Revision Notes

LS Power Grid New York Corporation I 2023 Annual Update (originally published July 1, 2024) Version 20240930

For more information, please refer to slides 10-13 of the August 9, 2024, stakeholder meeting presentation available in the 'Formula Rate Documents' section of the 'Documents' page of the LSPGNY website.

<u>Ispgridnewyork.com/documents</u> August 9 presentation

The following revisions are included in this version of the 2023 Annual Update.

1 Att 3 - Cost Support (cont.)

Correct December 2023 Long Term Debt value (Line 245, column (a)) from 200 million to 220 million [Cell C39]

This correction decrease the cost of debt and thus the return.

2 Workpaper Att. 5 Revenue

Revise to correct double adjustment for 2021 True-Up adjustment. Results in decrease to Revenue received value in Line 2, Column D [Cell E14] and thus and increase in under-recovery versus prior version.

Together, these corrections result in a revision to the 2023 True-Up Adjustment (Attachment 5, Line 5, Column G) from \$3.79 million (including interest) originally published July 1, 2024, to the corrected value of \$5.34 million (including interest) that is shown in this version and is incorporated into the 2025 Projection.

	References to data from FERC Form 1 are indicated as: #.y.x (page, line, column)
Note	
Letter	
Α	Balances exclude Asset Retirement Costs.
В	No Acquisition Adjustment will be recovered until a filing requesting recovery is submitted to and approved by FERC under FPA Section 205.
С	The balances in Accounts 190, 281, 282 and 283 are allocated to transmission plant included in ISO rates based on company accounting records. Accumulated deferred income tax amounts associated with asset or liability accounts excluded from rate base do not affect rate base, such as ADIT related to asset retirement obligations and certain tax-related regulatory assets or liabilities. To the extent that the normalization requirements apply to ADIT activity in the projected net revenue requirement calculation or the true-up adjustment calculation, the ADIT amounts are computed in accordance with the proration formula of Treasury regulation Section 1.167(I)-1(h)(6) with averaging in accordance with IRC Section 168(i)(9)(B). The remaining ADIT activity are averaged. Work papers supporting the ADIT calculations will be posted with each projected net revenue requirement and/or Annual True-Up and included in the annual Informational Filing submitted to the Commission.
D	Investment tax credit (ITC) is recorded in accordance with the deferral method of accounting and any normalization requirements that relate to the eligibility to claim the credit or the recapture of the credit. The revenue requirement impact of any ITC amortization permitted to reduce income tax expense is determined as the amount of the Amortized Investment Tax Credit (266.8.f) multiplied by the applicable tax gross-up factor.
E	The composite income tax rate (T) applicable to each Rate Year (including both Annual Projections and True-Up Adjustments) is based on the Federal income tax rate (FIT), the State income tax rate (SIT) and the percentage of federal income tax deductible for state income tax purposes (P). If the utility is taxed in more than one state, it must attach a work paper showing the name of each state and how the blended or composite SIT was computed.
	Inputs Required: Federal income tax rate (FIT) = 21.00%
	Composite state income tax rate (SIT) = 6.50% (Attachment 3)
	Percent of federal income tax deductible for state purposes (P) = 0.00%

For each Rate Year (including both Annual Projections and True-Up Adjustments) the statutory income tax rates utilized in the Formula Rate shall reflect the weighted average rates actually in effect during the Rate Year. For example, if the statutory tax rate is 10% from January 1 through June 30, and 5% from July 1 through December 31, such rates would be weighted 181/365 and 184/365, respectively, for a non-leap year.

