

Interconnection Projects Pre-Application Process

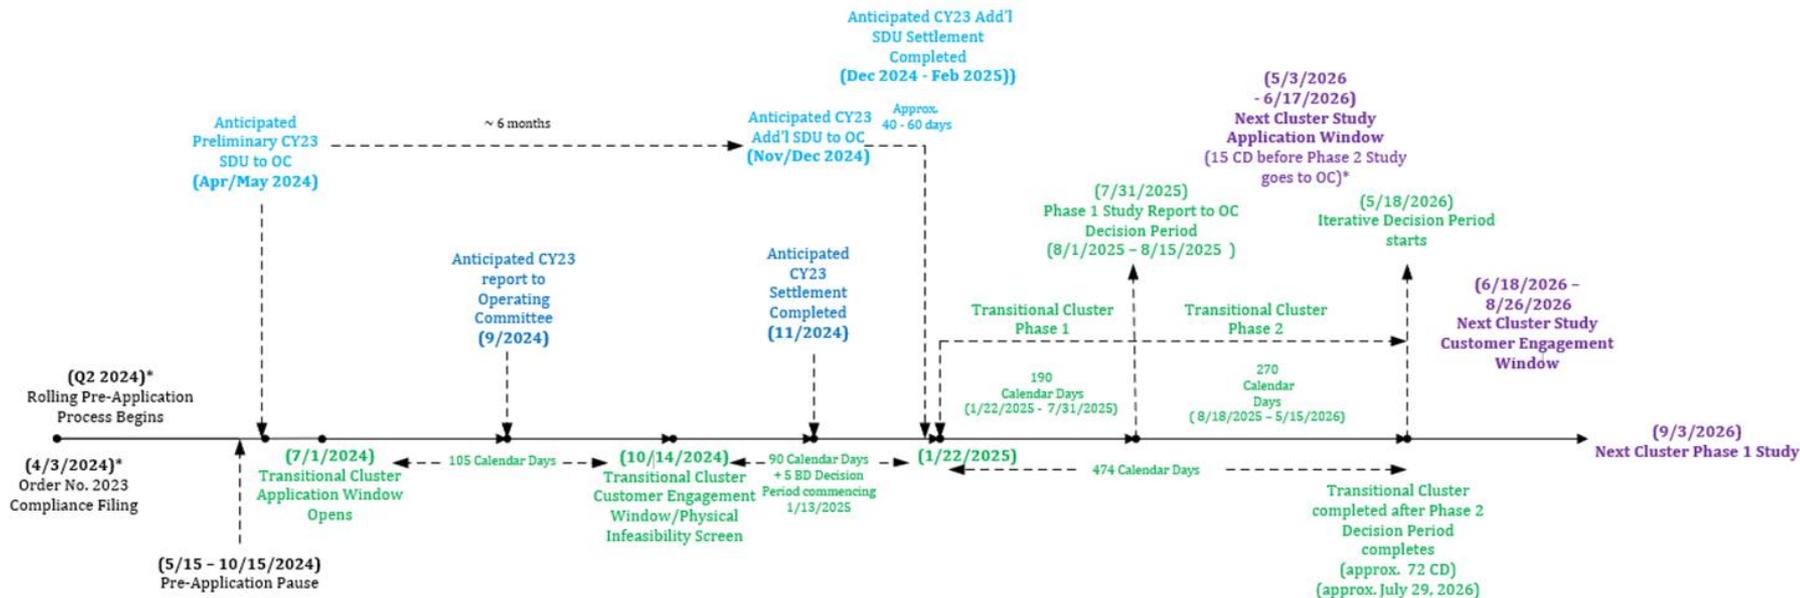

Kimberly Sebben

Manager, Business Process & Quality Services

IITF

March 26, 2024

Transition Process Timeline

*The date of the NYISO's compliance filing is **anticipated** to be April 3, 2024, and the start date for the rolling Pre- Application Process is planned for the next day, April 4, 2024.

Pre-Application Process

Pre-Application Process

- **NYISO proposes to include in its compliance filing a Pre-Application process to further the goal of Order No. 2023 to provide greater information access to potential Interconnection Customers.**
- **Proposed optional Pre-Application Process would be available to prospective:**
 - Small Generating Facilities;
 - Large Generating Facilities; and
 - Transmission projects subject to the Large Facility Interconnection Procedures (currently defined as “Class Year Transmission Projects”)

Pre-Application Process

- Any requester (whether in the interconnection queue or not) can submit a request using the Pre-Application Request form.
 - \$5,000 per Point of Interconnection
 - 25% allocated to NYISO
 - 75% allocated to Connecting TO/Affected TOs
 - Maximum of 2 POIs per Pre-Application Request
 - Pre-Application Requests can be submitted on a rolling basis at any time except during the following 90-day timeframe:
 - 45-calendar days before a Cluster Application Window begins through the end of the Application Window
 - This pause will enable the NYISO/NYTOs to focus on completing pending Pre-Application Requests and timely validating Interconnection Requests in the Application Window.
 - Pre-Application Request form template is posted with the meeting materials

Pre-Application Process, cont.

