PPTN process.
- Managed the day-to-day relationship with our project partner along with NYPAs internal Project Management team.
- Oversaw the development and execution of commercial agreements between parties.

Business Development Manager – April 2018 to July 2019

- Perform economic, quantitative, and statistical analysis to support new opportunities within the team.
- Assemble and lead project teams to perform analysis and/or develop new business opportunities.
- Support senior management in negotiations on new opportunities.

Senior Energy Market Advisor – December 2015 to April 2018

- Participate in the New York System Independent Operator (NYISO) governance process. Over 200 meetings a year.
- Working knowledge of the NYISO Capacity, Energy, and Ancillary Service Markets.

Customized Energy Solutions

January 2012 to December 2015

Market Analyst – February 2012 to December 2015

- Acting client liaison for New York (NY) and New England (NE) wholesale market clients.
- Provide analytical, operational, and market support to Director of Regulatory affairs for client calls and other regulatory client needs.

New York State Electric & Gas (NYSEG)

October 2008-January 2012

Lead Analyst GSO Energy Buyer -April 2011 to January 2012

- Verified generation schedules in accordance with daily bidding and the daily log sheets and ensuring that real-time load requirements were met through the most economically viable means available, within the limits of real-time operation.
- Conducted real time physical transactions between PJM and the NYISO subject to delivery risk due to capacity constraints, scheduling constraints, and unanticipated loop flows.
- Verified bilateral agreements between major power suppliers.

Gas Supply Forecasting Analyst - September 2010 to April 2011

- Used historical Heating Degree Day (HDD) and load data to populate the daily demand forecast for load customers in the RG&E and NYSEG territories.
- Entered and confirmed gas nominations on interstate and intrastate pipelines and made pipeline intraday nominations if necessary due weather change and pipeline curtailments.
- Worked with pipeline representatives and energy buyers to schedule gas in off-peak hours.

Gas Supply Analyst – October 2008 to October 2010

- Maintained SmarTRAC® software that managed natural gas nominations for 11 major pipelines. Worked daily with 15+ Energy Service Company (ESCO) on issues and staying within pipeline constraints on NYSEG & RG&E SmarTRAC®.

Education

State University of New York at Oneonta
Bachelor of Science, Business Economics - January 2002

1. Please describe all experience you have had in chairing groups or committees of diverse interests, with a list of such groups.

I have participated in the NYISO governance process for 11 years. Since this time, I have chaired the Price Responsive Load Working Group (PRLWG), the Markets Issue Working Group (MIWG), and currently sit as the chairperson of the Electric System Planning Working Group (ESPWG). Outside of my work at NYISO, I am the secretary of the Softball Booster Club that coordinates fundraising efforts in our local community.

2. Please describe the support of your organization for your assuming the position of Vice-Chairperson, and describe your ability to make the necessary time commitment.

LS Power Grid NY will support my nomination for the BIC Vice-chair position and is ready to accommodate the time commitment needed to fulfill my obligation. I participate on a day-to-day basis in the governance process and this opportunity will not conflict with my current responsibilities.

3. Please describe any training or experience you have had in mediation, ADR or consensus building.

Throughout my career, I have attended a number of training courses focused on mediation and consensus building. In my current position at LS Power Grid NY, I regularly coordinate meetings with internal stakeholders in an effort to reach consensus on key market issues directly affecting the company.

4. Please describe briefly, why you would like to have this job.

This job allows me the opportunity to directly affect the governance process during a critical time in the energy industry. With my experience, as chair of the MIWG and ESPWG, I believe I can positively contribute to the governance process by supporting stakeholders as we work to reach consensus on the development of key market rules. I have working knowledge of NYISO market systems, transmission planning, and capacity markets, which will prove valuable in challenging situations. I see my prior knowledge and experience as a means to help guide BIC through this critical time.

5. Please describe briefly your organizations actual and/or potential business interests in the Northeast and New York State, including the sector in which your organization participates for purposes of NYISO governance.

LS Power is a leading national non-incumbent transmission owner with ~680 miles of high-voltage transmission completed and an additional 100+ miles and multiple substations under construction. LS Power Grid NY is an active participant in the NYISO FERC Order 1000 Public Policy transmission process and is currently constructing the Segment A Transmission project awarded in 2019. LS Power Grid NY is focused on maintaining the reliability of the system and maximizing stakeholder value. LS Power Grid NY is a non-voting member in the NYISO governance.