- Upon enactment of changes in tax law, ADIT balances are re-measured and adjusted in the Company's books of account, resulting in excess or deficient accumulated deferred income tax assets and liabilities. Such excess or deficient ADIT attributable to assets or liabilities reflected in ISO rates and subsequent recoverable or refundable amortization will be based upon tax records and be calculated and recorded in accordance with ASC 740 and any applicable normalization requirements of the taxing jurisdiction. For each re-measurement of deferred taxes, the amounts entered as Adjustments to Rate Base or a component of Income Taxes will be supported by work papers providing the balance for each taxing jurisdiction at the beginning and end of the year, amortization for the year and any other information required to support compliance with any applicable normalization requirements.
- G In the event that transmission assets or right of ways involve a lumpsum upfront payment under a lease that qualifies as a capital lease, it will be amortized over the life of the lease to Account 567 and the unamortized balance will be included here. In the event such a lease involves monthly or annual payments, the payments will be booked to Account 567.
- H Unfunded Reserves are customer contributed capital authorized by a regulatory agency. Balances, if any, will be supported by a workpaper.
 - No amounts shall be credited to accounts 228.1 through 228.4 unless authorized by a regulatory authority or authorities to be collected in a utility's rates.
- I Recovery of Regulatory Assets must be authorized by the Commission.
- J Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of Abandoned Plant.
- K Cash Working Capital assigned to transmission is transmission-allocated O&M minus the amortization of any Regulatory Asset, divided by eight.
 - Prepayments are the electric related prepayments booked to Account No. 165 and reported on Pages 110-111 line 57 in the Form 1.
- L Line 45 removes EPRI Annual Membership Dues listed in Form 1 at 353.f, any EPRI Lobbying expenses included in line 42 of the template and all Regulatory Commission Expenses itemized at 351.h.
 - Line 45 removes all advertising included in Account 930.1, except safety, education or out-reach related advertising.
 - Line 45 removes all EEI and EPRI research, development and demonstration expenses.
 - Line 46 reflects all Regulatory Commission Expenses directly related to transmission service, ISO filings, or transmission siting itemized at 351.h
 - Line 42 or Line 44 and thus Line 48 shall include any NYISO charges other than penalties, including but not limited to administrative costs.
- M Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year.
- N Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation
 - step-up facilities, which are deemed to included in OATT ancillary services. For these purposes, generation step-up $\frac{1}{2}$
 - facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.
- 0 In accordance with the Settlement Agreement in Docket No. ER 20-716 approved June 17, 2021, the Base Return on Equity shall be 9.65% and no change in ROE may be made absent a filing with FERC under FPA Section 205 or 206.
- A hypothetical capital structure of 47% debt and 53% equity will be used until the entire Marcy to New Scotland 345 kV Upgrade Project is placed in-service. After all facilities of the Marcy to New Scotland 345 kV Upgrade Project are placed in-service, the lesser of a 52% equity ratio or the actual equity ratio will be used.
- Q Non-incentive investments are investments without ROE incentives and incentive investments are investments with ROE incentives

All unfunded reserves will be listed above, specifically including (but not limited to) all subaccounts for FERC Account Nos. 228.1 through 228.4. "Unfunded reserve" is defined as an accrued balance (1) created and increased by debiting an expense which is included in this formula rate (column (e), using the same allocator in column (g) as used in the formula to allocate the amounts in the corresponding expense account) (2) in a divance of an anticipated expenditure related to that expense (3) that is not deposited in a restricted account (e.g., set aside in an escrow account, see column (d)) with the earnings thereon retained within that account. Where a given reserve is only partially funded through accruais collected from customers, only the balance funded by customer collections shall serve as a rate base credit, see column (f). The source of monthly balance data is company records.

LS Power Grid New York Corporation I
Project Worksheet
Attachment 4 For the 12 months ended 12/31/2023 Utilizing Appendix A Data

The calculations below calculate that additional revenue requirement for 100 basis points of ROE and 1 percent change in the equity component of the capital structure.

These amounts are then used to valuate the actual increase in revenue in the table below (starting on line 66) associated with the actual incentive authorized by the Commission

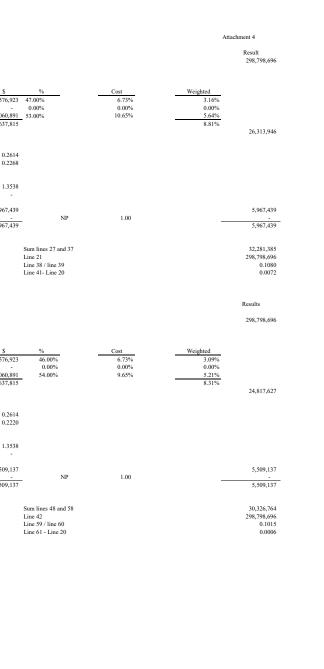

The use of the 100 basis point calculations do not presume any particular incentive (i.e., 100 basis points) being granted by the Commission.