- **NYISO will route the Pre-Application Request to the applicable Connecting Transmission Owner**
 - Upon the Transmission Owner confirmation that it is the Connecting Transmission Owner, it will proceed to a scoping meeting
 - Connecting Transmission Owner will complete the Pre-Application Report within 25 Business Days after the Pre-Application scoping meeting.
- **Information available in a Pre-Application Report* (see template posted with meeting materials):**
 - POI line/substation name, ID, bus numbers and circuit IDs, voltage, ratings (normal, LTE and STE), terminal end stations
 - For sub-transmission and distribution POIs, circuit loading, peak and minimum load, existing generation MW and proposed generation MW
 - Additional Information (e.g., description of potential new substation bus configuration (not a conceptual one-line diagram), transmission constraints, planned transmission upgrades, parallel lines, breaker rating, available breaker positions, existing/known constraints known physical feasibility issues)

*To the extent readily available data exists

OPEN ADDITIONAL INFORMATION REQUESTS

Title	Due Date	Project Name	Points of Interconnection
«3xRK00000012B»		Kim's Off shore Windy Wind Project	In the middle of the Atlantic ocean
«3xRK0000001MqV»		New Kims Big Wind Project	Just to the east of the bahamas
«3xRK0000001H0z»		New Kims Big Wind Project	Just to the east of the bahamas
conAnn PQI	2/15/2024	New Kims Big Wind Project	Just to the east of the bahamas

There will be a new option on the home page to submit a Pre-Application.

Submitted pre-applications will show in a new section – ‘My Pre-Applications.’

Any open requests for additional information will show in the new section – ‘Open additional information requests.’

Completing the Pre-Application

- Click the Pre-Application button and a new window presents to begin the application by selecting Start Pre-Application.

Facility Interconnections Pre-Application

Welcome to the NYISO Pre-Application

Please complete all the fields on the pre-application form, attach the pre-application document and any other required files. When finished, please click next and then submit the acknowledgement. After submission, the pre-application will be available on the home page under pre-applications.

Start Pre-Application

Pre-Application

- Complete all fields
- Upload Pre-Application
 - [www.NYISO.com/interconnections-Additional Request Forms Section](http://www.NYISO.com/interconnections-Additional-Request-Forms-Section)
- Select Next

The screenshot shows a web application interface for submitting a pre-application. At the top, there is a navigation bar with links for 'INQUIRIES', 'FINANCIALS', and 'LOGOUT'. Below this is a welcome message: 'WELCOME TO THE NYISO INTERCONNECTIONS PROJECTS COMMUNITY!'. The main heading of the page is 'Facility Interconnections Pre-Application'. The form itself is titled '* Required' and contains several sections: 'Company' (with 'Submitter: Kim Sebben'), 'Project Details' (with fields for Project Name, Point of Interconnection, Secondary POI (Optional), Output Power Rating MW Summer, Output Power Rating MW Winter, Output Power Rating MVA Summer, and Output Power Rating MVA Winter), 'Pre-App Fee Submission Information' (with fields for Date of Payment Submission, FED Ref#, and Amount of Payment), and 'Application File Uploads' (with an 'Upload Files' button and an 'Or drop files' area). At the bottom right of the form, there are 'Previous' and 'Next' navigation buttons.

Submitting Pre-Application

- Screen presents the data you entered and allows you to
 - Submit or
 - Choose Previous to go back and correct data or review attached file(s),

▼ Application File Uploads

Your file(s) have been attached. To view them prior to submitting please use the previous button.

I hereby certify that, to the best of my knowledge, all the information provided in this Pre-Application Request Form is true and correct.

Pre-application confirmation

- Once Submitted you will receive a confirmation on screen

- The pre-application will also be available on the home screen in the pre-application section.
 - Click on project name to be brought back into pre-application.

Pre-App actions

- **Additional information will be updated/completed by NYISO & CTO(s).**
 - Project Status
 - Pre-App Scoping Meeting Date
 - Report Due Date(25 BDs from Scoping meetin date)
 - CTO & CTO contact details
 - Additional information Requests (AIR)
 - Final pre-application report
- **Interconnection Customer can:**
 - View information
 - Access file(s)
 - Manage Project Contacts
 - Respond to AIR

Questions?

Roles of the NYISO

- **Reliable operation of the bulk electricity grid**
 - Managing the flow of power on 11,000 circuit-miles of transmission lines from hundreds of generating units
- **Administration of open and competitive wholesale electricity markets**
 - Bringing together buyers and sellers of energy and related products and services
- **Planning for New York's energy future**
 - Assessing needs over a 10-year horizon and evaluating projects proposed to meet those needs
- **Advancing the technological infrastructure of the electric system**
 - Developing and deploying information technology and tools to make the grid smarter

Our Mission & Vision

Mission

Ensure power system reliability and competitive markets for New York in a clean energy future

Vision

Working together with stakeholders to build the cleanest, most reliable electric system in the nation
