

NYISO Career Spotlight

INFORMATION TECHNOLOGY

Innovating with Smart Solutions

The New York Independent System Operator (NYISO) works to make the power grid smarter by **developing and deploying innovative information technology solutions** to meet New York's dynamic energy needs.

Since the NYISO's inception over 20 years ago, our innovative technology achievements have consistently **improved the reliability and efficiency of the power grid**. These advances increase timeliness, visibility and accuracy of wholesale energy market data and grid information.

Our IT professionals develop, enhance and maintain the applications and software systems that support grid operations and **keep our systems running around the clock to support the needs of all New Yorkers**.

The NYISO hires individuals within our IT department in many different capacities. Some examples of positions include:

- **Network Engineers**
- **Software Developers**
- **IT Security Analysts**
- **Systems Administrators**
- **Database Administrators**

About the New York Independent System Operator (NYISO)

We are a not-for-profit corporation responsible for managing New York's electric grid and its competitive wholesale electric marketplace. We do not generate power or own transmission lines, but we work with power producers, utility companies, and stakeholders to provide power to meet New Yorkers' electricity needs on a daily, hourly, and minute-to-minute basis. We are committed to a fair, transparent market system because it helps us deliver the lowest cost wholesale power solutions.