68 Check Sum Appendix A Line 3 69 Difference (must be equal to zero)

Note:

Column (b), Net Investment includes the Net Plant In Service, unamortized regulatory assets, and unamortized abandoned plant.

Column (l), Gross Plant in Service excludes Regulatory Assets, CWIP, and Abandoned Plant.

Competitive Bid Concession, if any, will reflect outcome of competitive developer selection process and will be computed on a workpaper that will be provided as supporting documentation for each Annual Update and will be zero or a reduction to the revenue requirement. The amount in Column (p) above equals the amount by which the annual revenue requirement is reduced from the ceiling rate.

Double Column (e), for each project with an incentive in column (e), note the docket No. in which FERC granted the incentive>

Project	Docket No.	Note
Marcy to New Scotland 345 kV Upgrade Project (Segment A)		100 basis point ("bp") adder to the Base ROE will apply to Project Costs incurred up to the Cost Cap (defined in Section III. B. 5 of Settlement Agreement). A 100 bp ROE adder shall also apply to Unforesceable Costs (that are more than five (5) percent of the Cost Cap), Third Party Costs, and Project Development Costs. The 100 bp consists of a 50 bp incentive adder to account for benefits to customers, including congestion relief, and a 50 bp incentive adder for risks and challenges in developing the AC Transmission Projects.

Notes

- 1. From Attachment 4, Column (q) for the period being trued-up
- 2. The "revenue received" is the total amount of revenue distributed in the True-Up Year. The amounts do not include any true-ups or prior period adjustments and reflects any Competitive Bid Concessions
- 3. Then Monthly Interest Rate shall be equal to the interest rate set forth below on line 13 and be applied to the amount in Column E for a period of 24 months
- 4. The True-Up Adjustment is applied to each project prorata based its contribution to the Revenue Requirement shown in Attachment 4

Revenues from Transmission of Electricity for Others (Account 456.1) \$55,720,942.47 Form No. 1 page 328.35n

Less: Revenue balancing entry to reflect revenue requirement earned \$4,994,012.23

Revenue received from NYISO \$50,726,930.24 → To Attachment 5, Line 2, Column D

LS Power Grid New York Corporation I Workpaper for Permanent Book/Tax Differences 2023 Annual Update (True-Up)

The book/tax differences reflected in recoverable income tax expense are differences between revenues and expenses reflected in the revenue requirement and revenue and deductions reflected in taxable income. As such, non-operating (below-the-line) expenses and income are not included (e.g., accrual of AFUDC-equity). Book depreciation of capitalized AFUDC-equity is reflected in ratemaking, but not for income tax purposes, and, thus, is a permanent book/tax difference in this context. Similarly, amortization of the regulatory asset for pre-commercial carrying charges accrued at an after-tax equity rate of return is permanent difference between recoverable expenses and tax deductions.

Permanent differences per tax return	Amount per Formula Rate Template	
Depreciation of AFUDC-equity	340,080	
Amortization of carrying charge-equity	70,052	
Total permanent book/tax differences	410,132	
Tax rate	26.14%	
Tax effect of permanent book/tax differences	107,188	→ To Attachment 3, Line 207
Tax gross-up factor	1.3538	
Permanent Differences Tax Adjustment	145,113	

LS Power Grid New York Corporation I Attachment 6a - Accumulated Deferred Income Taxes (ADIT) Proration and Averaging Worksheet Projected Annual Transmission Revenue Requirement

For the 12 months ended 12/31/2023

No.	ADIT Account	Amount
1	190	126,382 From line 25
2	281 (enter negative)	- From line 58
3	282 (enter negative)	(4,284,413) From line 91
4	283 (enter negative)	(25,989) From line 124
5	Total Projected ADIT	(4,184,020) Enter as negative Appendix A, page 2, line 27
6	Rate year =	2023

Note 1 - The computations on this workpaper average the projected annual activity of accumulated deferred income taxes. To the extent that the ADIT is subject to the normalization requirements, the proration rules of Treasury Regulation Sec. 1.167(I)-1(h)(6) and the consistency rules of IRC Section 168(i)(9)(B) are applied. Activity related to the portions of the account balances not subject to the proration requirement are averaged instead of prorated.

