Market Design Specialist
New Resource Integration

ICAPWG/MIWG/PRLWG

May 8, 2024

Agenda

- **Background**
- **2024 Project Approach**
- **Next Steps**

Background

Engaging the Demand Side

- **The NYISO remains committed to evaluating viable enhancements to the current suite of participation models available to Demand Side Resources in the NYCA wholesale market.**
- **In 2023 the NYISO hosted two structured stakeholder discussions and presented at various working group meetings to support a dialogue and collect recommendations.**
- **The NYISO's 2023 Engaging the Demand Side Issue Discovery Report compiled feedback received across sectors.**

2023 Issue Discovery

- **The NYISO published the Engaging the Demand Side Issue Discovery Report in December 2023, which detailed sector-specific findings and high-level recommendations.**
- **NYISO proposed to explore development of a Day-Ahead DER enhancement in 2024:**
 - Day Ahead Market offers for Demand Side Resources
 - For example: Resource receives binding schedule in DAM, without reevaluation in RTM
 - Integrating Aggregation concept with DAM bidding parameters
 - Application of Order 745
 - ICAP Bid, Schedule, Notify requirements

2024 Project Approach

2024 Market Design Concept Proposed

- **The NYISO received feedback during Sector Meeting discussions; numerous participants requested that the NYISO modify the Special Case Resource market design.**
 - Specifically, those RIPs recommend that NYISO change the 4-hour duration requirement to a 6-hour duration requirement

2024 Market Design Concept Proposed

- **The NYISO recently developed and distributed a survey to help advance the 2024 Market Design Concept Proposed.**
- **The survey included questions regarding:**
 - The requested SCR duration obligation modification
 - Additional program modifications that the NYISO believes will improve operational utility of SCRs (e.g., updating the Day Ahead advisory notice to a shorter period)
 - Concepts described in the 2023 Issue Discovery Report (e.g., a Day-Ahead commitment demand response model)
- **The NYISO will use survey responses to inform potential market design modifications.**

Next Steps

Next Steps

- **The NYISO will evaluate the survey results to outline a workplan for the remainder of 2024.**
 - Survey will better illuminate Market Participant preferences regarding SCR enhancements and development of a Day Ahead DER model
- **The NYISO currently targets presentation of a final Market Design Concept Proposed by the end of Q4.**

Our Mission & Vision

Mission

Ensure power system reliability and competitive markets for New York in a clean energy future

Vision

Working together with stakeholders to build the cleanest, most reliable electric system in the nation