365

9 Note 2 - The components of the accumulated deferred income tax balances are detailed on Attachment 6b.

Test period days after rates become effective

LS Power Grid New York Corporation I Attachment 6c - Accumulated Deferred Income Taxes (ADIT) Proration and Averaging Worksheet Actual Annual Transmission Revenue Requirement (True-up Adjustment) For the 12 months ended 12/31/2023

ADIT Account 190 281 (enter negative) 282 (enter negative) 283 (enter negative) Total Projected ADIT Amount 527,233 From line 25 (5,530,422) From line 58 (25,989) From line 91 (25,989) From line 124 (5,029,178) Enter as negative Appendix A, page 2, line 27

Rate year = Test period days after rates become effective Note 1 - The computations on this workpaper average the actual annual activity of accumulated deferred income taxes. To the extent that the ADIT is subject to the normalization requirements, the proration rules of Treasury Regulation Sec. 1.167(l)-1(h)(6) and the consistency rules of IRC Section 168(l)(9)(B) are applied. Activity related to the portions of the account balances not subject to the proration requirement are averaged instead of prorated. Note 2 - The components of the accumulated deferred income tax balances are detailed on Attachment 6d. Amount debit / <credit> 522,204 Account 190 - Accumulated Deferred Income Taxes Beginning Balance Less: Portion not related to transmission Less: Portion not reflected in rate base Subtotal: Portion reflected in rate base Less: Portion subject to proration Portion subject to averaging 11 12 13 14 15 16 Line 11 - line 12 - line 13 Line 29, Col. Note 7 - Column J is the difference between actual monthly and projected monthly activity (Column I minus Column C). Specifically, if projected and actual activity are both positive, a negative in Column J represents over-projection (i.e., the amount of projected activity that did not occur) and a positive in Column J represents under-projection (i.e., the excess of actual activity over projected activity). If projected and actual activity are both negative, a negative in Column J represents under-projection (i.e., the excess of actual activity over projected activity) and a positive in Column J represents over-projection (i.e., the amount of projected activity that did not occur).

Note 8 - Column K preserves the effects of ADIT proration from the projected revenue requirement when actual monthly and projected monthly activity are either both increases or decreases. Specifically, if Column J indicates that ADIT activity was over-projected, enter Column G x (Column IC 143

Note 9 - Column L applies when (1) Column J indicates that ADIT activity was under-projected ANID (2) actual monthly and projected monthly activity are either both increases or both decreases. Enter 50 percent of the amount from Column J. In other situations, enter zero. The ADIT activity in column L is multiplied by 50 percent to reflect averaging of rate base to the extent that the proration requirement has not been applied to a portion of the monthly ADIT activity. 144

Note 10 - Column M applies when (1) projected monthly activity was an increase while actual monthly activity was a decrease OR (2) projected monthly activity was an decrease while actual monthly activity was an increase. Enter 50 percent of the amount of actual monthly activity (activity was an increase. Enter 50 percent of the amount of actual monthly activity or old in other cases. The ADIT activity in column M is multiplied by 50 percent to reflect averaging of rate base to the extent that the providion requirement has not been applied to a portion of the monthly ADIT activity.

Note 11 - Column N is computed by adding the prorated monthly ADIT activity, if any, from Column K to the portion of monthly ADIT activity, if any, from Column L or M to the balance at the end of the prior month.

19	303.1	Contributions in Aid of Construction	Note B

Notes

- A These depreciation rates shall stay in effect until changed pursuant to a Commission order emanating from an FPA Section 205 or Section 206 filing.
- B In the event a Contribution in Aid of Construction (CIAC) is made for a transmission facility, the transmission depreciation rates above will be weighted based on the relative amount of underlying plant booked to the accounts shown in lines 1-9 above and the weighted average depreciation rate will be used to amortize the CIAC. The life of a facility subject to a CIAC will be equivalent to the depreciation rate calculated above, i.e., 100% ÷ deprecation rate = life in years. The estimated life of the facility or rights associated with the facility will not change over the life of a CIAC without prior FERC approval.

Worksheet - Annual Excess or Deficient Accumulated Deferred Income Taxes Worksheet

Annual Transmission Revenue Requirement

For the 12 months ended 12/31/2023

Line No

21

22

Effect on rate base prior to re-measuremen

Effect on rate base after re-measurement

Purpose of worksheet

The purposes of this portion of the worksheet are to:

- describe legislation resulting in remeasurement of ADIT accounts,
- explain how any ADIT accounts were re-measured,
- explain the excess or deficient ADIT contained therein,
- explain the accounting for any excess or deficient amounts in Accounts 182.3 (Other Regulatory Assets) and 254 (Other Regulatory Liabilities),
- reconcile the amounts of excess or deficient ADIT determined as a result of each specific change in tax law (i.e., unrecovered regulatory assets and unrefunded regulatory liabilities comprising the Rate Base Adjustment Mechanism) as of the beginning and end of the current test period.
- indicate whether each excess or deficient ADIT amount is protected (i.e., subject to the normalization rules) or unprotected (i.e., not subject to the normalization rules),
- indicate the amount of amortization of the excess or deficient ADIT returned or recovered through rates (i.e., the Income Tax Allowance Adjustment Mechanism) during the current period,
- indicate the accounts to which the excess or deficient ADIT are amortized,
- indicate the amortization period of the excess or deficient ADIT being returned or recovered through rates, and
- describe the method of amortization each excess or deficient ADIT amount.

3 Description of changes in tax law

Note 1a - The composite tax rates used for the remeasurement of ADIT balances are:

		Historical	New
	Federal income tax rate	21.00%	21.00%
	State income tax rate	6.50%	7.25%
	omposite federal/state income tax rate	26.14%	26.73%
)	Tax gross-up factor	1.35382	1.3647

Note 1b - A New York state tax law change enacted on April 19, 2021, increased the income tax rate from 6.5% to 7.25% for taxpayers with business income base exceeding \$5 million. The tax rate was effective for tax years beginning on or after January 1, 2021, and before January 1, 2024. This tax law change was expected to a ffect LS Power Grid New York Corporation 1 for 2023. The 2023 projected revenue requirement was based on the 7.25% tax rate. However, actual taxable income for 2023 did not exceed \$5 million and, as such, the 6.5% tax rate applied to the 2023 tax year. The actual revenue requirement (true-up) is based on the 6.5% tax rate. LS Power Grid New York Corporation 1 computed a regulatory asset related to ADIT remeasurement and amortization to recover this amount for the 2023 projected revenue requirement. LS Power Grid New York Corporation I did record these amounts in 2023. The 2023 actual revenue requirement (true-up) does not reflect regulatory assets or regulatory liabilities for deficient or excess deferred taxes and does not reflect amortization amounts.

In May 2023, New York State enacted a law that extended the increased corporate franchise tax rate 7.25 percent for a three-year period, through tax year 2026, for taxpayers with taxable income greater than \$5 million. The tax rate is 6.5 percent for other taxpayers. LS Power Grid New York Corporation I did not record regulatory assets or regulatory liabilities for deficient ADIT or excess ADIT during 2023.

19	Total		-	-	-	-	-	-	-	-	-	-	-	-	-	-

Note 2 - Explanation of how ADIT accounts are re-measured upon a change in income tax law

Deferred tax assets and liabilities are adjusted (re-measured) for the effect of the changes in tax law (including tax rates) in the period that the change is enacted. Adjustments are recorded in the appropriate deferred tax balance sheet accounts 190, 281, 282 and 283) based on the nature of the temporary difference and the related classification requirements of the accounts. If as a result of action or expected action by a regulator, it is probable that the future increase or decrease in taxes payable due to the change in tax law or rates will be recovered from or returned to customers through future rates, a regulatory asset or liability is recognized in Account 182.3 (Other Regulatory Assets), or Account 254 (Other Regulatory Liabilities), as appropriate, for that probable future revenue or reduction in future revenue. Re-measurements of deferred tax balance sheet accounts may also result in re-measurements of tax-related regulatory assets or liabilities that had been recorded prior to the change in tax law. If is not probable that the future increase or decrease in taxes payable due to the change in tax law or rates will be recovered from or returned to customers through future rates, tax expense is recognized in Account 411.2 (Provision for Deferred Income Taxes, Other Income or Deductions) or tax benefit is recognized in Account 411.2 (Provision for Deferred Income Taxes-Credit,
